CHARTER

HISTORICAL NOTE

On May 11, 1909 Colorado Springs electors, pursuant to the home rule provisions of Article XX of the State Constitution, adopted the Charter of the City of Colorado Springs. The original Charter created a commission form of government for the City. The legislative functions were vested in a Council consisting of the mayor and four at-large councilmen. The mayor was granted a salary of \$3,600 per annum, and each councilman was granted a salary of \$2,000 per annum. The executive and administrative functions were vested in five departments: Water and Water Works, Finance, Public Safety, Public Works and Property, and Public Health and Sanitation. The mayor was designated as Commissioner of the Department of Water and Water Works, and the Council was required to designate one councilman to be commissioner of each of the other departments. This latter provision was amended on April 1, 1913 to provide for the selection at general elections of councilmen as commissioners.

The Charter provided that the mayor was to be the chief executive officer of the City. Upon the recommendation of the commissioner of the appropriate department, the mayor appointed the heads of such department and all other employees of the City. The mayor was further empowered to suspend or remove any officer or employee when in his judgment the public interest so demanded. The Charter allowed the mayor to veto any or every item contained in appropriation ordinances, but such veto could be overridden by vote of four members of the Council (in effect, the entire Council exclusive of the mayor).

The Charter was substantially amended on July 6, 1920 to provide for a council-manager form of government in lieu of the previous commission form. The amended Charter provided for nine councilmen, to be elected at large for staggered six-year terms. Council was required to elect biennially one of its members as president and another as vice-president. The president was required to preside at Council meetings and had a voice and vote therein but no veto. He could use the title of mayor but had little power except in times of public emergency. All members of Council were required to serve without compensation.

The 1920 amendment created the office of City Manager, who was to be employed by the Council as the executive head of the City. The amendment granted to the Manager broad powers and duties, including the right to exercise the power and authority of the commissioner or head of any of the five departments originally created in 1909. Thus, the Manager rather than individual Council members performed the functions of commissioner of the various departments, as such functions were prescribed by other, unamended portions of the Charter. Finally, the 1920 amendment also granted to discharged City police and fire department employees the right to a hearing before the Civil Service Commission.

At a special election held on January 24, 1922 the Charter was amended to provide for the submission of the question of issuing bonds to a vote of the qualified taxpaying electors. However, in *Pike v. School District No. 11 in El Paso County*, 172 Colo. 413, 474 P.2d 162 (1970), the Colorado Supreme Court ruled that a state statute limiting the right to vote to taxpaying electors was unconstitutional. The Charter

provision was therefore amended in 1977 to delete the requirement that an elector in bond issue elections must have paid a property tax within the City. See also, *Karok v. City and County of Denver*, 176 Colo. 406, 490 P.2d 936 (1971).

The Charter was further amended on April 5, 1927. This amendment expanded the election provisions of the Charter, and it included a provision for the registration of electors for municipal elections at the office of the City Clerk.

The Department of Public Utilities was created by an amendment to the Charter approved by Colorado Springs electors on April 4, 1939. The amendment provided for the manner of handling the funds and accounts of that department. On April 1, 1947 the Charter was amended to replace the Park Commission with a Department of Parks and Recreation, to be subject to control of the Council. An amendment allowing the formation of a combined City-County Health Department was approved on April 5, 1949. On April 3, 1951 a definition of "taxpaying electors" and "city taxes" was added, and on April 5, 1959, a provision defining the term "qualified electors" was inserted. Amendments to the Charter which were approved on April 4, 1961 included an expansion to the provisions concerning vacancy of the offices of elected officials; a provision allowing the City to take up the last one-fifth of public improvement district bonds; and a section allowing the 1947 Public Library Law to govern public libraries in the City. On April 2, 1963, the Charter was again amended to allow Council to prescribe the method for registration of electors and authorizing the use of voting machines. The limitation on the City's indebtedness was increased from three percent to ten percent on April 6, 1965. The Charter was further amended on April 4, 1967 to allow recreational use of a portion of the City's Northfield and North Slope watersheds.

In April of 1969 Colorado Springs electors approved two amendments to the Charter relating to the election of Council members. First, the term of Council members was reduced from six years to four years. Secondly, provision was made for the election of four district councilmen and five at-large councilmen, thereby eliminating the former section which provided that all nine Council members were to be elected at large.

On April 1, 1975 the Charter was amended to provide for the popular election of the mayor. Thus, Council would consist of four at-large councilmen, four district councilmen, and a popularly elected mayor. Another amendment adopted in 1975 expanded the vacancy and forfeiture provisions relating to the mayor, vice-mayor and Council members. Also, a section was added to the Charter providing for the City's joint cooperation with other governmental units and for its participation with the private sector in the development of energy or water resources.

On April 5, 1977 the Charter was amended by adding a so-called "safe seat" provision, which requires any elected officer running for an elective City office other than that currently held by him to give a notice of intent to so run at least sixty days prior to the next election. Once the notice of intent is given and not withdrawn at least sixty-one days prior to the election, the office currently held is automatically vacated on the third Tuesday in April following said election.

The five administrative departments originally created by the 1909 Charter were abolished. The 1977 amendment provided instead that Council by ordinance may establish departments, divisions, offices or agencies and prescribe the functions thereof, other than those already provided for in the Charter. Another amendment to the Charter adopted in 1977 abolished the Police Court and created a Municipal Court, the practice and procedure of which is to be as set forth by Colorado law, Colorado Supreme Court rules and City ordinances.

Section 4 of the Charter provides that no person shall be eligible to the office of mayor or councilman unless he has been a citizen of Colorado Springs for at least five years immediately preceding the election. This five-year residency requirement was expressly found unconstitutional. *Bird v. City of Colorado Springs*, 181 Colo. 141, 506 P.2d 1099 (1973). The Colorado Supreme Court has upheld the constitutionality of a one-year residency requirement. *Cowan v. City of Aspen*, 181 Colo. 386, 509 P.2d 1269 (1973). However, the electors at the April 5, 1977 election turned down a proposed Charter amendment which would have reduced the five-year requirement to one year. Thus, the five-year residency requirement, though invalid, remains in the Charter. The Colorado Municipal Election Code of 1965, § 31-10-101 et seq., C.R.S. 1973, as amended, provides that every qualified elector may hold office in any municipality if he has resided therein for at least twelve consecutive months immediately preceding his election. Section 31-10-301, C.R.S. 1973, as amended. The Colorado Constitution provides that the statutes of the State of Colorado shall apply to home rule cities unless superseded by charter or ordinance. Colo. Const. Art. XX, § 6. Since the existing Colorado Springs Charter provision providing for a five-year residency requirement is invalid, no such supersession of the State one-year residency statute exists. Therefore, presumably the one-year residency provision contained in the Colorado Municipal Election Code applies to candidates for municipal office in Colorado Springs. This view is bolstered by language contained in the *Cowan* case, supra, which indicates that any municipality would encounter great difficulty in justifying a residency requirement in excess of that set forth in the Municipal Election Code.

On April 3, 1979, several amendments to the Charter were approved by Colorado Springs electors. Included in the amendments was a substantial revision of the Charter's election provisions. Sections relating to registration, form of ballots and the like were deleted, and a provision was substituted enabling council to regulate these matters by ordinance. Former Section 85(f), which defined a "qualified elector" as an elector qualified to vote in the City and registered to vote, was deleted. A Colorado Supreme Court decision had held that requiring registration as a prerequisite to qualification as an elector violates Colo. Const. Art. V, § 1. *Francis v. Rogers*, 182 Colo. 430, 514 P.2d 311 (1973). See also, *Valdez v. Election Commission of City and County of Denver*, 184 Colo. 384, 521 P.2d 165 (1974); *Benson v. Election Commission*, 62 Colo. 206, 161 P.2d 295 (1916).

Another 1979 amendment to the Charter completely revised the recall, initiative and referendum provisions so as to ensure their compliance with Articles V and XXI of the Colorado Constitution. A Colorado Supreme Court decision had held that the delegation to municipalities of the power to regulate recall elections under Colo. Const. Art. XXI, § 4 was limited to procedural matters and substantive provisions not in conflict with the State Constitution. *Bernzen v. City of Boulder*, 186 Colo. 81, 525 P.2d

416 (1974). See also, *Shroyer v. Sokol*, 191 Colo. 32, 550 P.2d 309 (1976). The 1979 revision to the recall, initiative and referendum provisions is therefore an attempt to comply with applicable provisions of the State Constitution pursuant to the dictates of the Colorado Supreme Court.

The 1979 amendment also added Section 145(a) providing for the removal of striking City employees and requiring all City employees to make an oath declaring that they will not participate in any manner in a strike against the City. In September, 1979, a strike of City employees did occur and because of very strict interpretations placed upon Section 145(a) by an unsympathetic court, it was found as a practical matter that Section 145(a) in its original version was well-nigh unenforceable. Therefore, that section was further amended by Colorado Springs electors on February 19, 1980, which version eliminated most of the procedural requirements used by the court to hamper the City in its efforts to deal with the striking employees.

Another 1980 amendment adopted by the electors provided that division of the City into election districts shall take place at least 120 and not more than 150 days before any City election at which District Councilmen are to be elected; the previous Charter provision had required such districting to take place within 120 days after receipt of the United States decennial census for the City.

The foregoing is merely a review of major amendments to the Charter since its adoption in 1909, and is by no measure comprehensive. Reference must be made to the Charter itself in order to ascertain in detail its contents. In reviewing the Charter it must be remembered that a charter is the organic law of a home rule municipality, and extends to all its local and municipal matters. Colo. Const. Art. XX, § 6. Colorado Springs, as a home rule city, possesses every power possessed by the Colorado legislature as to local and municipal matters, unless restricted by the terms of its Charter. See, *Service Oil Co. v. Rhodus*, 1979 Colo. 335, 500 P.2d 807 (1972); *Veterans of Foreign Wars v. Steamboat Springs*, 195 Colo. 44, 575 P.2d 835 (1978). Thus, the Charter of the City of Colorado Springs is not a grant of powers to the City; rather, it is a limitation on powers given the City under the home rule provisions of the State Constitution.

(c) *Commencement of Office* - The term of the mayor and councilmen shall commence at ten o'clock A.M. on the third Tuesday of April following their election, except the term of a councilman appointed to fill a vacancy shall commence upon the taking of the oath of office, and the term of the mayor and councilmen elected as a result of a recall election shall commence upon the declaration of the election and taking the oath of office. (1909; 1920; 1969; 1975)

(d) *Councilmen Elections* - The mayor and the four at-large councilmen shall be elected for four-year terms commencing with the 1979 general municipal elections. The four district councilmen shall be elected for four-year terms commencing with the 1977 general municipal elections. (1969; 1975)

(e) *Councilman Prohibitions* - No elected City officer shall be permitted to run for any elective City office, except that held by him, unless he gives notice in writing to the City Clerk of his intention to so run at least sixty (60) days prior to the date of the next municipal election. Once such notice is given and not withdrawn, the office of that elected officer shall be automatically vacated at 9:59 a.m. on the third Tuesday in April following said election. The vacancy thus created shall be filled by election at the general municipal election next following when such notice was given. The term of office shall be for the unexpired term of the elected officer giving the notice. (1977)

4. *Qualifications* - No person shall be eligible to the office of mayor or councilman unless he be a citizen of the United States, at least twenty-five (25) years of age, and shall have been for five years¹ immediately preceding such election a citizen of the City of Colorado Springs, and for two (2) years immediately preceding his election shall have paid City taxes. (1909)

5. (a) *Vacancy* - The office of mayor or councilman shall become vacant upon death, resignation, removal from office, or forfeiture of office in any manner authorized by law. The office of mayor or at large councilman shall become vacant for failing to maintain bona fide residence in the City. The office of district councilman shall become vacant for failing to maintain bona fide residence in the district from which elected.

If a vacancy occurs in the office of mayor, the vice-mayor shall become the mayor until the next general municipal election. The vacancy on the Council created by the vice-mayor becoming mayor, shall be filled as set forth below. If at the next general municipal election the vice-mayor's term as a councilman has not expired, he shall resume the office of councilman until the term for which he was elected expires.

If a vacancy occurs in the office of councilman more than sixty (60) days prior to the next general municipal election, the Council shall appoint an eligible person to fill such vacancy within thirty (30) days of the date of vacancy until the next general municipal election. Any appointed councilman shall be subject to the provisions of recall set forth herein. If a vacancy occurs in the office of councilman within sixty (60) days of a general municipal election, such vacancy shall be filled at the next general municipal election. Any vacancy filled by election shall be for the unexpired term. (1909; 1975)

(1975)

6. *Removal* - The vice-mayor, as such officer, but not as a councilman, may be removed from office of vice-mayor by a vote of at least five (5) members of the Council. (1909; 1920; 1975)

ARTICLE III

THE COUNCIL

7. (a) *General Powers and Duties* - All powers of the City shall be vested in the Council, except as otherwise provided by law or this charter, and the Council shall provide for the exercise thereof and for the performance of all duties and obligations imposed on the City by law. (1909; 1920; 1977)

(b) *Appointments* - The Council shall appoint by the concurring vote of a majority of its members a City Attorney, a City Clerk, a City Treasurer, and a City Auditor, whose duties, compensation and tenure of office shall be as prescribed by ordinance. The office of City Clerk and City Treasurer may be held by one person. All votes upon appointments to office shall be upon roll call and recorded. (1920; 1977)

8. *Mayor and Vice-Mayor* - The mayor shall be a member of the Council and shall preside at all meetings of the Council and perform such other duties consistent with his office as may be imposed by the Council by ordinance or resolution; he shall have a voice and vote in its proceedings but no veto. He shall be recognized as the official head of the City for the purpose of executing legal instruments; for all ceremonial purposes, and by the Governor or other constituted authority for the purpose of military law. He may take command of the police and govern the City by proclamation in times of public danger or emergency. A majority of the Council shall determine what constitutes such public danger or emergency; and such proclamation may be terminated at any time by the affirmative vote by a majority of the Council. The mayor shall have no administrative duties.

If the mayor be temporarily absent from the City or otherwise disabled from any cause, his duties shall, in the meantime, devolve upon and be performed by the vice-mayor. In the absence of both the mayor and the vice-mayor, the other members of the Council shall elect one of their number to perform the duties of mayor. At its first regular meeting on or after the third Tuesday in April of each odd-numbered year, and biennially thereafter, the Council shall elect one of its members as vice-mayor. (1909; 1920; 1975)

9. *Judge of Qualifications* - The Council shall be the judge of the election and qualification of its own members and of the grounds for the forfeiture of the office of mayor or councilman subject to review by the Courts in case of contest. (1909; 1977)

10. *Restrictions Upon Members of the Council* - The mayor or councilmen shall not hold any other City office, position, employment or be employed by any agency for which their compensation is directly paid by the City. No former mayor or councilman shall be appointed to any office, position or employment, the compensation of which was increased or fixed by the Council while he was a member thereof, until after the expiration of one year from the date when he ceased to be a member of the Council. (1909; 1977)

11. *Rules of the Council* - The Council shall make and publish its own rules of procedure within sixty (60) days of the effective date of this provision. The Council may amend its own rules. The Council may punish its members for disorderly conduct, and the Council may compel the attendance of members. (1909; 1977)

12. *Sessions of the Council* - (a) The Council shall meet at least once a month in legislative session, and the Council shall prescribe the time and place of its legislative sessions and the manner in which special meetings thereof may be called. (1909; 1977)

(b) The City Clerk shall be the Clerk of the Council. (1909; 1977)

(c) A majority of the members of Council shall constitute a quorum to do business, but a lesser number can adjourn. (1909; 1977)

(d) All sessions shall be public; however, the Council may recess for the purpose of discussing in a closed or executive session personnel, land acquisition or legal matters; provided, always, no ordinance or resolution shall be passed in a closed or executive session. (1909; 1977)

(e) The Council shall cause to be kept a journal of its legislative sessions, which shall be a public record. (1909; 1977)

13. *Ordinances and Resolutions* - (a) At legislative sessions the Council shall act only by ordinance, resolution or motion. (1909; 1920)

(b) The ayes and noes shall be taken upon the passage of all ordinances and resolutions and entered upon the journal of the Council's proceedings. Upon the request of any member, the ayes and noes shall be taken and recorded upon any motion. Every member when present must vote. Every ordinance and every resolution providing for the expenditure of money shall require on final passage the affirmative vote of five (5) members. (1909; 1920)

(c) No ordinance shall be passed finally on the date it is introduced, except in the case of public emergency as set forth in Section 15. (1909; 1920; 1977)

(d) The enacting clause of all ordinances passed by the Council shall be in these words: "Be It Ordained by the City Council of the City of Colorado Springs". (1909; 1920)

(e) The City Clerk shall with the mayor sign and attest all ordinances and resolutions. (1909; 1977)

14. *Publication of Ordinances* - Every ordinance shall be published twice in a daily newspaper of the City with the first publication to be at least ten (10) days before final passage of the ordinance published, and the second publication any time after its final passage. The ordinance shall not take effect until five (5) days after the second publication. However, emergency ordinances passed as provided in this Article shall take effect upon passage and be so published on the following day, subject always to the provisions of Article XIV. When the Council deems it appropriate, publication of the title of any ordinance with a summary written by the City Clerk, together with a statement that the ordinance is available for public inspection and acquisition in the office of the City Clerk shall be sufficient publication. (1902; 1920; 1977) (Ed. Note: The 1977 amendment brought together in a single section the provisions relating to publication which had previously been found in Sections 13 and 14.)

15. *Emergency Ordinances* - To meet a public emergency affecting life, health, property or the public peace, the Council may adopt one or more emergency ordinances, but such ordinances may not levy taxes, grant, renew or extend a license, permit, franchise, special privilege or authority, or regulate the rate charged by any public utility for its services. An emergency ordinance shall be introduced in the form and manner prescribed for ordinances generally, except that it shall be plainly designated as an emergency ordinance and shall contain, after the enacting clause, a declaration stating that an emergency exists and describing such emergency in clear and specific terms.¹ An emergency ordinance may be adopted, with or without amendment, or rejected at the meeting at which it is introduced, but the affirmative vote of at least five (5) members shall be required for adoption. After its adoption the ordinance shall be published and printed as prescribed for other ordinances. It shall become effective upon adoption or at such later time as it may specify. An emergency ordinance may also be repealed by adoption of a repealing ordinance in the same manner specified in this section for adoption of emergency ordinances. (1977)

16. *Amendment or Repeal* - No ordinance or section thereof shall be amended or repealed except by ordinance adopted in the manner provided in this charter. (1909; 1977) (Ed. Note: This provision was formerly Section 15 of the 1909 charter. The former Section 16 dealing with ordinances granting Franchises was repealed as unnecessary in 1977. See Article XII relating to Franchises and Licenses.)

17. *Record of Ordinances* - A true copy of every ordinance shall be kept in a book marked "Ordinance Record", and every ordinance shall be authenticated by the signatures of the mayor and City Clerk. (1909)

18. *Proof of Ordinances* - Any ordinance or any portion thereof may be proved by a copy thereof certified by the City Clerk, under the seal of the City; or when printed in book or pamphlet form and purporting to be published by the authority of the City, the same shall be received in evidence in all Courts, or other places, without further proof. (1909; 1977)

19. *Charter and Ordinances* - The Council shall, from time to time hereafter, cause such ordinances as it deems necessary to be codified under

1. The truth or falsity of a declaration by Council that an emergency exists is a legislative rather than a judicial question. *Shields v. City of Loveland*, 74 Colo. 27, 218 P. 913 (1923). Absent a showing that Council acted arbitrarily or capriciously, a reviewing court is bound by Council's determination of an emergency. *U.S. Disposal Systems, Inc. v. City of Northglenn*, Colo. 567 P.2d 365 (1977)

appropriate headings and to be published in book form, together with or separate from the charter and such provisions of the Constitution and laws of the State as the Council may deem expedient. The present ordinances, resolutions and orders not inconsistent with the provisions of this charter and in force at the time this charter takes effect shall continue in full force and effect until the Council otherwise by ordinance, resolution or motion provides. Such codification or any section thereof may be proven in the same manner and with the same effect as any other ordinance. (1909; 1977)

20. *Statements* - The Council shall cause to be printed each month in pamphlet form a detailed statement of all receipts and expenditures of the City and a summary of Council's legislative proceedings during the preceding month and furnish printed copies thereof to the public library, the daily newspapers of the City and to persons who shall apply therefor at the office of the Clerk. Said statement shall also show the amount of water used during the preceding month and the amount of reserve water in storage at the end of the month. (1909; 1977) (Ed. Note: This provision was formerly Section 21 of the 1909 charter. The former Section 20, dealing with the power of the City Council to establish offices and employments was repealed as unnecessary in 1977.)

