III. Lessons of Forest Planning

- A. The "gardener's ethic" -- bring the national forests under active management.
- B. No overall change in suitable timberland.
- C. Increased emphasis on logging and road construction, more below-cost timber sales and taxpayer losses.
- D. Threats to water quality and fisheries.
- E. Loss of wildlife habitat and biological diversity.
- F. Recreation and scenic values.
- G. Allocation of future expenditures.