21. *Adoption by Reference* - The City Council may by ordinance adopt by reference printed or published codes, provided, that such adoption shall be by ordinance published as required in Section 14; and provided further, no penalty clause may be adopted by reference. (1977)

21.1 *Independent Audit* - The Council shall provide for an independent annual audit of all City accounts and may provide for more frequent audits as it deems necessary. Such audits shall be made by a certified public accountant or firm of such accountants who have no direct personal interest in the fiscal affairs of the City government or any of its officers. The Council may, without requiring competitive bids, designate such accountant or firm annually or for a period not exceeding three (3) years, provided that the designation for any particular fiscal year shall be made not later than six (6) months after the beginning of such fiscal year. If the State makes such an audit, the Council may accept it as satisfying the requirements of this section. (1977; 1985)

22. (Repealed, 1920)

ARTICLE IV

THE CITY MANAGER¹

23. (a) *Appointment* - The City Council by a majority vote of its entire membership shall employ a City Manager who shall be the chief administrative officer of the municipal government under the City Council and shall hold office during its pleasure. He shall be appointed without regard to any consideration other than his fitness and competency. No member of the Council shall be appointed City Manager. By letter filed with the City Clerk, the Manager shall designate, subject to approval of

1. Created by amendment to the Charter adopted July 6, 1920.

the Council, a qualified City administrative officer to exercise the powers and perform the duties of Manager during his temporary absence or disability. During such absence or disability, the Council may revoke such designation at any time and appoint another administrative officer of the City to serve until the Manager shall return or his disability shall cease. (1920; 1975)

(b) *Removal* - The Council at a meeting of Council may remove the City Manager by resolution, but only upon a vote of two-thirds of the entire Council. Upon removal, the Council may, in its discretion, provide termination pay. (1975)

24. Powers and Duties of the City Manager - The City Manager shall be responsible to the Council for the administration of all City affairs placed in his charge by or under this Charter or the Ordinances of the City. He shall have the following powers and duties:

(a) He shall see that the laws and ordinances of the City are enforced.

(b) Except as otherwise set forth in this charter, he shall appoint and suspend or remove any City employee. All appointments shall be upon merit and fitness alone. He may authorize any administrative officer who is subject to his direction and supervision to exercise these powers with respect to subordinates in that officer's department, office or agency.

(c) He shall direct and supervise the administration of all departments, offices and agencies of the City, except as otherwise provided by this charter or by law. He may delegate administrative and ministerial functions of his office to personnel supervised and controlled by him, but despite such delegation, the responsibility for the proper and effective administration of the City remains always with the City Manager and none other.

(d) He shall see that all terms and conditions imposed in favor of the City or its inhabitants in any contract or franchise are faithfully kept and performed; and upon knowledge of any violation thereof to report the same to the City Attorney, who is hereby required to take such proceedings as may be necessary to enforce the same.

(e) He shall attend all meetings of the Council when requested by it, with the right to take part in its discussions but shall have no vote.

(f) He shall recommend to the council for adoption such measures as he may deem necessary or expedient.

(g) He shall submit to the Council and make available to the public a complete report on the finances and administrative activities of the City as of the end of each fiscal year. He shall make such other reports as the Council may require concerning the operations of City departments, offices and agencies subject to his direction and supervision.

(h) On or before the third Monday in November in each year he shall furnish to the Council estimates in writing of the probable expense to be incurred in the several departments of the City for the ensuing fiscal year, specifying in detail probable expenditures, including a statement of the salaries of all administrative officers and employees and certify the amount of money to be raised by taxation during the ensuing fiscal year to make payment of interest, sinking fund and principal of bonded indebtedness and also the estimated amount of revenue from all sources other than tax levy. At the same time or on such later date in each year as shall be fixed by the Council, he shall prepare and present to the Council his annual budget for the ensuing fiscal year, which shall include interest and sinking fund on the bonded debt. The budget so prepared shall be in such detail as to the aggregate sum and the items thereof allowed to each department, office, board or commission as he may deem advisable except such as are fixed by law.

(i) He shall perform such other administrative duties as may be prescribed by the charter or required of him by the Council. (1920; 1975)

ARTICLE V

ADMINISTRATIVE DEPARTMENTS

(Ed. Note: In the original 1909 charter, Article V was titled "Executive and Administrative Departments". It identified five departments by name and provided that each commissioner should have charge of one of those departments. The 1920 amendments specifically repealed the provisions assigning the commissioners to Departments but left the designation of the five departments intact. The 1977 amendment attempted to eliminate the apparently conflicting and archaic provisions and to establish a system which will permit necessary flexibility in organizing the City's administrative structure and pinpointing responsibility for the operation.)

25. Creation of Departments - By ordinance the City Council may establish departments, divisions, offices or agencies in addition to those created by this charter and may prescribe the functions of all departments, offices and agencies, except that no function assigned by this charter to a particular department, office or agency may be discontinued or, unless this charter specifically so provides, assigned to any other. Such departments, divisions, offices or agencies may include but not be limited to police, fire and health. (1977)

26. Direction by the City Manager - All departments, divisions, offices and agencies under the direction and supervision of the City Manager shall be administered by an administrative officer appointed by and subject to the direction and supervision of the City Manager. With the consent of Council, the Manager may serve as the head of one or more such departments, offices or agencies or may appoint one person as the head of two or more of them. (1977)

(Sections 27 through 29 inclusive, Repealed, see Ed. Note above)

ARTICLE VI

UTILITIES

(Ed. Note: Article VI, including Sections 30 through 34, as originally adopted in the 1909 charter, referred only to Water and Water Works. In 1925 the City acquired the electrical generation and transmission systems serving the City. In 1929 the City developed its own gas distribution system. In 1939, the people of the City adopted a charter provision numbered 79(a) which established a Public Utilities Department consisting of the Division of Water and Water Works, the Division of Electric Light and Power, and the Division of Gas and "any other public utility acquired by the City". In 1948 the Wastewater Division, then known as the Sewer Division, was created as yet another division of the Department of Utilities. The 1977 amendment to the charter attempted to draw all these divergent provisions together into one location.)

30. *Definitions* - For the purposes of this Article the term "Utility" shall mean the acquisition, erection, construction, operation or maintenance by the City of water systems, wastewater systems, electric light and power systems, gas systems and such other systems designated by Council which are necessary for the citizens and owned by the citizens of the City of Colorado Springs. (1977)

31. *General Powers* - The City shall have and exercise with regard to utilities, all municipal powers, including without limitation, all powers now existing and which may hereafter be provided by the Constitution and laws of the State of Colorado. (1977)

32. *Department of Utilities - Accounting - Reserves*

(a) The City Council shall serve as the Board of Directors for the Department of Utilities. The Department of Utilities shall include the Division of Water and Water Works, the Division of Waste Water, the Division of Electric Production, the Division of Electric Transmission, the Division of Gas and such other utilities assigned to the Department of Utilities by Council. Each of said Divisions shall be administered as an entity, and its accounts shall be kept separate from the accounts of any other division. The funds of the Department of Utilities shall be kept separate from the funds of all other departments of the City.

(b) The net earnings of the Department of Utilities shall be appropriated for the necessary requirements of any of its Divisions, or of the Department as a whole, and any remaining surplus may be appropriated to the general revenues of the City by the City Council in its Annual Budget and Appropriation Ordinance.

(c) Adequate reserves for the replacement of obsolescent or depreciated property shall be provided annually in the accounts and budgets of the several Divisions of the Department of Utilities in accordance with the Uniform Classifications of accounts as now or hereafter adopted by the Public Utilities Commission of the State of Colorado. All such reserves not utilized for the replacement of obsolescent or depreciated property, or for additions or betterments to

the Plant or equipment of the several Divisions of the Department shall be funded, and such funded reserves shall not be appropriated for any other use than the replacement of obsolescent or depreciated property, or for addition or betterments to the physical property of the Department or for the payment of principal bonds of the Department.

(d) Nothing herein shall affect the requirements of any existing bond ordinance or the obligations of the City with reference to any outstanding bonds.

(e) The Council shall cause to be printed annually for public distribution a report showing all costs of maintenance, extension and improvements; all operating expenses of every description; the amount set aside for sinking fund purposes; the value of any utility service given without charge; allowance for interest, depreciation and insurance, and estimates of the amounts of taxes that would be chargeable against such property if owned by a private corporation. (1939; 1977; 1985)

33. *Water Rights* - The City shall have the authority to buy, exchange, augment, lease, own and control water and water rights. (1977; 1985)

34. *Emergency Warrants* - If at any time since the passage of the last annual appropriation ordinance the monies appropriated and available for the Department of Utilities shall be insufficient in the judgment of the Council to meet any emergency in the Department, the Council may upon passage of a resolution declaring an emergency cause warrants to be issued payable out of the receipts of the Department of Utilities for the ensuing year, including the proceeds from the sale of bonds. Said warrants and monies realized thereon shall be applied only to meeting the emergency so declared. (1909; 1977)

34.1 *Utility Rates* - The Council shall by ordinance or resolution establish rates, rules and regulations and extension policies for the services provided by the Department of Utilities. (1909; 1977)

ARTICLE VII

FINANCE

(Amended April 5, 1977)

35. *Fiscal Year* - The fiscal year of the City shall commence on the first day of January and end on the last day of December of each year. (1909; 1977)

36. *Public Monies* - (a) The City Manager shall have the direct control of the revenues of the City except as otherwise provided by this charter or by ordinances.

(b) The Council shall by ordinance provide a system for the collection, custody and disbursement of all public monies not inconsistent with the provisions of this Charter. (1909; 1977)

37. *Budget* - (a) The Council shall, on receipt of the budget,¹ adopt the budget with or without amendment. In amending the budget, the Council may add or increase programs or amounts and may delete or decrease any programs or amounts, except amounts required by law or for debt service on general obligation bonds or for estimated cash deficit; provided, however, that no amendment to the budget shall increase the authorized expenditures to an amount greater than the total of estimated income.

(b) In adopting the budget the Council shall also estimate and declare the amount of money necessary to be raised by tax levy. The estimate shall take into account the amounts available from other sources to meet the expenses of the City for the ensuing fiscal year. The budget and estimate as finally adopted shall be signed by the Mayor and City Clerk and filed with the Controller. (1909; 1977) (Ed. Note: Formerly Section 41.)

38. *Levy* - (a) Upon said estimate, the Council shall forthwith proceed to make by ordinance the proper levy in mills upon each dollar of the assessed valuation of all taxable property within the City, such levy representing the amount of taxes for City purposes necessary to provide for payment during the ensuing fiscal year of all properly authorized demands upon the Treasurer.² The Council shall thereupon cause the total levy to be certified by the Clerk to the County Assessor who shall extend the same upon the tax list of the current year in a separate column entitled "The City of Colorado Springs Taxes", and shall include said City taxes in his general warrant to the County Treasurer for collection. The levy shall never exceed twenty mills on the dollar for all general City purposes upon the total assessed valuation of said taxable property within the City. The foregoing limitation of twenty mills shall not apply to taxes levied by the Council for the payment of any interest, sinking fund or principal of any bonded indebtedness of the City now existing or hereafter created, nor for payment of interest, sinking fund or principal of the indebtedness of any town or city which may hereafter be incorporated with or annexed to the City; nor to special assessments for local improvements.

(b) If the Council fails in any year to make the tax levy as above provided, then the rate last fixed shall be the rate fixed for the ensuing fiscal year.

(c) The amount required to make payment of any interest, sinking fund or principal of bonded indebtedness shall always be included in and met by tax levy, except as otherwise provided for in this Charter. (1909; 1977) (Ed. Note: Formerly Section 42.)

39. *Appropriations* - Upon the basis of the budget as adopted and filed, the several sums shall forthwith be appropriated by ordinance to the several purposes therein named for the ensuing fiscal year. Said ordinance shall be adopted not later than the thirty-first day of December in each year, and shall be entitled "The Annual Appropriation Ordinance". (1909; 1977) (Ed. Note: Formerly Section 43.)

40. *No Liability Without Appropriation* - Neither the Council nor any administrative officer or employee of the City shall have authority to make any contract involving the expenditure of public money, or impose upon the City any liability to pay

1. Ed. Note: It is the City Manager's responsibility to draft and submit the annual budget. See Section 24(h).

money, unless and until a definite amount of money shall have been appropriated for the liquidation of all pecuniary liability of the City under such contract or in consequence thereof to mature during the period covered by the appropriation. Such contract shall be ab initio null and void as to the City for any other or further liability, provided, first that nothing herein contained shall prevent the Council from providing for payment of any expense, the necessity of which is caused by any casualty, accident or unforeseen contingency arising after the passage of the annual appropriation ordinance; and, second, that the provisions of this Section shall not apply to or limit the authority conferred in relation to bonded indebtedness, nor for monies to be collected by special assessments for local improvements. (1909; 1977) (Ed. Note: Formerly Section 44.)

41. *Collection of Taxes* - (a) Unless otherwise provided by ordinance, the County Treasurer shall collect City ad valorem taxes in the same manner and at the same time as general ad valorem taxes are collected, and all laws of this State for the assessment of property and the levy and collection of general ad valorem taxes, including laws from the sale of property for taxes and the redemption of the same, shall apply and have as full effect in respect of taxes for the City as of such general ad valorem taxes, except as modified by this charter.

(b) All laws of this State for the assessment of property and the levy and collection of ad valorem taxes, sale of property for taxes, and the redemption of the same shall apply and have full force and effect in respect to taxes for the City as to such general ad valorem taxes, except as modified pursuant to this charter. (1909; 1977) (Ed. Note: Formerly Section 46.)

42. *Limitation on City Indebtedness* - (a) No bonds or other evidences of indebtedness, payable in whole or in part from the proceeds of ad valorem property taxes or to which the full faith and credit of the City are pledged in writing or otherwise, shall be issued, except in pursuance of an ordinance authorizing the same, and unless the question of the issuance of the bonds shall at any special or general election be submitted to a vote of the qualified electors of the City and approved by a majority of those voting on the question. However, the Council pursuant to ordinance and without election may:

(1) Issue local improvement district bonds.

(2) Borrow money or issue bonds for the purpose of acquiring, constructing, extending or improving water, electric, gas, sewer or other public utilities or income-producing projects; provided, further, that said borrowing shall be repaid and said bonds shall be made payable solely out of the net revenue derived from the operation of the utility, utilities or other income-producing projects, or any or all thereof. Net revenue shall mean gross revenue less all operation and maintenance expenses of the project for which the money was borrowed or bonds issued.

(b) The City shall not become indebted for any purpose or in any manner to an amount which, including existing indebtedness, shall exceed ten (10%) percent of the assessed valuation of the taxable property within the City as shown by the last preceding assessment for City purposes; provided, however, that in determining the amount of indebtedness, there shall not be included within the computation of indebtedness local improvement district bonds, revenue bonds, or general obligation bonds or other evidences of indebtedness issued for the acquisition, construction, extension or improvement of water facilities or supplies, or both. (1909; 1965; 1977) (Ed. Note: Formerly Section 47.)

43. *Surplus and Deficiency Fund* - Where all outstanding bonds have been paid in a local improvement district, sometimes called public improvement district, and any money remains to the credit of said district, it shall be transferred to a special surplus and deficiency fund, and whenever there is a deficiency in any improvement district to meet payment of outstanding bonds, it shall be paid out of said fund. Whenever a local improvement district, sometimes called public improvement district, has paid and cancelled four-fifths of its bonds outstanding, and for any reason the remaining assessments are not paid in time to take up the final bonds of the district, and there is not sufficient money in said special surplus and deficiency fund, then the City shall pay said bonds when due and reimburse itself by collecting the unpaid assessments due said district.¹ (1961; 1977) (Ed. Note: Formerly Section 47(a)).

(Sections 44 through 48 inclusive Repealed, 1977)

ARTICLE VIII

MUNICIPAL COURT

(Ed. Note: Article VIII formerly dealt with the Department of Public Safety. It provided also for relief funds for Police and Fire Departments and for a Police Court. The function of the relief funds has been superseded by statutory provisions for pension funds and the office of Police Court is totally outmoded.)

49. *Municipal Court* - There shall be a Municipal Court for the City of Colorado Springs. The practice and procedure of said Court shall be as set forth by Colorado Statutes, Colorado Supreme Court Rules, and City ordinances as now existing or hereinafter amended or modified. (1977)

(Sections 50 through 54 inclusive Repealed, 1977)

ARTICLE IX

(Reserved, 1977)

(Ed. Note: This Article formerly dealt with the Department of Public Works and Property.)

1. A similar Denver charter provision was upheld in *Montgomery v. City and County of Denver*, 102 Colo. 427, 80 P.2d 434 (1938); *Fladung v. City of Boulder*, 165 Colo. 244, 438 P.2d 688 (1968).

ARTICLE X

BOARDS AND COMMISSIONS

(Ed. Note: Article X formerly dealt with the Department of Health and Sanitation. A 1949 amendment made possible the creation and operation of a joint City-County Health Department, which was created in 1950 and continued in operation until 1976 when a County Health Department having county-wide jurisdiction was created. At this writing the City contracts with the County Health Department to provide enforcement services for Housing Codes and similar health and sanitation matters which are of only city-wide application.)

55. *Boards and Commissions* - (a) In addition to those Boards and Commissions existing at the time of this charter, the Council may create any boards and commissions including advisory and appeal boards. All boards and commissions shall be created by ordinance, which shall prescribe the powers and duties delegated by Council. Initial appointments by the Council to any board or commission shall specify the term of office of each member in order to achieve overlapping terms. All members shall be subject to removal by the Council. Council shall also make appointment to fill vacancies for unexpired terms. Each board and commission shall elect its own chairman and vice-chairman from among its members. Each board and commission shall operate in accordance with its own rules of procedure, except as otherwise directed by Council.

(b) The Council may increase, reduce, or change any or all of the powers, duties and procedures of any boards or commissions existing at the time of this charter, or created by ordinances thereafter.

(c) Any board or commission existing at the time of this charter or created under this provision which is not required by this charter or law may be abolished by Council. (1977)

(Sections 56, 57 and 60 repealed, 1949)

(Sections 58, 59 and 61 repealed, 1977)

ARTICLE XI

PUBLIC LIBRARY

(Ed. Note: Article XI was formerly titled "Commissions and Boards" and dealt with the Park Commission and the Public Library. In 1947 the Charter was amended to permit the park system to become a department of the City, and a 1961 amendment took advantage of the 1947 Library Law to permit the Public Library to become an autonomous public agency with independent taxing power. Therefore in 1977 no need existed for either provision.)

62. "The 1947 Library Law" of the State of Colorado as now existing or hereinafter amended or modified shall be applicable to public libraries in the City and shall govern the establishment, maintenance and operation of such public libraries. Any limitation of a mill levy to establish, maintain and operate such public libraries as set forth in "The 1947 Library Law" shall not be applicable to the City and levy of tax for establishment, maintenance and operation of public libraries in the City shall be by ordinance. (1909; 1961; 1977)

ARTICLE XII

FRANCHISES AND LICENSES

(Ed. Note: In 1909 there were at least two franchises in existence in the City -transportation (street railway), and light and power. In 1925 the outstanding light and power franchise terminated and the City acquired all assets of the company and has owned and operated the system since that time. In 1971 the transportation company voluntarily relinquished its franchise and the City acquired all its assets. An excellent opportunity was thus provided to re-write all existing franchise provisions of the Charter. No attempt has been made in this Article to maintain a numbering system consistent with the 1909 numbering.)

63. *Definitions* - (a) Franchise: For the purpose of this charter, and the ordinances of the City of Colorado Springs, the term "franchise" shall mean a special right or privilege granted by vote of the electorate of the City of Colorado Springs to any person, firm or corporation to erect, construct, operate, carry on, or maintain an electric power plant, communication system, gas plant or system, rail or mass transit system, or any other business activity affective of the public interest which permanently occupies and obstructs the public streets, rights-of-way, alleys or properties, together with such other uses as are determined by ordinance to be of such a public concern that want of regulation and control will injuriously affect the public or its general interest.

(b) License: For the purposes of this charter, and the ordinances of the City of Colorado Springs, the term "license" shall mean a temporary or revocable permission granted to all other activities not a franchise. (1977)

64. *General Powers* - The City shall have and exercise with regard to all franchises, all municipal powers, including without limitation, all powers now existing and which may hereafter be provided by the Constitution and Statutes. In every franchise the right of the City to construct, lease, purchase, acquire, condemn or operate any public utility, work, or way, shall be expressly reserved. Except as otherwise provided by the Constitution or this charter, all powers concerning the method of granting, amending, revoking or otherwise dealing in franchises shall be exercised by the Council. (1977)

65. *Granting of Franchises* - (a) No franchise shall be granted except upon approval by a majority of the electors voting thereon.¹

1. Colo. Const. Art. XX § 4.

(b) Except when the terms, fees, construction, conditions or any other matters relating to the granting of franchises are set by the vote of the electorate, the Council shall establish by ordinance the terms, fees, compensation, conditions and any other matters relating to the granting of franchises. (1977)

66. *Tax* - The City shall have the right to license or tax the equipment of any franchise. The license or tax shall be exclusive of and in addition to all other lawful taxes upon the property of the holder thereof. (1909; 1977) (Ed. Note: Formerly Section 68.)

67. *No Franchise Leased, Exception* - No franchise granted by the City shall ever be leased, assigned or otherwise alienated without express consent of the City, and no dealing with the lessee or assignee on the part of the City to require the performance of any act or payment of any compensation by the lessee or assignee shall be deemed to operate as such consent. (1909; 1977) (Ed. Note: Formerly Section 74.)

68. *Term Not Longer Than 25 Years* - No franchise, lease or right to use the property of the City shall be granted by the City, except as in this charter provided, for a longer period than 25 years. (1909; 1977) (Ed. Note: Formerly Section 80.)

69. *No Exclusive Franchise - Renewal* - No exclusive franchise shall ever be granted, and no franchise shall be renewed before one year prior to its expiration. (1909) (Ed. Note: Formerly Section 73.)

70. *City May Purchase* - Every grant of franchise shall provide that the City may purchase and take over the property of the holder in whole or in part. (1909; 1977) (Ed. Note: Formerly Section 81.)

71. *Franchise Records* - The City Clerk shall keep an indexed Franchise Record in which shall be transcribed copies of all franchises heretofore and hereafter granted. The index shall give the name of the grantee and any assignees. The Franchise Record shall include a comprehensive and convenient reference to all actions at law affecting the same, and copies of all annual reports and such other matters of information and public interest as the Council may, from time to time, require. (1909; 1977) (Ed. Note: Formerly Section 78.)

72. *License or Temporary Permits* - The Council may grant a temporary permit, a license or an easement at any time, in, on, above, through or under any street, alley or public place, provided such license, temporary permit or easement shall be revocable at any time, and that such right to revoke shall be expressly reserved in every temporary permit, license or easement which may be granted hereunder. (1909; 1977) (Ed. Note: Formerly Section 83.)

(Sections 73 through 83 inclusive, Repealed, 1977)

ARTICLE XIII

ELECTIONS¹

(Ed. Note: Article XIII formerly set forth detailed provisions which regulated municipal elections within the City. These included provisions regulating the registration of voters, the form of nomination petitions, the form of ballots, and the use of carriages or other vehicles on election day. The 1979 amendment eliminates such outmoded provisions, and allows Council to regulate municipal election matters by ordinance.)

84. *Laws Governing Elections* - General and special municipal elections shall be governed by this Charter and such ordinances as Council may prescribe not inconsistent herewith. The Council may, by ordinance, establish the method for the registration of electors; the number, qualification and compensation for election judges and clerks; the boundaries of election precincts; the districting of the City for establishing districts, and such other matters relating to elections. Elections concerning repeal or amendment to this Charter shall be governed by this Charter, Colorado statutes, and such ordinance as the Council may prescribe not inconsistent therewith. (1979)

85. *Municipal Elections* - A general municipal election shall be held in the City on the first Tuesday in April in each odd-numbered year. Special elections may be held on any Tuesday designated by the City Council, except as limited in the Colorado Municipal Election Law as now existing or hereafter amended. (1979)

86. *Non-Partisan Elections* - All municipal elections shall be nonpartisan. In accepting a nomination, a candidate shall by Affidavit, filed with the City Clerk, attest to the fact that he has not become a candidate as the nominee or representative of or because of any promised support from any political party, committee, convention or organization representing or acting for any political party. (1979)

87. *Disclosure of Private Interests by City Councilmen and Candidates for Council* - The City Council shall provide by Ordinance for the Disclosure of Substantial Private Business Interests by candidates for and members of the City Council. (1979)

88. *Campaign Disclosures* - The City Council shall provide by Ordinance for the Disclosure of Election Campaign Expenditures and Election Campaign Contributions. (1979)

89. *Names on Ballots* - The names of all candidates for each elective office shall be printed on the ballots in a random order which shall be determined by the City Clerk. (1979)

(Sections 90 through 111 inclusive, Repealed, 1979)

1. Power to regulate municipal elections: Colo. Const. Art. XX § 6(d).

ARTICLE XIV

RECALL, INITIATIVE AND REFERENDUM¹

(Ed. Note: Former Article XIV dealt solely with the recall of elective officers. The initiative provisions were set forth in former Article XV, with former Article XVI dealing with the referendum. The 1979 amendment repealed Articles XV and XVI, and combined the recall, initiative and referendum provisions under Article XIV. The amendment also substantially revised the recall, initiative and referendum sections so as to ensure their compliance with the Colorado Constitution. Because the revision was so extensive, no attempt was made to conform to the former numbering system and no reference is made to the number of former sections dealing with similar provisions.)

112. *General Authority* -

(a) *Recall*. Any officer having held his elective office for at least six (6) consecutive months may be removed by both petition and vote of the electors of the City. Electors who are entitled to sign the petition and to vote in the recall election are those persons who are entitled to vote for a successor to the incumbent sought to be recalled.

(b) *Initiative*. The electors of the City shall have power to propose ordinances to the Council, and if the Council fails to adopt an ordinance so proposed, to adopt or reject such ordinance at a City election.

(c) *Referendum*. The electors of the City shall have power to recommend reconsideration by the Council of any adopted ordinance and, if the Council fails to repeal an ordinance so reconsidered, to approve or reject such ordinance at a City election, provided that such power shall not extend to ordinances making tax levy or appropriation or establishing special improvement districts.²

(d) *Repeal of Initiated Ordinance*. The Council may, on its own motion, submit any ordinance adopted by the initiative to a vote of the electors at any succeeding general municipal election for repeal or amendment of the initiated ordinance. An ordinance so adopted by a vote of the electors cannot be repealed or amended except by a vote of the electors.³

(e) *Reference by the Council*. Subject to the provisions of Section 112(d), the Council may, of its own motion, submit to electoral vote for adoption or rejection at a general or special municipal election any proposed ordinance or measure in the same manner and with the same force and effect as is provided for initiated ordinances.⁴

(f) *Further Regulations*. The Council may, by ordinance, make such further regulations as it may deem necessary to carry out the provisions of the initiative and referendum powers, except as limited by this Charter and the Colorado Constitution. (1979; 1985)

1. Cf., Colo. Const. Art. V, Art. XXI.

2. A reservation of power in the people of a city by its charter providing for referendum must be liberally construed in favor of the people's right to exercise such power. Any limitations on the referendum power must be strictly construed and should not be extended either by implication or inference. *Brooks v. Zabka*, 168 Colo. 265, 450 P.2d 653 (1969).

3. *Webb v. Dorlac*, 75 Colo. 49, 224 P.220 (1924).

4. *Webb v. Dorlac*, *supra*.

113. *Commencement of Proceedings; Petitioner's Committee; Affidavit* - Any three (3) electors may commence recall, initiative or referendum proceedings by filing with the City Clerk an Affidavit stating they will constitute a Petitioner's Committee and be responsible for circulating the petition and filing it in proper form, stating their names and addresses and specifying the address to which all notices to the Committee are to be sent, and setting out either:

(a) The name of the officer or officers sought to be removed and a general statement in not more than two hundred (200) words on the ground or grounds upon which removal is sought; or

(b) The full text of the proposed initiative ordinance; or

(c) The full text of the ordinance is sought to be reconsidered.

As soon as possible after the Affidavit of the Petitioner's Committee is filed, the Clerk shall issue the appropriate petition blanks to the Petitioner's Committee. (1979; 1985)

114. *Petitions.*

(a) *Form and Content.*

(1) *Uniform Petition Blanks:* The City Clerk shall issue appropriate petition blanks consisting of sheets having such general form printed at the top as designated by the City Clerk, for either recall, initiative or referendum. The Clerk, upon issuing such forms to any persons, shall enter in a permanent record to be kept in his office for this purpose the name of the persons to whom issued, the date of such issuance and the number of such forms issued, and shall certify on each of said forms under his seal, the name of at least one of the persons to whom issued and the date of the issuance. No referendum, initiative or recall petition shall be filed unless it shall bear such Certificate of the Clerk. The uniform petition blanks shall be furnished without charge.

(2) *Statement of Purpose:*

(i) *Recall* - The petition shall contain a general statement, in not more than two hundred (200) words, of the ground or grounds on which such recall is sought, which statement is intended for the information of the electors, and the electors shall be the sole and exclusive judges of the legality, reasonableness and sufficiency of such ground or grounds assigned for such recall, and said ground or grounds shall not be open to review.

(ii) *Initiative* - The petition shall contain or have attached thereto throughout its circulation the full text of the ordinance proposed. The City Council shall by ordinance prescribe the method for setting the title of the initiated ordinance.

(iii) *Referendum* - The petition shall contain or have attached throughout its circulation the full text of the ordinance sought to be referred to.

(3) *Signatures* - Each signer must sign his own proper signature, the date of signing said petition, and his place of residence, giving his street and number. The signatures to the petition need not all be on one sheet of paper. The petition may be circulated and signed in sections with each section consisting of one or more sheets, provided that each section shall contain a full and accurate copy of the title and text of the petition. All sheets and sections shall be filed as one instrument.

(b) *Affidavit of Circulator* - To each section of a petition, which section may consist of one or more sheets, shall be attached an Affidavit by the Circulator, signed under oath before a Notary Public, stating that he personally circulated the paper, the number of signatures thereon, that all the signatures were affixed in his presence, that to the best of his knowledge each signature appended to the paper is the genuine signature of the person whose name it purports to be, that each signer had an opportunity before signing to read the full text of the matter proposed or sought to be reconsidered, and that to the best of his knowledge each signer is a elector of the City of Colorado Springs.

Such petition so verified shall be prima facie evidence that the signatures thereon are genuine and true and that the persons signing the same are electors.

(c) *Number of Signatures* -

(1) *Recall* - The petition shall be signed by electors entitled to vote for a successor of the incumbent sought to be recalled equal in number to twenty-five percent (25%) of the entire vote cast at the last preceding election for all candidates for the position which the incumbent sought to be recalled occupies.

(2) *Referendum* - The petition must be signed by electors of the City equal in number to at least ten percent (10%) of the last preceding gubernatorial vote in the City of Colorado Springs as the City boundaries existed on the date of such gubernatorial vote.

(3) *Initiative* - The petition must be signed by electors of the City equal in number to at least fifteen percent (15%) of the last preceding gubernatorial vote in the City of Colorado Springs as the City boundaries existed on the date of such gubernatorial vote.

(d) *Time for Filing Petitions* - Days shall be calendar days starting the day following the date of filing of the Affidavit and including the last date only. Holidays and weekends shall be counted; however, when the last date falls on a day when the City Clerk's office is closed, then the next following business day shall be the last day for filing.

(1) *Recall* - All petitions shall be returned and filed with the Clerk within sixty (60) days from the issuance of such blank petition forms.

(2) *Referendum* - Within ten (10) days of final reading by the City Council of the ordinance sought to be reconsidered, Petitioners' Committee must file its Affidavit of Intent; and, within thirty (30) days from the date of final reading, the completed petition must be filed.

(3) *Initiative* - All petitions shall be returned and filed with the Clerk within one hundred eighty (180) days from the issuance of such blank petition forms. (1979; 1985)

115. *Procedure After Filing* -

Certificate of Clerk; Amendment - Within thirty (30) days after the petition is filed, the City Clerk shall examine the petition to determine whether the petition is signed by the requisite number of electors, and shall attach thereto his Certificate showing the result of such examination. If his Certificate shows the petition to be insufficient, he shall send to the Petitioner's Committee by registered mail, within said thirty (30) days, a copy of the Certificate, which shall specify the particulars wherein it is defective; and the petition may be amended at any time within thirty (30) days from the filing of the Certificate. The Clerk shall, within thirty (30) days after such amendment, make like examination of the amended petition and attach thereto his Certificate of the result. If still insufficient, or if no amendment is made, he shall return the petition to the Petitioners' Committee without prejudice to the filing of a new petition for the same purpose.

If a petition or amended petition is certified sufficient, the Clerk shall promptly present his Certificate to the Council and the Certificate shall then be a final determination as to the sufficiency of the petition. (1979; 1985)

116. *Referendum Petitions; Suspension of Effect of Ordinance* -

No ordinance passed by the Council shall go into effect except as provided in Section 14, and except emergency ordinances or ordinances making or setting appropriations. Upon the filing of the Petitioners' Committee Affidavit of intention to file a petition in referendum, the ordinance sought to be reconsidered shall be suspended from taking effect. Such suspension shall terminate when:

- (1) The Petitioners' Committee fails to file a completed petition within the thirty (30) days from the date of the final reading, or
- (2) There is a final determination of insufficiency of the petition, or
- (3) The Petitioners' Committee withdraws the petition, or
- (4) The Council repeals the ordinance, or
- (5) Upon a vote by the electors wherein the referred ordinance prevails. (1979; 1985)

117. *Action on Petitions -*

(a) *Action by Council -*

(1) *Recall* - The Council, if the officer sought to be removed does not resign within five (5) days after the attachment of the Clerk's Certificate that a sufficient petition has been filed, shall order an election to be held on a Tuesday fixed by it, not less than thirty (30) nor more than sixty (60) days from the date of the Clerk's Certificate that a sufficient petition is filed; provided, however, that if any other municipal election is to occur within ninety (90) days from the date of the Clerk's Certificate, the Council may, in its discretion, postpone the holding of the recall election to the date of such other municipal election. If a vacancy occurs in said office after the order for the recall election, the election shall proceed as provided in this Article. The incumbent shall continue to perform the duties of his office until the election. If then not recalled, he shall continue in office. If then recalled, he shall be deemed removed upon the qualification of his successor, who shall hold office during the unexpired term. If the successor fails to qualify within ten (10) days after receiving notification of his election, the incumbent shall thereupon be deemed removed and the office vacant. The method of removal by recall herein provided for shall be cumulative and additional to any method otherwise provided in this Charter.

(2) *Initiative* - If the petition contains a request that said proposed ordinance be submitted to a vote of the people, if not passed by the Council, the Council shall within twenty (20) days after the attachment of the Clerk's Certificate of Sufficiency to the accompanying petition either:

(i) Pass said ordinance without alteration (subject to the provisions of Section 112(e) of this Charter) or

(ii) Call a special election within ninety (90) days unless a general municipal election is fixed within said ninety (90) days; and at such special or general municipal election said proposed ordinance shall be submitted without alteration to the vote of the electors of the City.

(3) *Referendum* - When a referendum petition has been finally determined sufficient, it shall be the duty of the Council to reconsider such ordinance, and if the same be not entirely repealed, the Council shall submit the ordinance to a vote of the electors of the City, at a special municipal election to be called for that purpose within ninety (90) days of receipt of the Clerk's Certificate, unless a general municipal election is fixed within said ninety (90) days.

(b) *Submission to Voters; Election -*

(1) *Recall* - The nomination of other candidates, the publication of notice of such removal election, and the conduct of the same shall all

be in accord with the provisions of Article XIII hereof, relating to elections.

There shall be printed on the official ballot, as to every officer whose recall is to be voted on, the words, "Shall (name of person against whom the recall petition is filed) be recalled from the office of Councilman, Mayor?" Following such question shall be the words, "Yes" or "No", on separate lines, with a blank space at the right of each, in which the voter shall indicate his vote for or against such recall. Below the question shall be printed in not more than 200 words, the reasons set forth in the petition for demanding his recall, and in not more than 300 words there shall also be printed, if desired by him, the officer's justification of his course in office.

On such ballots, under each question, there shall also be printed the names of those persons who have been nominated as candidates to succeed the person sought to be recalled; but no vote cast shall be counted for any candidate for such office, unless the voter also voted for or against the recall of such person sought to be recalled from said office. The name of the person against whom the petition is filed shall not appear on the ballot as a candidate for the office. Where more than one District Councilman is subject to the recall election, the candidates for a District Councilman's position shall be listed below that District Councilman subject to the recall. Where more than one Councilman at large is subject to the recall election, the candidates seeking election shall run at large and not in place of any particular Councilman whose removal is being sought.

(2) Initiative

(i) Publication of Initiative Ordinance - Whenever any proposed ordinance is required by this Charter to be submitted to the voters of the City at an election, notice of such election shall be in accordance with Article XIII of this Charter, which notice shall include the full text of the initiated ordinance, and if adopted by the electors of the City, such ordinance shall be published within ten (10) days after such adoption, and shall become effective immediately upon publication.

(ii) Several Ordinances at One Election - Any number of proposed ordinances may be voted on at the same election, in accordance with the provisions of this Article.

(iii) Ballots - The ballots used when voting upon each proposed ordinance shall contain the words, "For the Initiated Ordinance" and "Against the Initiated Ordinance" and the ballot shall contain the title of the Ordinance as it was circulated in the petition.

(3) *Referendum* -

(i) *Publication* - Notice of election shall be in accordance with Article XIII of this Charter, which notice shall include the full text of the ordinance or only the title thereof, as Council may decide.

(ii) *Ballot* - The ballots used when voting upon each referred ordinance shall contain the words, "For the Ordinance" and "Against the Ordinance" and the ballot shall contain the title of the Ordinance as it was circulated in the petition. (1979; 1985)

118. *Results of Election* -

(a) *Recall* - If a majority of those voting on said question of the recall of any incumbent from his office shall vote "No", the incumbent shall continue in his office; if a majority shall vote "Yes", the incumbent shall thereupon be deemed removed from his office.

If a District Councilman or Mayor shall be removed, then the candidate who has received the highest number of votes for that district or Mayor's position thereby vacated shall be declared elected for the remainder of the incumbent's term. In the event of the removal from office of only one Councilman at large where other Councilmen at large were also subject to the recall election, the candidate who receives the highest number of votes shall be thereby elected to the office vacated for the unexpired term of the removed Councilman. In the event of the removal of more than one Councilman at large, the candidate who receives the highest number of votes shall be thereby elected to the office of Councilman for the longest unexpired term of the Councilman removed. The candidate who receives the next highest number of votes shall be thereby elected to the office of Councilman at large for the next longest unexpired term. Candidates shall thereafter be elected to the remaining unexpired terms of the removed Councilmen. In case the person who received the highest number of votes shall fail to qualify within ten (10) days after the issuance of a Certificate of election, the office shall be deemed vacant, and shall be filled according to law.

No person who has been removed from an office by recall, or who has resigned from such office while recall proceedings were pending against him shall be appointed to any City office, board, position of responsibility, or employment within one year after such removal by recall or resignation.

(b) *Initiative* - If a majority of the electors voting on a proposed initiative ordinance vote in its favor, it shall be considered adopted upon certification of the election results.

(c) *Referendum* - If a majority of the electors voting on a referred ordinance vote in favor of the ordinance, it shall then go into effect upon certification of the election results.

(d) If conflicting ordinances, proposed either by initiative and/or referendum, are approved at the same election, the one receiving the greatest number of affirmative votes shall prevail to the extent of such conflict.¹ (1979; 1985)

145.A. *Removal of Striking Employees -*

(a) It shall be unlawful for any employee of the City of Colorado Springs to participate in or engage in a strike or any action to withhold service from the City. In the event of such strike or action any employee who participates or engages therein shall be disciplined. Such discipline shall be discharge; however, for any such employee who has acted in violation of this section as a result of coercion or threat of serious harm, such discipline shall be suspension without pay. Such disciplinary action may be appealed only under such rules as the City Manager shall establish. Neither Council nor any administrative officer of the City shall grant amnesty to any employee in violation of this section. (1979; 1980)

(b) Appointing authorities shall cause timely hearings to be held for any employees charged hereunder. If the City Manager or other appointing authority,

after a hearing, determines that the charges are supported by the evidence submitted, and that the employee willfully engaged in the strike or action, said appointing authority shall dismiss the employee involved, and said person shall not be reinstated or returned to the City of Colorado Springs employment except as a new employee who is employed in accordance with the regular employment practices of the City in effect at that time for the particular position of employment.

(c) No legislative or administrative officer, board, city councilman, or mayor of the City, elected or appointed, shall have the power to grant amnesty to any person charged with a violation of any of the provisions of this section.

(d) Every employee of the City of Colorado Springs employed under the provisions of this Charter on the effective date of this section, and each person employed pursuant to the provisions of this Charter and the ordinances of the City on or after the effective date of this section, shall be furnished a copy and apprised of the provisions of this section and shall make under oath and file in the office of the Director of Personnel the following declaration: "I hereby acknowledge receipt of a copy of the provisions of Section 145.A. of the Charter of the City of Colorado Springs and hereby declare that during the term of my employment with said City I shall neither instigate, participate in or afford leadership to a strike against said City or engage in any concerted action to withhold my services from the City."

(e) In the event of any strike or concerted action to withhold service from the City of Colorado Springs by an organization or association of employees of the City, by an employee organization, or by employees represented by any such organization or association, the City Council is hereby prohibited from granting any improvement in wages, hours, working conditions or other benefits beyond those in effect or last offered to the striking organization or employees by the City prior to the commencement of such strike or concerted activity, and is prohibited from considering the granting of any such improvement beyond that which may have been last offered by the City prior to the strike or concerted activity until the commencement of proceedings to establish wages and benefits for the next subsequent calendar year at the time regularly scheduled for commencement under adopted City policy governing such proceedings.

(f) Notwithstanding any other provision of this Charter, a dismissal imposed pursuant to this section shall not be appealable to the Civil Service Commission, City Manager or the City Council. (1979)

146. *City Attorney, Duties* - The City Attorney shall conduct all cases in court in this state wherein the City shall be party plaintiff or defendant, or a party in interest. He shall be the legal adviser of the Mayor, Council, Commissions, and Heads of Departments in relation to their duties, and shall perform such other duties, not inconsistent herewith, as may be required of him by ordinance. He shall receive such salary as the Council by ordinance shall prescribe. (1909; 1979)

147. *Assistants* -

(a) The City Attorney, with the consent of the Council, may employ assistants, who shall receive such salary as the Council by ordinance shall prescribe.

(b) The Council may also, at any time, employ other counsel, to take charge of any litigation or to assist the Attorney, whose compensation shall be fixed by the Council at the time of employment. (1909; 1979)

ARTICLE XVIII

CIVIL SERVICE

148. *Commission* -

(a) There is hereby established a Civil Service Commission consisting of five (5) members who shall serve without compensation.

(b) The Council first elected after the adoption of this Article, as soon as practicable thereafter, shall appoint two (2) members to said Commission to serve for one (1) year, another two (2) members to serve for two (2) years, and one member to serve for three (3) years. Thereafter, as the initial terms of such appointments expire, Council shall appoint members whose terms shall be for a period of three (3) years. Members of the Civil Service Commission shall be allowed to be appointed for a second consecutive three-year term, but none thereafter. If a vacancy shall occur in the Commission, it shall be filled by appointment by the Council for the unexpired term. (1909; 1979)

149. *Commission Make Rules* - The commission shall, with the approval of the Council, make such rules and regulations for the proper conduct of its business, as it shall find necessary or expedient. The commission shall, among other things, provide for the classifications of all employments in the police and fire departments for open, competitive and free examinations as to fitness; for an eligible list from which vacancies shall be filled; for a period of probation before employment is made permanent; and for promotion on the basis of merit, experience and record. (1909; 1979)

150. *Council Give Further Powers* - The Council whenever requested by the commission may by ordinance confer upon the commission such other or further rights, duties and privileges as may be necessary adequately to enforce and carry out the principles of civil service.¹ (1909)

150.1 *Continuation* - All persons at the time of the adoption of this section, occupying positions in the classified civil service, shall retain their positions until discharge under the provisions hereof. Discharges from the classified civil service or reductions in grade or compensation, or both, may be made for any cause, not political or religious, which will promote the efficiency of the service; but only in written specifications by the authority making the discharge or reduction; and the person sought to be discharged or reduced shall have notice thereof, together with a copy of the specifications, and shall be allowed a reasonable time for answering the same in writing. A copy of the specifications, notice and answer and the order of discharge or reduction, shall be made a part of the record of the division of the service in which the

discharge or reduction is made, and a copy shall also be filed with the civil service commission. If the person discharged or reduced desires to have such discharge or reduction reviewed by the commission, he may present a sworn petition therefor, whereupon the commission shall examine into the facts at a public hearing, with the right on the part of the person discharged or reduced to appear in person and by counsel, cross-examine such witnesses as may testify against him and produce testimony in his own behalf. If the commission shall find that the person has been wrongfully discharged or reduced he shall be reinstated forthwith. (1921) (Ed. Note: Formerly Section 150.a.)

PART 2 RISK MANAGEMENT

SECTION:

- 2-8-201: Purpose and Intent
- 2-8-202: Duties of Risk Management Division
- 2-8-203: Claims Reserve Fund
- 2-8-204: Compromise or Settlement of Claims
- 2-8-205: Claims Review Board
- 2-8-206: Rules and Regulations
- 2-8-207: Litigation

2-8-201: PURPOSE AND INTENT: The City Council of the City of Colorado Springs hereby recognizes that the general liability and automobile liability insurance policies for the general City departments and some enterprise funds of the general City have been cancelled, and therefore, there is an extraordinary need to address methods to protect the City and its employees against claims brought under the provisions of the Colorado Governmental Immunity Act¹ and arising under Federal law. For purposes of this Part 2, reference to the "City" shall be deemed to include the general City Departments, Utilities Department, Memorial Hospital, all enterprise activities within the City, and any general improvement district formed by the City Council pursuant to the Improvement Districts in Municipalities (1949 Act)² as such now exists or may be amended.

The City Council recognizes the undesirable consequences of uninsured liability of the City, including failure to respond to meritorious claims in a timely fashion, and greater ultimate costs of settlement caused by failure to investigate claims in an orderly and timely manner. The City Council declares, therefore, that the appropriate remedy is to create a reserve fund for purposes of self-insurance of the City to the extent that insurance coverage has not been obtained. The City Council declares that the purpose of this Part 2 is to create a claims reserve fund, provide a mechanism for claims adjustment, investigation, defense, and to authorize the settlement and payment of claims and payment of judgments rendered against the City for such claims or judgments arising out of violation of Federal law or pursuant to any action which lies in tort or could lie in tort regardless of whether that may be the type of cause or action chosen by the claimant. The City Council

finds that, in order to adequately protect the City and carry out these purposes, it is necessary to authorize the Support Services Department to perform these risk management services for the City. The City Council declares that its intent is to explore the availability of commercial liability insurance policies of all types, including but not limited to variable deductible amounts in order to ensure that the costs of protecting the City against liability are minimized. (Ord. 85-273; Ord. 86-75)

2-8-202: DUTIES OF RISK MANAGEMENT DIVISION:

- A. The Risk Management Division shall have the following powers and duties:
 - 1. To coordinate and administer a comprehensive risk management program that serves the City;
 - 2. To administer the investigation and processing of claims brought against the City;
 - 3. To oversee those persons or parties who may contract with the City to provide claims investigation, claims adjustment and support services;
 - 4. To develop and administer a system that identifies the property and liability losses, insurance costs and administrative costs of risk management incurred by each department of the City;
 - 5. To establish a program to reduce property and liability losses incurred by each department of the City;
 - 6. To establish a program of inspection of City property;
 - 7. To implement programs reducing property and liability losses in conjunction with department and division heads;
 - 8. To identify and evaluate the exposure of City departments to claims for property and liability losses;

¹ See § 24-10-101, C.R.S.

² Section 31-25-601 et. seq. C.R.S.

- A) 9. To advise the City Manager with respect to specifications of and the need for procuring commercial insurance, if any, to protect the City against liability;

10. Such other functions and duties as assigned by the Director of Support Services or the City Manager. (Ord. 85-273)

2-8-203: CLAIMS RESERVE FUND:

- A. There is hereby created a fund to be known as the Claims Reserve Fund, which will consist of all monies which may be appropriated thereto by the City Council or which may be otherwise made available to it by the City Council. The monies "otherwise made available" shall be deemed to include transfers of monies to the Fund authorized in any given annual budget ordinance. All interest earned from the investment of monies in the Claims Reserve Fund shall be credited to that Fund and become a part thereof. The monies in the Fund are hereby continuously appropriated for purposes of this Part 2. The City Controller shall account for all independent fund categories within the Claims Reserve Fund including utilities and enterprise funds if any are so appropriated. For purposes of complying with City Charter §32 wherein it is stated: "The funds of the Department of Utilities shall be kept separate from the funds of all other departments of the City" the City Controller shall ensure that utility funds, if any, contributed to the Claims Reserve Fund are not combined with other City funds and that accounting of utility funds is done in such a manner so as to comply with the Charter provision. The City Controller shall similarly account for enterprise funds if any are contributed to the Claims Reserve Fund. At the end of any fiscal year, all unexpended and unencumbered monies in the Claims Reserve Fund shall remain therein and shall not be credited or transferred to any other fund.
- B. The Claims Reserve Fund shall maintain reserves for incurred but unpaid liability claims for injuries which lie in or could lie in tort regardless of whether that may be the type of action chosen by the claimant, and for claims arising out of Federal law. The Claims Reserve Fund shall maintain reserves to provide for the contingency that in any year the contribution to the Claims
- B) Reserve Fund from other funds is adequate to cover the actual expenses realized in that year. The Director of Support Services, after consultation with the Director of Finance, the City Attorney and the City Auditor, shall recommend the amount of money that is required to maintain adequate reserves. Adequate reserves shall be maintained in the Claims Reserve Fund subject to available appropriations made by the City Council at its discretion.
- C. Expenditures made out of the Claims Reserve Fund in accordance with this subsection shall be made only for the following purposes:
1. To pay general liability claims and automobile liability claims and expenses related thereto, brought against the City, its employees or officials pursuant to the Colorado Governmental Immunity Act, and claims against the City and its officials or employees arising under Federal law, which the City is legally obligated to pay and which are compromised or settled pursuant to this Part 2 or in which a final money judgment against the City has been entered;
 2. To pay the costs of defense, including expert witness fees and outside counsel legal fees, and investigation and other related defense costs in connection with claims brought pursuant to the requirements of subsection C1 above.
- D. Monies in the Claims Reserve Fund shall not be used to pay any of the following:
1. Claims for liabilities or losses which are covered under commercial insurance policies purchased by the City;
 2. All claims other than those which arise under Federal law or which lie or could lie in tort regardless of whether that may be the type of action chosen by the claimant;
 3. Any other claim or expense not set forth in subsection C of this Section.
- E. The City Clerk/Treasurer shall be responsible for the management and investment of the Claims Reserve Fund.
- F. The setting aside of reserves for self-insurance purposes in the Claims Reserve Fund created in

- F) this Section shall not be construed to be creating an insurance company nor shall the Claims Reserve Fund otherwise be subject to the provisions of the laws of the State of Colorado regarding insurance or insurance companies. The requirements of Section 10-4-716 C.R.S., concerning self-insurance under the Colorado Auto Accident Reparations Act are not applicable to this Part 2.
- G. Disbursements made from the Claims Reserve Fund for eligible expenditures shall be initiated by the preparation of a warrant requisition to the City Controller or Utility Controller from the risk management section in accordance with the authority set forth in Sections 2-8-204 and 2-8-207 of this Part 2. All requests for disbursements from the Claims Reserve Fund shall be given the highest priority by the City Controller with respect to the processing and preparation of a warrant in connection with the compromise or settlement of claims or the payments of judgments.
- H. The City Auditor or any person authorized by him shall conduct an examination at least once a year to determine that proper underwriting techniques, sound funding procedures, loss reserves, claims procedures, and accounting practices are being followed in the management and operation of the Claims Reserve Fund or such other funds being used to cover deductible amounts when there is insurance coverage. The City Auditor shall present a report of his findings to the City Council.
- I. Beginning on or before March 1, 1986, and on or before March 1 of each year thereafter, the City Clerk/Treasurer shall report to the City Council regarding the operation and management of the Claims Reserve Fund. The report shall show, but not be limited to, the name of all lending institutions, funds, or other depositories where risk management funds have been deposited, the sums of money on deposit therein, the interest paid or credited thereon, the rate of interest so credited. (Ord. 85-273; Ord. 86-23)

2-8-204: COMPROMISE OR SETTLEMENT OF CLAIMS:

- A. It shall be the responsibility of the Risk Management Division to investigate and to either
 - A) deny, compromise or settle all claims filed against the City or its employees pursuant to the requirements of the Governmental Immunity Act or arising under Federal law in accordance with this Part 2. Prior to settling a claim of fifteen thousand dollars (\$15,000.00) or more, the person authorized to settle the claim shall consult with the head of the affected department to determine the appropriateness of the compromise or settlement amount; provided however, that the ultimate decision shall rest with the person having the responsibility pursuant to this Section 2-8-204 to settle or compromise the claim. Nothing herein, however, shall preclude the person authorized to settle the claim to refer the claim to a person with higher settlement authority, the Claims Review Board, or to the City Council, as appropriate.
 - B. The following parties are authorized to make compromises or settlements on behalf of the City in the following amounts:
 - 1. The Claims Manager, or his employees employed by the Risk Management Division or under contract with the Division, is authorized to settle claims for an amount not to exceed fifteen thousand dollars (\$15,000.00);
 - 2. The Safety and Risk Manager of the Division is authorized to settle claims for an amount not to exceed twenty five thousand dollars (\$25,000.00);
 - 3. The Claims Review Board is authorized to settle claims for an amount not to exceed seventy five thousand dollars (\$75,000.00);
 - 4. The City Council is authorized to settle claims for an amount not to exceed the maximum liability limits under the Colorado Governmental Immunity Act for claims which lie or could lie in tort regardless of the nature of the action which is brought by the claimant, and for such other amounts which the City Council deems appropriate with respect to claims arising under Federal law.
 - C. No claims shall be settled unless supported by a Claims Settlement Report, which will give a concise statement of the nature of the claim, the history of the proceedings, and a recommendation from the person assigned the claim on behalf of the City.

- D. In investigating claims brought against the City and its officials or employees, the Claims Manager shall have authority to seek the advice and cooperation of all departments of the City with respect to establishment of facts, determination of liability, and assistance in utilization of the professional expertise of various employees within the City in connection with those claims. Such advice and assistance shall be provided on a timely basis.
- E. No claim shall be settled pursuant to the requirements of this Section unless the claimant has executed and presented a full release or discharge of liability to the City and its officers and employees arising out of the facts under that claim unless otherwise authorized by the Safety and Risk Manager and the City Attorney.
- F. On July 1, 1986, and December 31, 1986, and at least once each year thereafter, the City Auditor or any person authorized by the City Auditor shall conduct an examination of the claims procedures, use of settlement authority and management and operation of the Risk Management Division to determine that the use and operation of the Claims Reserve Fund is being accomplished in a prudent and reasonable manner. The City Auditor shall present a report of his findings to the City Council.
- G. 1. Section 2-8-201 of this Part recognizes that the Utility Department and some enterprise fund activities have not yet had cancelled their general liability or automobile liability insurance policies. However, the insurance policies that exist contain self insurance retention amounts which are the responsibility of the City. Section 2-8-203 of this Part enables transfers of monies set aside to cover self insurance retention amounts to the Claims Reserve Fund if done by the City Council. If such is not done by the City Council, then the accounts within the respective enterprise funds and the utility division budgets for coverage of self insurance retention amounts are recognized as monies that can be used in accordance with Section 24-10-113, C.R.S., as amended, to pay any costs of defense, including expert witness fees and outside counsel legal fees, and investigation and other related defense costs in connection with claims brought pursuant to this Part 2 and to pay any compromise, settlement or final judgment.

- G) 2. The Department of Utilities and Enterprise Fund activities which have general liability and automobile liability insurance coverage with self insurance retention amounts shall cause claims made against the Department of Utilities or Enterprise Fund activities to be handled up to the self insurance retention amounts or in the case of claims under the Colorado Governmental Immunity Act, up to the damage limitations set forth in Section 24-10-114, C.R.S., as amended, in accordance with this Part 2.
- H. Disbursements from the Claims Reserve Fund or any other accounts established for the purpose of covering self insurance retention amounts where there is general liability and automobile liability insurance coverage for claims compromised or settled shall be paid by the City Controller or Utility Controller on behalf of the Utilities Department upon warrants drawn in accordance with the law and this Part 2. All disbursements made by the City or Utility Controller shall be duly reported in the City or Utility Controller's annual financial report. (Ord. 85-273)

- D. The City Attorney shall have the authority to contract for outside counsel in connection with litigation arising out of claims brought pursuant to this Part 2, and may request disbursements from the Claims Reserve Fund or such other appropriate funds as set forth in Section 2-8-207C above.

EXTERNALLY COMPETITIVE: Pricing jobs to be competitive with the labor market from which the City normally recruits and retains its employees. This results from salary survey data and determination of relationship of City pay practice to the pay practice of the market surveyed. (Ord. 76-60; Ord. 77-32; 1968 Code § 1-117.2)

SALARIES AND BENEFITS: Includes all compensation and recompense paid to an employee for services rendered and reimbursement for expenses when due, and includes nonmonetary as

3-1-303: **ANNUAL LABOR MARKET AND SALARY DATA SURVEY:**

- A. Annually, on or before the first regular Council meeting in March of each calendar year, the City Manager shall identify to the City Council the labor market and the salary data market from which he intends to solicit salary and benefit data for the purpose of preparing his estimate of the total anticipated cost of salaries and benefits for City employees for the coming budget year. The identification of such labor and salary data markets shall be made available to the City's employees and the public.

1. Procedures established in this Part 3 are in addition to and in furtherance of the job rate concept as provided in Part 2 of this Article.

2. For definitions of general application, see Section 1-1-203 of this Code.

- B. The City Council may consider the information at that same Council meeting or at a subsequent meeting and may receive any statements any person may make concerning such labor market and salary data market designations.
- C. If no statements are made or if no formal consideration of such designation by the City Council is forthcoming by the close of the second regular Council meeting in April, the City Manager shall assume that such labor and salary data market designations are acceptable to the Council and shall proceed to solicit salary and benefit data from those sources.
- D. If the City Council desires other designations, it shall designate by formal action by the second regular meeting in April such other labor markets and salary data markets.
- E. Such designation, whether expressed or assumed, shall constitute but one source of information relating to salary and benefit data and nothing contained in this Section shall be construed in any way to limit the City Council to consideration of only the labor market and salary data market so designated, nor in any manner to bind the City Council to pay salaries or benefits equal or approximate to salaries or benefits paid by any other entity or industry in the labor market or salary data market so designated.
- F. Nothing contained in this Section shall be deemed to require formal notification or publication or posting of any notice either in full or in summary form, or public hearing by the City Council. (Ord. 77-32; 1968 Code § 1-117.3; 1980 Code)

3-1-304: ANNUAL DETERMINATION OF TOTAL COST OF SALARIES AND BENEFITS:

- A. Annually, on or before July 15, the City Manager shall report to the Council his estimate of the total anticipated cost of salaries and

- A) benefits for employees for the coming budget year, clearly identifying all increases over the current budget year. Such estimate shall assume the same number of employees as are approved in the current budget year, allowing for normally anticipated step raises and increases of like nature which will occur with or without any overall salary and benefit adjustment, but shall not include any new positions or reclassifications of existing positions. His estimate shall be based upon but shall not be limited to such economic data as rates, variations and trends of national inflation, adjustments in the cost of living as reflected in consumer price indexes, competitive labor market data and such other data as the City Manager shall deem pertinent.
- B. At the same time the City Manager makes his report to City Council, he shall cause the City's employees and the public to be informed of the contents of his report in such manner as to inform all interested persons thereof; provided, this provision is not to be so interpreted as to require formal publication or posting of his report, either in full or in summary form.
- C. Upon receipt of the City Manager's report, the City Council shall consider same at its next regular Council meeting. The Council shall thereupon, or not later than the first regular Council meeting in August, preliminarily accept, modify, or reject the City Manager's report.¹ (Ord. 78-67; 1968 Code § 1-117.4)

3-1-305: SALARY AND BENEFIT SCHEDULES; APPROVAL:

- A. At the first regular Council meeting in October, the City Manager shall cause to be reported to the City Council his proposed salary and benefit schedule for the coming budget year in conformity with Council guidelines as provided in Section 3-1-304 above. Such schedule shall be based upon such salary data from the approved labor market(s) and the salary data market(s), upon internal job analysis and job

1. It is recognized that the proposed salary and benefit schedule reported to Council at the first regular Council meeting in October, as provided in Section 3-1-305A, may be adjusted through the City Manager's administrative procedure for the establishment of salaries and benefits. (Ed. Note: This footnote is part of the ordinance as originally adopted.)

- A) evaluation, including but not limited to consideration of productivity, and upon such other data as the City Manager shall deem proper.
- B. It is the intention of the City Council that salaries and benefits should be recommended by the City Manager based upon the criteria enumerated in subsection A. To this end the Council directs that every effort be made by and between the City Manager and affected employee(s) to resolve all objections and protests to the proposed schedule prior to the reporting of such schedule to the City Council. And to this same end, the City Council further declares that neither the Council nor any individual member thereof should become involved in the formulation of the salary and benefit schedule on behalf of any employee(s) after the Council determination of the total cost of salaries and benefits until such time as the salary and benefit schedule is officially reported to the City Council.
- C. At the regular Council meeting upon which such report appears any employee who has previously protested the salary and benefit schedule to the City Manager in writing, may appear and protest the schedule, either in whole or in part. Upon receipt of such protest the City Council may determine the matter forthwith or may set a time and place at which the matter may be heard and determined. In presenting a protest, an employee may be represented by an attorney of his choice or by another employee of the same classification. In its discretion the Council may recognize a person as representative of one or more individual employees involving more than a single classification for the sole purpose of protesting the salary and benefit schedule relating to the represented employees. Also in the exercise of its discretion the Council may impose such conditions and restrictions as it sees fit, including without limitation, signed proof of representation, time limits on presentation, and the like. (Ord. 78-67; 1968 Code § 1-117.5)

- D. Public response to all or any part of the total anticipated cost of salaries and benefits or the proposed salary and benefit schedule shall be presented to City Council not later than the first regular Council meeting in October in order to allow review and comment by the City Manager and affected employees. It is the intention of the City Council that the City Manager and affected employees shall always be afforded a reasonable opportunity to review and respond to any comment adverse to the City Manager's reports or to the employees' position whenever such comment may occur, keeping in mind, however, the need for finality in the process in order to secure approval of the City budget in a timely fashion. Nothing contained herein shall be interpreted to limit public discussion of the City budget or any portion thereof at any meeting of the City Council or at any hearing held pursuant to State or Federal law or regulation at which the City budget is discussed. (Ord. 79-115; 1968 Code § 1-117.5)
- E. The decision of the City Council, to be made not later than the second regular Council meeting in October, shall be final and not subject to appeal or review, it being the declaration of the City Council that the establishment of salaries and benefits is an administrative and not a legislative matter, hence not subject to the initiative and referendum. (Ord. 78-67; 1968 Code § 1-117.5; 1980 Code)

3-1-306: ADMINISTRATION OF SALARY SCHEDULE: The salary and benefit program shall consist of continuing job analysis, job evaluation and job market analysis (through salary survey data). Job evaluation will occur throughout the year and reclassifications may occur at any time during the year as conditions require and as the current budget permits. (Ord. 77-32; 1968 Code § 1-117.6)

City contributions that are less than ninety one dollars forty cents (\$91.40) on January 1, 1987, will increase in subsequent years to an amount not to exceed ninety one dollars forty cents (\$91.40) as pera plan premiums increase.  3-1-502: Civil Actions

C) 78-46; Ord. 85-279; Ord. 86-34; 1968 Code §§
 1-132, 1-333, 1-134)

3-1-502: CIVIL ACTIONS:**3-1-501: CRIMINAL ACTIONS:**

A. Defense Provided. Whenever a criminal action has been brought against any City employee, or the employee has been involved in an incident which is being investigated by a law enforcement agency with a view towards the filing of criminal charges or the submission of the facts surrounding the incident to a grand jury for review, and the employee requests in writing without delay that the cost of defending such employee be borne by the City, such cost, including reasonable counsel fees and expenses, shall be so borne by the City if the City Council first find and determine that:

1. The act or omission arose out of and in the course of the employees duties;
2. The employee was acting in good faith and without malice; and
3. The cost of defending such employee serves the interest of the City.

B. Committee Investigation. To assist the City Council in making such findings and determination, a committee consisting of the City Attorney, the Safety Director and the head of the employees' department (of the City Manager if the employee charged is the head of a department) shall investigate any such criminal charge and shall make a recommendation to the City Council whether the above criteria for paying the costs of defending such employee are met.

C. Conviction; Recovery of Costs. If the criminal action results in a final conviction, no costs shall be paid by the City and any costs advanced to the employee shall be repaid to the City. (Ord.

A. Claims Arising Under State Law.

1. Whenever a claim is made against a City employee for injury or death which lies in tort or could lie in tort regardless of whether that may be the type of action chosen by the claimant, the City shall be liable for the costs of the defense of the employee, whether such defense is assumed by the City or by other counsel, in the discretion of the City; provided, that the claim against the City employee arose out of injuries sustained from an act or omission of such employee which occurred, or is alleged in the complaint to have occurred, during the performance of his duties and within the scope of his employment, except where such act or omission is wilful and wanton. If it is determined at the trial that the injuries did not arise out of an act or omission of such employee during the performance of his duties and within the scope of his employment or that the act or omission of such employee was wilful and wanton, it shall be the responsibility of the employee to reimburse the City for reasonable costs incurred by it in the defense of the employee.

2. Notwithstanding the provisions of subsection A1 of this Section, the City shall not be responsible for providing a defense to a City employee where the City is not made a party defendant in the action and the City is not notified of the existence of such action in writing by the plaintiff or the employee within fifteen (15) days after the commencement of the action. Further, the provisions of subsection A1 of this Section shall not apply where such employee of the City wilfully and knowingly fails to notify his supervisor of the incident or occurrence which led to the claim within a reasonable time after such incident or occurrence.

- A) 3. Subject to the requirements of subsection A2 above, in the event that the City elects not to assume the defense of the employee, the City nevertheless shall be liable to the employee for his reasonable attorney's fees and costs in prosecuting his own defense unless the Court determines that the injuries did not arise out of an act or omission of such employee during the performance of his duties and within the scope of his employment, or that the act or omission of the employee was wilful and wanton. If the Court determines that the defense of sovereign immunity is not or would not have been available to the City, then the City shall be liable to the public employee for any judgment or settlement against the City employee.

4. Where the City is made a co-defendant with its employee, it shall notify the employee in writing within fifteen (15) days after the commencement of the action of whether it will assume the defense of the employee. Where the City is not made a co-defendant, it shall notify the employee whether it will assume the defense within fifteen (15) days after receiving written notice from the employee of the existence of the action.

5. The City shall be liable for the payment of all judgments and settlement of claims against any of its employees where the claim against the employee arises out of injuries sustained from an act or omission of the employee occurring during the performance of his duties and within the scope of his employment, except where such act or omission is wilful or wanton, or where the defense of sovereign immunity is available to the City, and provided, that the employee does not compromise or settle the claim without the consent of the City.

6. Notwithstanding the provisions of subsection A5, the City shall be liable for the payment of all judgments in settlements of claims against any of its employees where the claim against the employees arise out of injuries sustained from an act or omission of employees occurring during the performance of their duties and within the scope of their employment, except where such act or omission is wilful or wanton, even though the defense of sovereign immunity is available, when the employees are operating an emergency vehicle within the provisions of Section 42-4-106(2) and (3), C.R.S., if the employees do not compromise or settle the claim without the consent of the City.

7. Notwithstanding anything contained in this

- A7) Section 3-1-502 to the contrary, the City shall not be liable for the payment of any exemplary damages on behalf of any City employee without the prior consent of the City Council.

B. Claims Arising Under Federal Law.

1. To the extent that the doctrine of *Respondent Superior* is applicable to any claim against a City employee arising under Federal law, the provisions set forth in subsection 3-1-502A above shall be applicable to the responsibilities of the City and the City employee with respect to the allocation of costs of defense and the payment of judgments and settlements on behalf of the City employee.

2. In the event that the claim arising under Federal law against the City employee does not involve the doctrine of *Respondent Superior*, then the City shall be responsible for providing a defense to such City employee and to pay all judgments and settlements on behalf of such City employee unless it is determined by the Court that the City employee violated a federally protected right and the employee was not entitled to immunity or did not act in good faith with respect to the act or omission which gave rise to the claim under Federal law.

3. In its discretion, the City may appoint separate counsel to represent the City employee, and shall be entitled to a reimbursement of all costs of defense so incurred by the City on behalf of the employee if it is determined by the Court that the acts or omissions of the City employee which gave rise to the claim under Federal law were in violation of a federally protected right and the employee was not entitled to immunity or did not act in good faith. Nothing herein shall require the City, in any case, to be responsible for exemplary damages awarded against a public employee for claims arising out of Federal law.

- C. Civil Action Investigation Committee. To assist the City Council in making such findings and determinations, a committee consisting of the City Attorney, the Safety and Risk Manager, and the head of the affected employee's department for the City (or the City Manager if the employee charged is the head of a department) shall cause an investigation to be made of any such civil action, and make a recommendation to the City Council whether the above criteria for paying the costs of defending the employee or the cost of payment of any judgment or settlement are required pursuant to the requirements of this Section 3-1-502. If any member of the Fire Department dies from a nonservice-connected cause, the spouse of such member shall receive a monthly benefit equal to fifty percent (50%) of the monthly retirement benefit to which said deceased member would have been entitled had he retired the day preceding the date of his death, even though he might not have attained an age to become eligible for retirement. The member's retirement benefit shall be based on two percent (2%) of his final average salary multiplied by the number of years of service already credited to a maximum of fifty percent (50%) of his final average salary; provided, however, that the spouse's benefit shall not be less than twenty five percent (25%) of the member's final average salary. The spouse's benefit shall be effective from the later date of either the member's death or the spouse's first eligibility therefor. In no case shall the benefit be less than two hundred fifty dollars (\$250.00) per month. If the spouse dies or remarries while having the care of such qualified child, such child shall receive a benefit of twenty five percent (25%)

If any child regardless of age is found by the Board to be so mentally or physically incapacitated that he cannot provide for himself, the benefit shall be paid for the life of such child or until any disability is removed as may be determined by the Board, or until such child is deceased, married or adopted. The spouse who has in his or her care such child shall receive the spouse's benefit provided for in this Section beyond the child's eighteenth (18) birthday in lieu of receiving the spouse's benefit under subsection B.
- D) If such deceased member leaves an unmarried child under age eighteen (18) or under age twenty three (23) if such child is a full-time student in an accredited institution of higher education and no benefits have been payable under subsections B and C on account of said member's death, such child shall receive a benefit of twenty five percent (25%) of the deceased member's final average salary. If there are two (2) such children each child shall receive a benefit of an equal share of forty percent (40%) of the deceased member's final average salary. If there are three (3) or more such children each child shall receive a benefit of an equal share of fifty percent (50%) of the deceased member's final average salary. In no event shall the benefit payable to such children be less than two hundred fifty dollars (\$250.00) per month if there are three (3) or more children, or less than one hundred dollars (\$100.00) per month to each child if there are less than three (3) children. If any child regardless of age is found by the Board to be so mentally or physically incapacitated that he cannot provide for himself after reaching age eighteen (18), the benefits shall be paid for the life of the child or until any disability is removed, as may be determined by the Board, or until such child is deceased, married or adopted.

- E. Upon the death of a retired participating member whether retired for disability or age, the spouse of such retired member shall be entitled to receive a benefit equal to seventy percent (70%) of the retirement benefit being paid to the retired member at the time of death. If such member has no spouse on the date of death or if the spouse subsequently remarries or dies, the retired member's children shall receive an equal share of the spouse's benefit as long as such child is under the age of eighteen (18) or twenty three (23) if unmarried and a full-time student in an accredited institution of higher education.

2. On the date provided, the matter shall be heard before the Municipal Court, which may receive evidence on the issue as provided by law. If it is determined that a violation of the conditions of probation has occurred, the Municipal Court may order the probation revoked and impose sentence, continue probation under such additional conditions as it may deem appropriate, or continue probation without change. If it is determined that no violation of the conditions of probation has occurred, the Court shall continue the probation as originally granted and order the probationer's release. Upon conviction after trial, the entry of a plea of guilty, or the granting of a deferred prosecution or sentence for any violation of this Code, the Municipal Court may, on its own motion, the motion of the defendant, or the motion of the City Attorney, require that the defendant perform public service, as set forth herein, as a condition of a suspended sentence granted in accordance with Section 4-3-105 of this Code, probation granted in accordance with Section 4-3-109 of this Code, or the granting of the deferred prosecution or sentence. The Court shall announce the specific number of hours of such service to be performed by the defendant and such service shall then be performed within the period during which sentence is suspended or deferred, prosecution is deferred, or the defendant is in a probationary status.
- B. The service to be performed pursuant to this Section shall be performed within and for the benefit of the Department of Parks and Recreation, or such other Department or agency of the City as the Presiding Judge shall from time to time designate. Further, such service shall not be performed for the benefit of any Department or agency unless and until the Director of the Office of Safety and Insurance shall have certified to the probation officer, prior to any such service being performed, that a "Contract Insurance Policy", or other similar insurance coverage, in such amounts as may then be in force generally regarding personnel who work for the City under a personal service contract, has been obtained and is in force for the benefit of the Department or agency for which the service is to be performed.

 2. Should the required service be performed satisfactorily, the probation officer shall so advise the Municipal Court, which shall, provided that all other conditions imposed upon the defendant have been complied with, order the defendant released from the jurisdiction of the Court.
 3. Should it reasonably appear to the probation officer that the required service has not been performed at the times designated, or that such service was performed in an unsatisfactory manner, the probation officer shall proceed against the defendant in the manner provided in Section 4-3-109C of this Code regarding revocation of probation. The Municipal Court may thereafter, upon conducting the hearing provided in Section 4-3-109C2 of this Code in cases of an alleged violation of probation, and provided that the Municipal Court determines that the defendant has, without good cause, either failed to perform such service as directed or failed to perform such service in a satisfactory manner, revoke the order permitting the performance of public service and either impose sentence or direct that the prosecution of the defendant otherwise proceed, continue said order under such additional or different conditions as it shall deem appropriate, or continue said order without change. If it is determined that the defendant has complied with the order of the Court regarding the performance of public service, the Court shall, provided that all other conditions imposed upon the defendant have been complied with, direct that the defendant be released from the jurisdiction of the Court. Such alleged violations may include any offense which may now or in the future be included in the schedule of payable fines established by the Presiding Judge pursuant to law; except that no such offense, conviction of which might result in the assessment of points by the Colorado Department of Revenue against the violator's driving license or privilege, may be so designated by the Presiding Judge. (Ord. 77-171; Ord. 80-11; 1968 Code § 1-59)

4-5-103: PROCEDURES:

The defendant shall also have the right to the issuance of a subpoena by making application to the office of the Clerk of the Court.

B. At the completion of any hearing held under the provisions of this Article, the referee shall enter an order:

3. Making a finding of guilty, based upon either a plea of guilty entered before him or the evidence presented at the hearing, and assessing a penalty against the defendant, which penalty shall not exceed that fine established in the schedule of payable fines published by the Presiding Judge and in effect at the time of the violation. He may also, in his discretion, assess costs not to exceed an amount set by prior order of the Presiding Judge applicable to all matters heard before the referee, subject to the limitation contained in Section 4-3-103A of this Code. Except as provided in Section 22-1-103B of this Code relating to certain parking offenses, this restriction shall not apply to offenses which are

As to such offenses, the maximum punishment allowable shall be as provided in Section 1-2-101 of this Code.

C. A written record of the proceedings shall be maintained by the referee. 4-5-104: **APPEAL:** Any defendant who is found guilty by the referee and against whom a penalty has been imposed may appeal such decision to the Municipal Court by filing a request for such action in writing with the Clerk of the Court within ten (10) days of the decision of the referee. Upon the filing of such a request, the decision of the referee shall be deemed vacated, the defendant deemed to have entered a plea of not guilty and the case thereafter shall be set for trial de novo before the Municipal Court in the same manner as such cases not heard in the first instance by the referee. If such a request is not made within the allowable ten (10) day period, the order of the referee shall be final. In no instance shall the referee testify on appeal regarding any action previously before him. (Ord. 84-128)

3. Witnesses scheduled to appear at a hearing for the purpose of testifying against the defendant fail to so appear without good cause and without prior notice to the referee.

D. The referee may assess a penalty less than the payable fine prescribed in the schedule of fines published by the Presiding Judge in any case where, in the sound exercise of the referee's discretion, based upon evidence obtained during the course of the hearing, such action would be in the best interests of justice. The referee shall also have those powers relating to suspension of any penalty imposed as are set forth in Section 4-3-105 of this Code relating to Municipal Judges. 7-2-102: LEGISLATIVE INTENT:

- A. **Use of Personal Property and Taxable Services.** It is hereby declared to be the legislative intent of the City Council that for the purposes of this Article every person who stores, uses, distributes or consumes in the City any article of tangible personal property, or taxable services purchased, leased or rented at retail, as herein defined, is exercising a taxable privilege.
- B. **Sale of Personal Property and Taxable Services.** It is hereby declared to be the legislative intent of the City Council that, for the purposes of this Article, every person who is engaged in business in the City, as herein defined, and who shall deliver or cause to be delivered to the purchaser in the City, any property or services taxable herein is exercising a taxable privilege and shall collect the tax imposed by this Article on the total purchase price of such article or articles of tangible personal property or taxable services that are purchased, sold, leased or rented at any time by or to every customer or buyer, in the manner hereinafter set forth. (Ord. 76-168; 1968 Code § 3-71)

7-2-103: GENERAL TERMS AND DISTINCTIONS:

- A. **Sales Tax Defined:** The Colorado Springs sales tax is levied on all sales, leases and rentals at retail on the basis of the purchase or sale price on purchases of tangible personal property and specific services taxable hereunder.

All sales and purchases of tangible personal property are subject to the tax, except as specifically exempted. Sales and purchases of services as specifically set forth in Part 3 of this Article are subject to the tax. The tax in reality is imposed on the purchaser. The duty is imposed on the seller to collect and remit the tax to the City under the penalties for failure to do so as prescribed herein.

- B. **Use Tax Defined.** The Colorado Springs use tax is levied upon the privilege of using, storing, distributing or otherwise consuming tangible personal property and taxable services in the City which property or service is purchased, leased or rented at retail and not subject to the Colorado Springs sales tax, without regard to whether the property or service is purchased either from sources within or without the City. Nonresident persons engaged in business in the City, as herein defined, are required to collect and remit the use tax on taxable transactions.
- C. **Distinction Between Sales and Use Tax.**
 - 1. The primary distinction between the sales tax and use tax is that the sales tax is collected by persons engaged in business in this City from the purchaser or consumer, and such person pays the tax to the City; while,
 - 2. In the absence of that tax charge, the use tax is levied directly upon the person who purchases the commodities or services, either within or outside the City, and uses the same in this City, which person must make remittance of the tax, together with returns showing the

C,2) purchase and the use of articles which are subject to the tax, directly to the City.

In accordance with this Article, any person engaged in business in the City and making sales of property or specific services subject to the use tax, even though not maintaining an office in this City, must collect and remit the use tax on such sales in like manner as Colorado Springs persons collect and remit the sales tax.

The sales tax and use tax complement each other in the City revenue plan, and together provide a uniform tax of two and one-half percent (2½ %) upon either the sale, purchase, use, storage, distribution or consumption of all tangible personal property and specific taxable services purchased, leased or rented at retail, as herein defined. 7-2-401: EXEMPTIONS; DISPUTE PROCEDURES: It shall be unlawful for any seller to fail to collect, or any purchaser to fail to pay a tax levied by this Article on sales in which exemption is disputed.

The seller shall collect and the purchaser shall pay such tax even though a dispute arises between the purchaser and seller as to whether or not any such sale is exempt from taxation hereunder. The seller shall thereupon issue to the purchaser a receipt or certificate on forms prescribed by the Director of Finance showing the names of the seller and purchaser, the item purchased, the date, the price, the amount of tax paid, and a brief statement of the claim of exemption. The purchaser may thereafter apply to the Director of Finance for a refund of such taxes. The purchase and sale of articles of tangible personal property not otherwise exempt are subject to the sales or use tax imposed herein as well as those specific services cited as taxable in Part 3 of this Article. - B. If the accounting methods regularly employed by the vendor or licensed consumer in the transaction of his business, or other conditions are such that the returns aforesaid made on a calendar month basis will impose unnecessary hardship, the Director of Finance may, upon written request of the vendor or licensed consumer, accept returns at such intervals as will, in his opinion, better suit the convenience of the taxpayer and will not jeopardize the collection of the tax; provided, however, the Director of Finance may by rule permit a vendor or licensed consumer whose monthly tax collected is less than one hundred dollars (\$100.00) to make returns and pay taxes at intervals not greater than three (3) months, or as approved by the Director of Finance. (1968 Code § 3-86)
- B. **Combined Sales of Services and Personal Property.** Every retailer or vendor conducting a business in which the transaction between the vendor and the consumer or purchaser consists of the supply of tangible personal property and services in connection with the maintenance or servicing of same, shall be required to pay the tax levied under this Article upon the full contract price, unless application is made to the Director of Finance for permission to use a percentage basis of reporting the tangible personal property sold and the services supplied under such contract. The Director of Finance is hereby authorized to determine the percentage based upon the ratio of the tangible personal property included in the consideration as it bears to the total of the consideration paid under said combination contract or sale which shall be subject to the tax levied pursuant to the provisions of this Article. This Section shall not be construed to include elements upon which the tax is to be imposed as the full purchase price as defined in Section 7-2-103 of this Article, nor shall be construed as an allowance for the vendor to fail to itemize to the customer the taxable and nontaxable portions of the bill. (1968 Code § 3-87)
- C. **Use Tax Collections by Nonresident Vendors.** Every retailer or vendor engaged in business in this City even though not maintaining an office in this City, and making sales of tangible personal property or taxable services subject to the use tax, must, in accordance with this Article, collect and remit the use tax on such sales in like manner as Colorado Springs retailers collect and remit the sales tax. - C. **Underpayment.** If the amount paid is less than the amount due, the difference, together with interest thereon at the rate as specified in Section 7-2-1004 from the time the return was due, shall be paid by the taxpayer within ten (10) days after written notice and demand to him from the Director.

(Ord. 85-274)

7-2-808: EXCESS COLLECTION; FAILURE TO REMIT COLLECTIONS: If any retailer shall, during any reporting period, collect as a tax an amount in excess of two and one-half percent (2½ %) of his total taxable sales, he shall remit to the Director of Finance the full net amount of this tax herein imposed and also such excess. The retention by the retailer of any excess of tax collections over two and one-half percent (2½ %) of the total taxable sales of such retailer, or the intentional failure to remit punctually to the Director of Finance the full amount required to be remitted by the provisions of this Article, is hereby declared to be a violation of this Article and shall subject said retailer to the imposition of penalty and interest, and may subject him to other remedial actions provided for within this Article. - D. Judicial Subpoena. If the Director of Finance is unable to secure from the taxpayer information relating to the correctness of the taxpayer's return or the amount of the taxes due by the taxpayer, the Director of Finance may apply to any judge of the Municipal Court of the City for the issuance of subpoenas to such other persons as the Director believes may have knowledge in the premises.

Upon showing to the satisfaction of the Court that the taxpayer cannot be found, or evades service of subpoena, or fails or refuses to produce his records or give testimony, or is unable to furnish such records or testimony, the judge shall have power, after service of summons upon the persons named in the petition of the Director of Finance, and after hearing, to cause the issuance of subpoenas under the seal of the Court to the persons sought to be so summoned requiring them or any of them to appear before said Director and give testimony relating to said taxpayer's return or sales or purchases.

- E) When the witness is subpoenaed at the insistence of the Director of Finance, such fees shall be paid in the same manner as other expenses under the terms of this Article, and when a witness is subpoenaed at the instance of any party to any such proceeding, the Director of Finance may require that the cost of service of the subpoena and the fee of the witness be borne by the party at whose instance the witness is summoned. - C. Deficiency Due to Fraud. If any part of the deficiency is due to fraud with the intent to evade the tax, then there shall be added one hundred percent of the total amount of the deficiency and in such case, the whole amount of the tax unpaid, including the additions, shall become due and payable ten (10) days after written notice and demand is made by the Director, and an additional three percent (3%) per month on said amount shall be added from the date the return was due until paid.

- D. **Sales Tax - Use Tax - Neglect or Refusal to Make Return or to Pay:** If a person neglects or refuses to make a return in payment of the sales or use tax or to pay any sales or use tax as required, the Director shall make an estimate, based upon such information as may be available, of the amount of taxes due for the period for which the taxpayer is delinquent and shall add thereto a penalty equal to the sum of fifteen dollars (\$15.00) for such failure or ten percent (10%) of the delinquent tax, whichever is greater, and interest on such delinquent taxes at the rate imposed under Section 7-2-1004 plus one-half percent ($\frac{1}{2}\%$) per month from the date when due, not exceeding eighteen percent (18%) in the aggregate. In any prosecution for a violation of this subsection, introduction of the check dishonored by the drawee, bearing notice of such dishonor from the drawee, shall constitute in evidence a prima facie showing that such check was issued by the drawer at a time when the drawer had on deposit with the drawee insufficient funds to allow the drawee to honor the check on presentment. (Ord. 76-168; Ord. 81-251; Ord. 83-112; 1968 Code § 3-110)

7-2-1103: NOTICE OF TAX LIEN: If any taxes, penalty or interest imposed by this Article and shown by return filed by a taxpayer or as shown by assessments duly made as provided herein, are not paid within five (5) days after the same are due,

the Director of Finance shall issue a notice, setting forth the name of the taxpayer, the amount of the tax, penalties and interest, the date of the accrual thereof and that the City claims a first and prior lien therefor on the real and tangible personal property of the taxpayer. (Ord. 76-168; 1968 Code § 3-101)

7-2-1104: FORM OF NOTICE AND FILING OF

LIEN: Such notice shall be on forms prepared by the Director of Finance and shall be verified by him or his authorized agent, and may be filed in the office of the Clerk and Recorder of any county in this State in which the taxpayer owns real or tangible personal property, and the filing of such notice shall create a lien on such property in that county and constitute notice thereof. After said notice has been filed, or concurrently therewith or at any time when taxes due are unpaid, whether such notice be filed or not, the Director of Finance may issue a distraint warrant as provided herein. (Ord. 76-168; 1968 Code § 3-101)

7-2-1105: TRANSACTIONS, COMMODITIES SUBJECT TO TAX LIENS:

- A. **Business Purchases.** If the purchaser of a business or stock of goods shall fail to withhold the required amount of purchase money, (as required by Section 7-2-605) and the tax shall be due and unpaid after the ten (10) day period allowed, he, as well as the seller, shall be personally liable for the payment of the taxes unpaid by the former owner. Likewise, any person who takes any stock of goods or business fixtures of or used by any retailer under lease, title-retaining contract or other contract arrangement, by purchase, foreclosure sale, or otherwise, takes same subject to the lien for any delinquent sales and use taxes owed by such seller, and shall be liable for the payment of all delinquent sales taxes of such prior owner, not, however, exceeding the value of the property so taken or acquired.

- B. Construction Materials. The full amount of any tax due and not paid for lumber, fixtures or any other building materials and supplies, together with penalties and interest thereon as herein provided, shall constitute a lien upon the real property benefited by such work. The Director of Finance is hereby authorized to file a notice of such lien with the County Clerk and Recorder of El Paso County.
- C. Personal Property Affixed to Real Property. The full amount of unpaid taxes arising from and required to be reported on personal property affixed to real property under this Article together with interest and penalties, shall constitute a first and prior lien on said real property and any proceeds therefrom, which lien shall have precedence over all other liens of whatsoever kind and nature except as to liens for general taxes created by State law and except as to pre-existing claims or liens of a bona fide mortgagee, pledgee, judgment creditor or purchaser whose rights shall have attached prior to the filing of the notice of tax lien on the property of the taxpayer other than on the goods, stock in trade and business fixtures of such taxpayer.
- D. Consignments Subject to Tax Lien. The liens hereby created on merchandise shall extend not only to any and all merchandise belonging to the retailer who is in default on payment of the sales and use tax but also to any merchandise held by him on consignment; provided, however, if said retailer applies to the Director of Finance for permission to separate the tax accounts of merchandise held on consignment from merchandise owned by the retailer, the Director of Finance may grant such permission on condition that the merchandise owned by the retailer is physically separated from merchandise held on consignment in a manner satisfactory to the Director of Finance, and that sales and tax records of the merchandise held on consignment be kept separate from the sales and tax records of goods owned by the retailer, also in a manner satisfactory to the Director of Finance.

If the merchandise be so segregated and the records so kept separate, the tax on sales of items of merchandise owned by the retailer shall not be a lien on the merchandise held on consignment, but the tax on sales of items

- D) held on consignment shall be a lien on the merchandise so held and also a lien on the merchandise, furniture and fixtures, tools and equipment owned by the retailer.

If the retailer holds merchandise on consignment by different consignors he may, with the approval of the Director of Finance, separate the different consignments for lien purposes and keep separate tax and sales tax records thereof and the only lien for sales tax on any consignment shall be the lien on sales of items out of such consignment.

A sale at retail out of a stock of merchandise in the regular course of business shall release the item or items sold from the sales tax lien hereby created, but newly acquired merchandise shall come and remain under such lien until sold at retail or until such tax is paid.

- E. Status of Unpaid Tax in Bankruptcy and Receivership. When the business or property of any taxpayer subject to this Article shall be placed in a receivership, bankruptcy, or assignment for the benefit of creditors, or seized under distraint for property or State taxes, all taxes, penalties, and interest imposed by this Article shall constitute a first, prior and preferred lien against all the property of said taxpayer, except as to pre-existing claims or liens of a bona fide mortgagee, pledgee, judgment creditor, or purchaser whose rights shall have attached prior to the filing of the notice as hereinafter provided on the property of the taxpayer.

However, the goods, stock in trade, cash, deposits, accounts receivable, and business fixtures of such taxpayer shall not be subject to the above-stated exception and said taxes, penalties and interest shall be and remain a first, prior and preferred lien against said property of taxpayer.

No sheriff, receiver, assignee, or other officer shall sell the property of any person subject to this Article under process or order of any court, when that property is subject to a prior recorded City tax lien, except after notice of the sale date is given to the City. If there be any such taxes due owing and unpaid, it shall be the duty of such officer to first pay the amount

- E) of said taxes out of the proceeds of such sale before making payment of any moneys to any judgment creditor or any other claimants of whatsoever kind or nature except the costs of the proceedings and other pre-existing claims or liens as above provided. (Ord. 76-168; 1968 Code § 3-101)

7-2-1106: CITY A PARTY TO TITLE ACTIONS FOR DETERMINATION OF LIENS:

In any action affecting the title to real estate or the ownership or rights to possession of personal property the City may be made a party for the purpose of obtaining a judgment or determination of its lien upon the property involved therein. (Ord. 76-168; 1968 Code § 3-101)

7-2-1107: FILING AND RELEASE OF LIEN: Any employee, agent, or representative of the Director to whom a warrant has been issued, pursuant to Section 7-2-1201 of this Article may serve a notice of lien in such forms as the Director may prescribe upon the person in possession of any personal property or rights to property belonging to the taxpayer, and if not previously recorded such lien shall be effective as to such property or interest from the date of such service. The Director may release said lien as to all or any part of the property or any interest therein subject to such lien upon such terms as he may deem proper. (Ord. 76-168; 1968 Code § 3-101)

7-2-1108: CERTIFICATE OF DISCHARGE; VALUES DETERMINED:

- A. Certificate of Discharge of Property Subject to Lien. If any property, real or personal, shall be subject to a lien for the payment of any tax due the City, the Director may issue a certificate of discharge of any part of the property subject to the lien if he finds that the fair market value of that part of such property remaining subject to the lien is at least double the amount of the liability remaining unsatisfied in respect to such tax and the amount of all prior liens upon such property.
- B. Certificate of Discharge to Part of Property. If any property, real or personal, shall be subject to a lien for the payment of any tax due the City, the Director may issue a certificate of discharge of any part of the property subject to

- B) the lien if there be paid over to the Director in part satisfaction of the liability in respect to such tax an amount determined by the Director, which shall not be less than the value, as determined by him, of the interest of the City in the part to be so discharged.

- C. How Values Determined. In determining such values, the Director shall give consideration to the fair market value of the part to be so discharged and to such lien or liens thereon as shall have priority over the lien of the City.

- D. Certificate of Release Conclusive. A certificate of release or of partial discharge issued under this Part shall be held conclusive that the lien of the City upon the property released therein is extinguished, but shall not extinguish nor release any portion of the lien property not specified in the release. (Ord. 76-168; 1968 Code § 3-101)

CHAPTER 7 TAXATION

ARTICLE 2 SALES AND USE TAX

PART 12 METHODS OF ENFORCING COLLECTION

SECTION:

7-2-1201: Foreclosure by Distraint
 7-2-1202: Jeopardy Assessment
 7-2-1203: Recovery of Unpaid Tax
 7-2-1204: Compromise

7-2-1201: FORECLOSURE BY DISTRAINT: Liens created hereunder may be foreclosed by seizing under distraint warrant and selling so much of said merchandise, furniture and fixtures, tools and equipment, or other property not otherwise excluded, as may be necessary to discharge said liens.

A. When Distraint Issued. When any of the subparagraphs of this subsection are met, the Director or his authorized representative may issue a warrant directed to any employee, agent, or representative of the Department of Finance, sometimes in this Section referred to collectively as "agent" or "revenue collector", commanding him to distraint, seize, and sell the personal property of the taxpayer except such personal property as is exempt from execution and sale by any Statute of this State for the payment of the tax due together with penalties and interest accrued thereon and costs of execution.

1. When any deficiency in tax is not paid within ten (10) days from the mailing of notice of determination, assessment and demand for payment therefor and no hearing has been requested and no appeal from such deficiency assessment has been docketed with any district court of this State within said period; or

2. When any other amount of tax, penalty or interest is not paid within ten (10) days from the mailing of assessment and demand for payment thereof; or,

3. Immediately upon making of a jeopardy assessment or of the issuance of a demand for payment, as provided in Section 7-2-1202.

B. The Director, his authorized representative or agent may apply to any judge of the Municipal court for a warrant authorizing the Director, his authorized representative or agent to search for and seize property located within the City limits for the purpose of enforcing the collection of sales and use taxes under this Chapter. Municipal court judges shall issue such warrant after the Director, his authorized representative or agent demonstrates that:

1. The premises to which entry is sought contain property that is subject to levy and sale for taxes due; and

2. At least one of the preconditions of the subparagraph A of this Section has been satisfied, provided that if the Director, his authorized representative or agent has declared a jeopardy assessment under Section 7-2-1202, he sets forth the reasons that collection of the tax will be jeopardized.

3. The procedures to be followed in issuing and executing a warrant pursuant to this subsection shall comply with rule 241(C) and (D) of the Colorado Municipal Court Rules of Procedure, provided that an officer authorized by law under rule 241(C) and (B) shall include the Director, his authorized representative or agent.

4. The taxpayer may contest a warrant previously issued under the procedure provided by rule 241(E) of the Colorado Municipal Court Rules of Procedure, except that no proceeding to contest such warrant may be brought after five (5) days prior to the date fixed for sale of the distrained property.

C. Notice of Distraint Seizure. The agent charged with the collection shall make or cause to be made an account of the goods or effects distrained, a copy of which, signed by the agent making such distraint, shall be left with the owner or possessor, at his usual place of abode with some member of his family over the age of eighteen (18) years, or at his usual place of business with his stenographer, bookkeeper, or

- C) chief clerk, or if the taxpayer is a corporation, shall be left with any officer, manager, general agent or agent for process, with a note of the sum demanded and the time and place of sale; and shall forthwith cause to be published a notice of the time and place of sale, together with a description of the property to be sold, in some newspaper within the county wherein distraint is made or, in lieu thereof and in the discretion of the Director, the agent shall cause such notice to be publicly posted at the courthouse of the county wherein such distraint is made and copies thereof to be posted in at least two (2) other public places within said County.
- D. Procedure for Sale. The time fixed for the sale shall be not less than ten (10) days nor more than sixty (60) days from the date of such notification to the owner or possessor of the property and the publication or posting of such notices. Said sale may be adjourned from time to time by said agent if he deems it advisable but not for a time to exceed in all ninety (90) days from the date first fixed for the sale. When any personal property is advertised for sale under distraint as aforesaid, the agent making the seizure shall proceed to sell such property at public auction, offering the same at not less than a fair minimum price including the expenses of making the seizure and of advertising the sale, and if the amount bid for the property at the sale is not equal to the fair minimum price so fixed, the agent conducting the sale may declare the same to be purchased by him for the City. The property so purchased may be sold by the agent under such regulations as may be prescribed by the Director.
- E. Recovery of Property by Owner. In any case of distraint for the payment of taxes, the goods, chattels or effects so distrained shall be restored to the owner or possessor if, prior to the sale, the amount due is paid together with the fees and other charges, or may be redeemed by any person holding a security interest or other evidence of right of possession.
- F. Certificate of Sale; Evidence of Purchase. In all cases of sale, the agent making the sale shall issue a certificate of sale to each purchaser, and such certificate shall be prima facie evidence of the right of the agent to make such sale and conclusive evidence of the regularity of his proceedings in making the sale; and shall transfer

- F) to the purchaser all right, title and interest of such delinquent taxpayer in and to the property sold; and where such property consists of certificate of stock in the possession of the agent, the certificate of sale shall be notice, when received, to any corporation, company, or association of said transfer, and said certificate of such sale shall be authority for such corporation, company, or association to record the transfer on its books and records; and where the subject of sale is securities or other evidences of debt, in the possession of the agent, the certificate of sale shall be good and valid evidence of title in the person holding the same as against any other person. Any surplus remaining above the taxes, penalties, interest, costs and expenses of making the seizure and of advertising the sale, shall be returned to the owner or such other person having a legal right thereto, and, on demand, the Director shall render an account in writing of the sale. (Ord. 76-168; Ord. 86-55; 1968 Code § 3-102)

7-2-1202: JEOPARDY ASSESSMENT:

- A. Jeopardy Enforcement. If the Director of Finance finds that collection of the tax will be jeopardized by delay, in his discretion he may declare the taxable period immediately terminated, determine the tax and issue notice and demand for payment thereof; and, having done so, the tax shall be due and payable forthwith and the Director of Finance may proceed immediately to collect such tax.
- B. Immediate Enforcement Action. In any other case wherein it appears that the revenue is in jeopardy, the Director may immediately issue demand for payment; and, regardless of the provisions of this Article, the tax shall be due and payable forthwith and in his discretion the Director of Finance may proceed immediately to collect said tax.
- C. Security for Payment. Collection under either subsection A or B of this Section may be stayed if the taxpayer gives such security for payment as shall be satisfactory to the Director of Finance. (Ord. 76-168; 1968 Code § 3-103)

7-2-1203: RECOVERY OF UNPAID TAX:

- A. The Director of Finance may also treat any such taxes, penalties or interest due and payable as a debt due the City from the retailer or other person.
 - B. In case of failure to pay the taxes or any portion thereof, or any penalty or interest thereon, when due, the Director of Finance may recover at law the amount of such taxes, penalties and interest in any county or district court of the county wherein the taxpayer resides or has his place of business, or in said courts in El Paso County.
 - C. The return of the taxpayer or the assessment made by the Director of Finance, as herein provided, shall be prima facie proof of the amount due.
 - D. The City Attorney is hereby authorized upon request by the Director of Finance to commence any legal action or suit for the recovery of the tax due under this Article. (Ord. 76-168; 1968 Code § 3-104)
- B) 3. The amount paid in accordance with the terms of the compromise. (Ord. 76-168; 1968 Code § 3-105)

7-2-1204: COMPROMISE:

- A. Compromise Limitation. The Director or his delegate may compromise to the extent of one thousand dollars (\$1,000.00) any civil or criminal case arising under this Article, prior to reference to the City Attorney's office for prosecution or defense; and the City Attorney or his delegate shall, upon the written direction of the Director, compromise any such case after reference to the City Attorney's office for prosecution or defense.
- B. Compromise Record. Whenever a compromise, in value or valuation, of one thousand dollars (\$1,000.00) or less is made by the Director or his delegate in any case, there shall be placed on file in the office of the Director or his delegate the opinion of the Director with his reasons therefor, which may include financial inability of the taxpayer to pay a greater amount, with a statement of:
 - 1. The amount of tax assessed;
 - 2. The amount of interest, additional amount, addition to the tax, or assessable penalty, imposed by law on the person against whom the tax is assessed; and

PART 3 PRECIOUS OR SEMI-PRECIOUS METAL OR STONE ARTICLES

SECTION:

- 8-5-301: Purpose
- 8-5-302: Definitions
- 8-5-303: License Required
- 8-5-304: Records Required; Identification Required
- 8-5-305: Retention Requirement
- 8-5-306: Inspection; Seizure
- 8-5-307: Prohibited Acts
- 8-5-308: Exceptions

8-5-301: PURPOSE: The high value of precious or semi-precious metal and stone articles has resulted in an increase in the theft of such articles. The City hereby finds and determines that law enforcement officers are hindered in the identification and recovery of stolen precious or semi-precious metal and stone articles because of the ease with which such articles are transferred to and disposed of by third parties. The City further finds and determines that law enforcement officers are hindered in the discovery and identification of persons selling stolen precious or semi-precious metal and stone articles because of the absence of any record-keeping system by persons purchasing the articles. Furthermore, the requirement of a retention period by persons engaged in the purchase of precious or semi-precious metal and stone articles is necessary to assist the Police Department in the recovery of such articles on behalf of the rightful owner. Accordingly, in the interest of safeguarding the public health, safety and welfare, it is the intent of the City, by enacting this Part to aid law enforcement officers in the discovery and identification of sellers of stolen precious or semi-precious metal and stone articles by requiring a license of businesses engaged in the buying of precious or semi-precious metal or stone articles, by providing a mandatory record-keeping and reporting system by businesses and by providing a retention period during which such articles may not be altered or disposed of. The term "repeated" shall mean conviction of three (3) or more moving traffic violations during the period for which the license was issued.

- B. Any suspension or revocation shall be noted on the driver's record, together with a statement of the reasons therefor, and the driver shall be deprived of the identification card and license issued by the Licensing Officer pursuant to this Part. In cases of suspension the card and license shall be returned to the licensee at the expiration of the period of suspension.
- C. No driver whose license has been revoked shall again be licensed as a taxicab driver in the City except upon a new application made to the Licensing Officer in accordance with this Part. The Licensing Officer shall hold a hearing at which the applicant shall have the burden of establishing to the satisfaction of the Licensing Officer that another license should be issued to the applicant. No application shall be considered by the Licensing Officer prior to twelve (12) months following the date of revocation. (Ord. 83-305)

- a. Discontinuance of Service: The Colorado Springs Department of Utilities may not discontinue the service of any customer for

- C3a) violation of the Code of the City or for nonpayment of any sum due for utility service, deposits, or other tariff charges, except as herein provided.

b. Requirement for Written Notice:

(1) Written notice of proposed discontinuance of service must be mailed by first class mail, or delivered at least ten (10) days in advance of the proposed date, advising the customer that service will be discontinued, the amount past due, and the date the past due amount shall be paid to avoid discontinuance.

(2) A notice of discontinuance shall be conspicuous in nature and in easily understood language. The heading of the notice shall contain, at a minimum, the following warning written in English:

THIS IS A FINAL NOTICE OF DISCONTINUANCE OF SERVICE.

The heading shall also contain the same warning written in Spanish, with an additional sentence at the end of the warning stating in Spanish:

IF YOU DO NOT READ ENGLISH, YOU SHOULD REQUEST SOMEONE WHO UNDERSTANDS SPANISH AND ENGLISH TO TRANSLATE THIS NOTICE FOR YOU.

(3) At a minimum, said notice shall advise the customer:

(b) That a residential customer may avoid discontinuance of service by doing one of the following before the discontinuance date:

- A. Paying the total amount due on the notice,
- B. Making arrangements for a payment plan,

C3b3b) (cont.)

Also, a hearing may be provided to resolve any dispute concerning the discontinuance of utility service if the request is made before the discontinuance date.

(c) Of major Federal, State or local government agencies, known to the utility, which provide customer assistance or benefits relating to utility service (unintentional error, by omission or incorrectness, in providing such information shall not render the notice void).

c. Third Party Notification: In the event the customer has previously executed a third party notification form indicating a third party to whom notices of discontinuance are to be sent, written notice also shall be mailed by first class mail or delivered at least ten (10) days in advance of the proposed discontinuance date to said third party. The utility shall furnish a third party notification form to each new residential customer. Moreover, the utility shall inform its residential customers at least annually of the availability of the third party notification form and a method for obtaining a copy of the form. The customer, at his option, may mail or deliver to the utility such third party notification form, which form shall be signed by both the customer and the third party (or their legal representatives) to be notified in the event of possible discontinuance of service. Said third party notification form shall be substantially in the following format:

Name of Customer
Street Address of Customer

d. Diversion: Noticing requirements shall not apply and utility service may be discontinued without notice if bypassing, tampering or unauthorized metering exists as defined in the Code of the City.

C3) e. The Foregoing Requirements for Notice to Customers may be Waived when:

(1) In the opinion of the utility, an immediate discontinuance of service to the premises is imperative for reasons of safety. Such reasons might include, but are not restricted to, a condition or installation involving any part of the customer's or the utility's lines, pipes, apparatus or appliances found to be dangerous to life, health or safety of any person, or which may result in damage to property.

(2) Discontinuance is ordered by any properly constituted governmental authority due to alleged violations of the ordinances, resolutions, statutes, or regulations applicable to the service. The utility shall not be responsible for ascertaining such conditions.

(3) Service, having been discontinued in accordance with this subsection, is restored by someone other than authorized utility personnel.

f. Multi-Unit Dwellings:

(1) In situations involving multi-unit dwellings known by the Department of Utilities to exist, where the utility service is recorded on master meters, the Department of Utilities, at least thirty (30) days prior to the proposed date of discontinuance, shall make every reasonable effort to deliver or mail a written notice to each individual unit advising that a notice of discontinuance has been sent to the party responsible for payment of utility bills. In addition, a notice to the occupants shall be posted, to the extent possible, in at least one of the common areas of the multi-unit dwelling. Said notice shall state that the occupants of the dwelling units may avoid discontinuance by paying the next regular bill, exclusive of all arrears, in full with cash or certified funds within thirty (30) days of its issuance and successive bills within thirty (30) days of issuance and how to contact the utility for additional information or to make arrangements to receive a copy of future bills.

(2) Service may not be discontinued if the party responsible for payment pays the amount on the notice or if the occupants pay each future bill within thirty (30) days of issuance.

C3f) (3) Occupants shall not be entitled to installment payments or any payment plan other than paying each bill in full within thirty (30) days of issuance to avoid discontinuance.

(4) Service may be discontinued, without further notice or attempt at personal contact for failure of the occupants to pay each bill within thirty (30) days of issuance.

g. Discontinuance for Nonpayment: Except as provided in paragraph (e) of this subsection, a customer's service shall not be discontinued for nonpayment:

(1) Of any sum which has not appeared on a notice of discontinuance. The discontinuance date must be specifically indicated on the notice and shall be no earlier than ten (10) days subsequent to the mailing or delivery of the notice.

(2) Of any sum which is less than thirty (30) days past due, except for deposits or other extenuating circumstances.

(3) Of any amount due on any other account on which the customer was not a user or applicant, unless the customer obtained service through subterfuge.

(4) Of any sum due from a previous occupant of the premises who was a customer. However, the Department of Utilities may decline to continue to furnish service at the same premises if it is apparent the service is being obtained by subterfuge in any manner.

(5) Of any indebtedness except as incurred for services rendered by the Department of Utilities within the Department's service area.

(6) Between twelve o'clock (12:00) noon on Friday and eight o'clock (8:00) A.M. the following Monday, or between twelve o'clock (12:00) noon on the day prior to and eight o'clock (8:00) A.M. on the day following any holiday observed by the Department of Utilities.

(7) Until the Department of Utilities has made a reasonable effort to advise of the proposed discontinuance in person.

C3g) (8) If the full amount shown on a notice is paid. Payments must be received in the Department of Utilities' business office during normal business hours or by a utility employee authorized to receive payment.

(9) If, on or before the expiration date of a notice of discontinuance, the customer makes acceptable arrangements.

(10) If a residential customer presents a medical certificate, as herein provided.

h. Restoration of Service: Service must be restored within twelve (12) hours (unless extenuating circumstances prevent restoration) after the customer satisfies any one of the following provisions:

(1) Pays, in full, the amount shown on a notice of discontinuance and any reconnection charges (provided elsewhere in the Code of the City).

(2) Makes acceptable payment arrangements.

(3) Presents a medical certification as herein provided.

(4) Notifies the Department of Utilities, and such information is confirmed, that the cause of discontinuance has been corrected.

i. Safety and Health; Nondiscontinuance or Restoration:

(1) Medical Certificate: A medical certificate is a document signed by a physician licensed by the State of Colorado stating that discontinuance of service would be especially dangerous to the health or safety of the residential customer, or a permanent resident of the customer's household, or that it would create a medical emergency. In the event a medical certificate is received by the Residential Accounts Section of the Department of Utilities, service may not be discontinued, or if already discontinued must be restored. The period of nondiscontinuance of service shall be effective for sixty (60) days from the date of said medical certificate. One thirty (30) day extension of service may be effected by receipt of a second medical certificate

- C3i1) in the Residential Accounts Section of the Department of Utilities prior to the expiration of the initial sixty (60) day period. A maximum of ninety (90) days per household will be granted in any consecutive twelve (12) month period, said period to begin on the date the first medical certificate is presented.

(2) A customer who invokes this Section may request a payment arrangement on or before the last day covered by a medical certificate or extension thereof. A customer who already has entered a payment arrangement and who has not broken arrangements prior to invoking this Section may renegotiate the payment arrangement to include any installments missed during the certification period. Renegotiation must occur on or before the last day covered by a medical certificate or extension thereof. A customer who has entered a payment arrangement but has broken arrangements prior to invoking this Section must pay, on or before the last day covered by the medical certificate or extension thereof, all amounts that would have been paid up to that date had arrangements not been broken, and resume the payment arrangement in order to avoid discontinuance of service.

j. Reconnection of Service: A charge of fifteen dollars (\$15.00) will be made for the reconnection of each meter.

- D. 1. Until paid, all charges imposed by Part 6 of Article 4 of this Chapter (Water Code) and Part 6 of Article 5 of this Chapter (Wastewater Treatment Code), shall constitute a perpetual lien on and against the property connected to or served by the water system and the wastewater treatment system of the City, respectively, which may be recorded against the property at any time thereafter, and shall be chargeable against the owner of the property at the time of use of the service or the owner's successors in interest to the property. In the event that any charge imposed by this Chapter shall not be paid when due, the Director may issue a notice to the owner of the property or the user or both, setting forth the amount of the charge due and payable, identifying the property connected to the water or wastewater system for which the charge is delinquent and stating that the City claims a perpetual lien on and against said property for the unpaid charge. Such notice shall

- D) be verified by the Director and filed with the clerk and recorder of the county in which said property is located. Until paid, such charge shall constitute a perpetual lien on and against the property served, and such lien may be foreclosed in the same manner as provided by the laws of the State of Colorado for the foreclosure of mechanic's liens.

2. In the event that any user charge imposed by this Chapter for water or wastewater service shall not be paid when due, the Director may issue a notice to the owner of the property or the user or both, setting forth the amount of the charge due and payable and identifying the property connected to or using the water or wastewater system for which the charge is delinquent. Such notice shall be verified by the Director and filed with the City Clerk. The City Clerk shall certify the charge to the County Treasurer to be placed upon the tax list for the current year and to be collected in the same manner as taxes with a ten percent (10%) penalty thereon to defray the costs of collection. All laws of the State of Colorado for the assessment and collection of general taxes and the redemption of same shall apply to said charges.

- E. The remedies of the City as set forth in this Section shall be cumulative and not alternative and the City may pursue any such remedy either singly or in combination as it may deem necessary and appropriate. (Ord. 79-10; Ord. 80-148; Ord. 83-223; Ord. 84-122; 1968 Code § 9-14-1202)

12-1-305: DEPOSITS:

- A. Subject to the provisions of this Section, the Department of Utilities may require a deposit from a user of the utility system of the City as a guarantee of payment of current user charges. Such deposit shall be in an amount not to exceed the estimated charges of such user for a ninety (90) day period.
- B. The Department of Utilities shall not require a deposit pursuant to this Section from a residential user unless such user has a payment record with the Department of Utilities which includes recent and/or substantial delinquencies. Any such deposit from a residential user shall be refunded in full upon satisfactory payment of charges for an uninterrupted twelve (12) month period.

- C. The Department of Utilities shall require a deposit pursuant to this Section from all commercial users. Any such deposit from a commercial user shall be refunded in full upon satisfactory payment of charges for a minimum three (3) year uninterrupted period.
- D. Any deposit required and made pursuant to this Section for electric, natural gas, water or wastewater service shall accrue simple interest at a rate and under the terms and conditions as determined by the City Council.
- E. Interest paid on any deposit required and made pursuant to this Section shall be earned for the time such deposit is held by the Department of Utilities, and shall be calculated from the date the deposit is received by the Department to the date the deposit is returned to the user, either in cash or by credit to the user's account. Payment of interest shall be made upon return of the deposit or annually upon request of the user, and at the option of the Department may be made in cash or by a credit to the user's account.
- F. No deposit required and made pursuant to this Section shall relieve any user from payment of current user charges as they become due and payable, nor shall any such deposit be applied by the Department of Utilities to any indebtedness of the user except for utility charges due or past due after termination of service. (Ord. 78-206; Ord. 80-148; Ord. 83-223; 1968 Code § 9-14-1401)

**12-1-306: BUDGET BILLING PLAN;
RESIDENTIAL:**

- A. Residential customer may, at their option, elect to pay future monthly bills on the Department's budget billing plan.
- B. Any residential customer electing the budget billing plan shall be on the plan for all utility services purchased from the Department and will pay a total monthly amount for the service address as follows:
 - 1. A monthly amount (rounded to the nearest dollar) equal to one-eleventh ($\frac{1}{11}$) of the total of the most recent twelve (12) months' consumption data (any unavailable consumption data required will be estimated by the Department) calculated at the rates in effect at the time of application; and

- B)
 - 2. A monthly amount (rounded to the nearest dollar) equal to one-twelfth ($\frac{1}{12}$) of any unpaid balance which has previously been billed including current bills, amounts past due, collection fees, miscellaneous service charges, short check charges, amounts transferred from other accounts, bad debts, or other fees (excluding deposits and amount due as a result of bypassing, tampering or unauthorized metering) as provided for in the City's ordinances, resolutions and tariffs; and,
 - 3. For successive budget billing years, a monthly amount (rounded to the nearest dollar) equal to one-twelfth ($\frac{1}{12}$) of the difference between the total of the twelve (12) months' budget billing and the actual billings for the previous budget billing year. If this difference is a credit, it will be applied to the next year's budget bills unless the customer requests the Department to refund the credit by issuing a check.
- C. The first budget bill payment is due on the due date of the first bill issued by the Department after the customer has elected to use the budget billing plan.
- D. The customer will continue on the budget billing plan for the succeeding year unless the Department is notified that the customer wishes to return to the regular billing procedure.
- E. If a customer on the budget billing plan fails to pay the budget billing obligation by the due date, the Department's normal collection and termination procedures will be applicable.
- F. If a customer on the budget billing plan terminates service in less than twelve (12) months, the entire outstanding amount of the account for actual consumption and/or delinquencies shall be due and payable on the due date of the final bill. A credit balance shall be refunded or transferred to another account.
- G. The Department may adjust the monthly budget billing amount because of changes in its base rates and for unusual gas cost changes from the Department's gas supplier authorized by the appropriate regulatory agency. Gas cost changes shall be considered unusual when such changes would result in a ten percent (10%) or more increase or decrease in customer's anticipated annual billing for gas service. The monthly budget billing amount will not be adjusted for changes in the fuel cost adjustment (FCA). The monthly budget billing amount may

- G) also be adjusted due to changes in consumption patterns, service conditions or by mutual agreement between the customer and Department. (Ord. 84-122)

12-1-307: BAD CHECK CHARGE: The Department will assess a charge of seven dollars (\$7.00) for each bad check received. (Ord. 84-122)

12-1-308: DISPUTE RESOLUTION PROCEDURE:

- A. Any user's or customer's dispute concerning any utility matter, including without limitation, billing errors and omissions, termination of service, line extensions, or violations of regulations, may be reviewed and determined by the following procedure:

1. Informal Hearing by Division Manager.

(a) Any user or customer of the utility who wishes to dispute an action of the Department of Utilities concerning the customer's utility service or proposed utility service may request an informal hearing to resolve the dispute. The matter shall be informally heard and determined by the manager of the appropriate division of the Department of Utilities or by the Director's designee within three (3) working days of the request unless the time is extended by the manager for good cause. The managers of each division are authorized to establish procedural regulations governing the informal hearing process.

(b) If the user or customer is not satisfied with the results of the informal hearing, he may file a written request for review of the disputed decision with the manager of the appropriate division of the Department of Utilities or his designee within two (2) working days of the decision unless the time is extended by the manager for good cause.

2. Review of Manager's Decision. The written request for review of the disputed decision shall be referred to the Director of Utilities; who may assign the matter to a hearing officer for a formal hearing, determine it himself or refer it to City Council.

3. Formal Hearing Procedure. If a dispute is assigned by the Director to a hearing officer, a

- A3) formal hearing shall be conducted by the hearing officer, who shall be an employee or other representative of the Utilities Department to hear such disputes. The hearing officer shall be a person who had no previous involvement with the user's or customer's dispute. The formal hearing shall be conducted as follows:

(a) The formal hearing shall be held within five (5) working days of the customer's written request, unless the time is extended as necessary to meet the Department's or customer's scheduling needs.

(b) During the formal hearing, the customer shall have the right to present testimony or evidence concerning any matter relevant to the disputed decision and to cross-examine witnesses. The Department shall have the right to present any matter relevant to the disputed decision and to cross examine witnesses. The customer and the Department may be represented by an attorney. A tape recording of the proceeding shall be kept. A copy of the recording or a transcription of it shall be available to the customer upon payment of the cost of reproduction or transcription. The customer shall be required to make a deposit of the estimated costs in advance.

(c) At the conclusion of the formal hearing, the hearing officer may announce his decision or inform the parties that he will render a written decision within ten (10) working days. The hearing officer shall determine whether the disputed decision was in accordance with the Utilities Department's controlling rates, policies and regulations.

(d) The burden of proof shall be on the Department to establish that the disputed decision is consistent with the rates, policies and regulations of the Department.

A,3) (e) If the hearing officer determines that the Department has acted properly with respect to the disputed decision, the hearing officer shall advise the customer of the customer's right to request an appeal to the City Council to reverse the hearing officer's decision in accordance with subparagraph (f) of this Section.

(f) Appeals on matters determined by the hearing officer shall be made to the Director of Utilities, who shall refer the request to appeal to the City Manager to place the matter on the City Council agenda, unless the appeal appears to be groundless or frivolous or taken for the sole purpose of delay. The customer must make a written request to appeal to City Council within five (5) working days of the decision of the hearing officer. Requests to appeal which are late shall be deemed void and shall not be considered.

4. Dispute Resolution by the Director of Utilities. Resolution of disputes to be determined by the Director of Utilities shall be as follows:

(a) Disputes to be determined by the Director of Utilities shall be heard informally within five (5) working days of the receipt of the customer's written request for review of the disputed decision, unless the time is extended by the Director for good cause.

(b) The customer may present relevant evidence or testimony concerning the disputed decision. The customer may be represented by an attorney and may cross-examine witnesses. The person who made the disputed decision for the Department may present relevant evidence or testimony, may be represented by an attorney and may cross-examine witnesses. A tape recording of the proceeding shall be kept.

(c) The Director shall make a written determination of the dispute within ten (10) working days.

(d) If the customer is not satisfied with the decision of the Director, he may request an appeal to the City Council. The customer must make a written request to appeal the decision to the Director within five (5) working days of the Director's decision. The Director shall refer the request to appeal to the City Manager to place the matter on the City Council agenda, unless the appeal appears to be groundless, frivolous or taken for the sole purpose of delay.

A) 5. Review by the City Council.

(a) On a customer's appeal to the City Council from a decision of the hearing officer or on appeal from the decision of the Director, unless the City Council determines otherwise, the City Council shall make its determination from a review of the record. All other cases are subject to a public hearing to determine the appeal.

(b) The decision of the Council shall be final.

B. Except as provided in this Chapter, or in the case of a hazardous condition, during the pendency of the informal hearing process regarding any dispute of any utility matter, the customer's service shall not be terminated, and the status quo shall be maintained pending determination of the informal hearing.

C. Except as provided in this Chapter, or in the case of hazardous condition, during the pendency of a customer's appeal of any dispute of any utility matter, after the initial informal hearing, where the customer's service has been or will be terminated, the customer's service shall be continued (1) in the case of nonpayment for service, if the customer deposits with the Department the amount claimed to be due, or (2) in the case of violation of a rate, ordinance, regulation, law, or statute, if the customer complies with the rate, regulation, ordinance, law or statute pending the appeal.

D. The Department may adopt necessary rules and regulations further defining this dispute resolution procedure not inconsistent with the provisions of this Section. (Ord. 83-223)

In any event, distribution mains shall be extended by the owner or developer of premises to be served by such mains to a point which permits the shortest possible service line between the distribution main and the property line of the premises served thereby. Thereafter said distribution mains shall be extended to adjoining premises in compliance with the latest edition of Standard Specifications for Water Main Installations as promulgated, supplemented and amended by the Manager pursuant to Part 3 of this Article. Extensions shall not be made for remote or isolated service unless the applicant requesting such service shall provide for the cost of such extension to the point of service and such extension is approved by the Manager. 2. In the event that a previously used service line is not used for a continuous period of five (5) years or more, such service line shall be deemed to be abandoned, unless a letter of agreement is entered into between the customer and the Department. When a service line is deemed to be abandoned, there shall be no further obligation on the Department to provide water to that service line. The obligation to serve shall not again arise except upon reapplication in accordance with all ordinances then applicable and the payment of all fees due at the time of the reapplication. 12-4-601: WATER FACILITIES; COST:

- A. A property owner or developer shall be responsible for the cost and construction of all water distribution mains, up to and including twelve inches (12") in diameter, and the appurtenances thereto, including any required fire hydrants necessary to serve the property or development upon approval by the City of the plans and specifications of such facilities and appurtenances. The City shall inspect and approve the actual construction prior to connection of such facilities.
- B. When an owner or developer finds it necessary to construct water supply and distribution facilities through or adjacent to unserved or undeveloped lands, such owner or developer shall pay the entire cost of such facilities. However, the City shall agree in writing with such owner or developer to assist in the collection of a prorata share of the actual cost of such facilities from the owner of such unserved or undeveloped lands at the time of connection to the facilities and refund such cost to the owner or developer.

- C. In the event that water pumping facilities are required, the cost of such facilities shall be the responsibility of the owner or developer of the property served; provided, however, that the Department of Utilities shall provide the necessary engineering at no expense to the owner or developer. Where it appears that more area or lands may be served by the water pumping facilities, the City may require a greater pumping capacity than necessary to service the initial development. Where such greater capacity is required, the City shall agree in writing with the owner or developer to assist in the collection of a prorata share of the actual cost of such facilities from the owner of property served by such facilities at the time of connection to the water system and shall refund such share of the cost to the owner or developer.

- D. 1. An owner or developer who is a party to a recovery agreement with the City shall provide a complete detailed summary of all construction costs to the Division within ninety (90) days after completion of construction. Failure to provide such construction cost information shall relieve the City of responsibility to assist in the collection of a prorata share from subsequent connectors; provided, nothing contained herein shall relieve a subsequent connector from the obligation to pay a reasonable cost of construction, such reasonable cost to be determined by the Manager on the basis of the best information available to him at the time.

2. The owner or developer and the Manager shall jointly determine the service area of the facilities constructed by the owner or developer and shall jointly determine a recovery charge, which normally shall be on per-front-foot basis. In the event that the owner or developer and the Manager shall fail to agree, the determinations of the Manager shall be subject to review by the Director, whose decision shall be appealable to City Council.

3. The owner or developer's right to reimbursement under the provisions of the

- D,3) recovery agreement shall not exceed the actual construction costs for a period of twenty (20) years from execution of the agreement unless the City Council shall approve a contract period exceeding twenty (20) years.
- E. The Manager may require that a property owner or developer construct a distribution main larger than that required for his needs for the service of lands beyond the property or development. In the event the Manager determines that construction of a distribution main over twelve inches (12") in diameter is necessary for the efficient expansion of the water supply system, an owner or developer served thereby shall be responsible for the costs for installation of such main, except that the City shall be responsible for the difference between the cost of materials for a twelve inch (12") main and the cost of such materials for such larger main. (Ord. 80-148)

12-4-602: INSTALLATION COST: All costs and expenses incidental to the installation and connection of a service line from the distribution main to the premises shall be borne by the owner of such premises. The owner shall indemnify the City for any loss or damage to the City that may directly or indirectly be occasioned by installation of such service line. (Ord. 80-148)

The connection charge shall consist of a tapping charge and a water development charge and, if the area to be served is subject to an outstanding recovery agreement, shall also include a recovery agreement charge. (Ord. 80-148)

12-4-604: TAPPING CHARGE:

- A. A tapping charge shall be assessed for each connection of a service line to the distribution main and shall be collected prior to issuance of a tapping permit. Application for such permit shall be made to the Department of Utilities and upon approval of such application, the permit shall only be issued to a master plumber. Such charge shall defray the cost of materials, inspection and labor incident to connection of

- A) the service line.
- B. The amount of the tapping charge imposed by this Section shall be based upon the type and size of the main and the size of the service line in accordance with a schedule which shall be effective upon adoption by resolution of City Council. (Ord. 80-148)

12-4-605: WATER DEVELOPMENT CHARGE:

- A. A water development charge shall be assessed for each new connection to the water supply system of the City to partially compensate the City for the base water supply required for each service. The fees and charges provided herein shall only be increased by the same percentage as the average residential charge for water service is increased and to be effective upon such increase.
- B. A water development charge shall be assessed for each single-family, commercial or industrial service, and shall be collected prior to the issuance of a building permit, in amounts as follows:

Permits for connection or disconnection shall be issued only to master plumbers. Discharge permits for significant industrial users, significant commercial users, and significant waste generators shall be required as provided in Part 11 of this Article in addition to the connection permit. (Ord. 86-186)

12-5-503: **UNAUTHORIZED CONNECTIONS PROHIBITED:** It shall be unlawful for any unauthorized person to uncover, enter, insert equipment, make any connections with or openings into, use, alter or disturb any collection line or appurtenance thereof, without first obtaining written permission from the Manager and such connections shall be made in compliance with Building and Plumbing Codes, Wastewater Division Rules for Installation of Sewer Mains and Services and other applicable rules and regulations of the City. The connection and testing required by the Division shall be made under the supervision of the Manager. The City shall not be subjected to any liability for any deficiency or defect which is not discovered by inspection nor shall the owner or developer of such premises be absolved from liability for such deficiency or defect and any resulting damage or from responsibility to correct such deficiency or defect. (Ord. 86-186)

12-5-505: **COLLECTION LINES; MANNER OF EXTENSION:** Collection lines to collect and intercept wastewater from and throughout areas or additions shall be extended by the owner and/or developer of premises to be served by such lines from the existing collection line to the farthest point

or points upgrade of such premises. If the Manager determines that extension of collection lines to the farthest point or points upgrade is not necessary for efficient expansion of the wastewater treatment system, the Manager may waive the requirement of such extension. In any event, collection lines shall be extended by the owner and/or developer of premises to be served by such lines from the existing collection line to a point which permits the shortest possible service line between the collection line and the property line of the premises served thereby. Thereafter said collection lines shall be extended to adjoining premises in compliance with the latest edition of the Wastewater Division Rules for Installation of Sewer Mains and Services as promulgated, supplemented and amended by the Manager, as provided in Part 3 of this Article. 12-5-507: SERVICE LINES; SEPARATE FOR EACH BUILDING; EXCEPTIONS:

A separate and independent service line shall be provided for every building. However, where one building stands at the rear of another on an interior lot cannot be subdivided, and for which no line is available nor can be constructed to the rear building through an adjoining alley, court, yard or driveway, the service line of the front building may be extended to the rear building and the whole considered as one service. Multi-family or commercial or industrial complexes having more than one building on a single platted lot may have the individual buildings connected to a single common service line, unless and until such lot is resubdivided or the buildings otherwise become separately owned in which case independent connections shall be made. Waiver of this requirement for a separate and independent service line, may be granted by the Manager upon resubdivision or creation of separate

ownership of individual buildings on a single lot with existing multi-family or commercial, but not industrial complexes. Such a waiver shall be granted upon showing that the service lines owned in common will be maintained by an entity of the owners of the separate buildings. By regulation, the Manager may provide for additional requirements to assure proper maintenance and repair of the common service lines, and, if necessary, monitoring of effluent quality or quantity. The City does not assume any obligation nor acquire any liability for damage to the connecting property or any portion thereof caused by or resulting from any such connection to the wastewater system as aforementioned. (Ord. 86-186)

12-5-508: SERVICE LINE; CONSTRUCTION TO CONFORM TO RULES AND REGULATIONS:

The size, slope, alignment and materials of construction of a service line, and the methods to be used in excavating, placing of the pipe, jointing, testing and backfilling the trench, shall all conform to the requirements of the Building and Plumbing Codes and the Wastewater Division Rules for Installation of Sewer Mains and Services and other applicable rules and regulations of the City. (Ord. 86-186)

12-5-509: SERVICE LINE; USE OF GRAVITY FLOW:

Whenever possible, the service line shall be brought from the building at an elevation below the basement floor. In all buildings in which any building drain is too low to permit gravity flow to the collection line, wastewater carried by such building drain shall be lifted by means approved by the Regional Building Official and discharged to the wastewater system. (Ord. 86-186)

12-5-510: SERVICE LINE; MAINTENANCE OF:

- A. The owner of any premises connected to the City's wastewater treatment system shall be responsible for the maintenance of the service line and appurtenances thereto, from and including the connection to the collection line to the premises served. The owner shall keep such line in good condition and shall replace, at his expense, any portions thereof which, in the

- B. In the event that more than one premises are connected to a single service line, the owners of the respective premises shall be jointly and severally responsible for the maintenance and repair requirements imposed by this Section.
- C. Prior to repair or alteration of the service line, a permit must be obtained from the Division. A permit fee shall be imposed to cover the costs of the inspection. This inspection shall assure that ordinances and rules applying to the wastewater system are met. The City shall not be subjected to any liability for any deficiency in the repair or alteration of such premises, be absolved from liability for such deficiency or defect and any resulting damage or from responsibility to correct such deficiency or defect. (Ord. 86-186)

USE: Old wastewater lines may be used in connection with new buildings only when they are found, on examination by the Manager, to meet all requirements of this Article and to be compatible with the proposed use. If found unacceptable for future use, the owner shall be required to excavate the line at the point of connection to the collection line and cap the connection as required by the Wastewater Division Rules for Installation of Sewer Mains and Services. (Ord. 86-186)

12-5-512: CONSTRUCTION; REQUIREMENTS FOR COMMENCEMENT AND COM-

PLETION: Construction of a building or facility to be served by a wastewater connection shall be commenced within one hundred twenty (120) days from the date of payment of connection charges or issuance of a permit, and such construction shall be pursued to completion without suspension or abandonment, as set out in the Uniform Building Code under Building Permits, Section 302(d).¹ Failure to comply with the above regulations will result in cancellation of the permit and return of connection charges paid less the cost to the Division incurred to determine such noncompliance. (Ord. 86-186)

12-5-601: WASTEWATER FACILITIES; ALLOCATION OF COST:

- A. Except as otherwise provided herein, a property owner or developer shall be responsible for the costs and construction of all wastewater facilities and the appurtenances thereto in and through his property or development upon approval of the plans and specifications by the City as provided in Chapter 13 of this Code. The City shall inspect and approve the actual construction, prior to connection of structures.
- B. The Manager may require the property owner or developer to construct a collection line larger than that required for his needs for the service of lands adjacent to his property or development, in which case the City may enter into a recovery agreement with the owner or developer to collect a prorata share of the costs of such construction from the owner of the adjacent lands at the time of their connection and refund such costs to the owner or developer. When an owner or developer finds it necessary to construct wastewater facilities through or adjacent to unserved or undeveloped lands, the owner or developer shall pay the entire cost of such facilities. However, the City may agree in writing with the owner or developer to collect a prorata share of the costs from the owner of property served by such facilities at the time of connection to the wastewater system and shall refund such cost to the owner or developer.
- C. In the event that pump stations and force mains are required, the cost of constructing said stations and mains shall be the responsibility of the owner of property served thereby. Where it appears that more area or lands may be served by the pump station and force mains, the City may require a larger capacity than necessary to serve the initial development. Where such larger capacity is required, the City may enter into a recovery agreement with the owner or developer to collect a prorata share of the costs from adjacent lands at the time of their connection and refund such costs to the owner or developer.
- D. In those instances where pump stations and force mains are required, the wastewater system shall be designed where possible so as to permit an eventual connection into a gravity system with a minimum of expense. Where practicable, easements shall be provided and lines constructed to tie into the gravity system. The City may require deposits from the property owners requiring said force system, where deemed necessary, to pay for the eventual construction of gravity lines.
- E. Recovery Agreement:
1. If an owner or developer desires to enter into a recovery agreement with the City, he shall submit a notice of intent prior to the start of construction, and he shall provide a complete detailed summary of all construction costs to the division within one hundred twenty (120) days after the date of preliminary acceptance notice by the City.
 2. The owner or developer and the Manager shall jointly determine the service area of the facilities constructed by the owner or developer, and shall jointly determine a per-front-foot, per-lot or per-acre recovery charge for said service area. In the event that the owner or developer and the Manager shall fail to agree, the determination of the Manager shall be final for the purpose of review by the Director and/or City Council.

- E) 3. The amount of the recovery charge shall be computed by the following formula:¹

$$X = \frac{a(1 + (b + .03)^5)}{c}$$

X = unit recovery charge (per front foot, per lot or per acre);

a = total construction cost; excluding the cost of service lines.

b = New York prime interest rate prevailing at the time the computation of the recovery charge is made, expressed as a decimal;

c = the number of equal or nearly equal units upon which recovery is to be based, whether front-feet, lots or acres served by the facilities.

4. The owner or developer's rights to reimbursement under the provisions of the recovery agreement shall not exceed the construction costs plus the interest factor for a period of twenty (20) years from execution of the agreement, unless the City Council shall approve a contract period exceeding twenty (20) years.

- F. All costs incidental to or resulting from the procurement by the City of any required easement or right of way, whether obtained by dedication, contract, condemnation or otherwise, shall be borne by the owner or developer. (Ord. 86-186)

12-5-602: INSTALLATION COST: All costs and expenses incidental to the installation and connection of service lines from the collection line to the premises shall be borne by the owner of such premises. The owner shall indemnify the City for any loss or damage to the City that may directly or indirectly be occasioned by the installation of such service line. (Ord. 86-186)

12-5-603: CONNECTION CHARGE: In each lot, area, territory, subdivision or addition, inside or outside the City limits, for which a request for wastewater connection or addition to the wastewater treatment system of the City shall be made, there is and shall be a connection charge for each service line in said areas. Said connection charge shall consist of a permit charge and a system development charge, and may also include recovery agreement charges. (Ord. 86-186)

12-5-604: PERMIT CHARGE: A permit charge shall be assessed for each connection to the wastewater treatment system of the City to defray the costs of administration and inspection. Such charge shall be assessed and collected prior to issuance of a permit to connect, in amounts as follows:

A. Residential:

1. For each one-family dwelling or mobile home, as those terms are defined in Section 14-1-109 of this Code, the amount of the permit charge shall be twenty three dollars (\$23.00) for each such premises.

2. For each dwelling unit of all common wall multi-family residential construction, which may be described as an apartment, condominium, townhouse, stacked housing or other name form for multi-family housing, permanent or transient, the amount of the permit charge shall be fifteen dollars (\$15.00) for each dwelling.

- B. Commercial and Industrial: For each commercial or industrial premises as those terms are defined in Section 14-1-109 of this Code, the amount of the permit charge shall be fifty three dollars (\$53.00) for the first fifteen (15) fixture unit equivalents, as set out in Section 12-5-513 of this Article, and twenty dollars (\$20.00) for each additional fifteen (15) fixture units or portion thereof. (Ord. 86-186)

12-5-605: SYSTEM DEVELOPMENT CHARGE:

- A. A system development charge shall be assessed for each new connection to the wastewater system of the City to partially defray the costs of capital improvement of such system. Such charge shall be collected prior to issuance of a building permit, in amounts as follows:

1. For each residential wastewater service:

<u>Inside Corporate Limits</u>	<u>Outside Corporate Limits</u>
\$596.00	\$894.00

2. For each dwelling unit of all common wall multi-family residential construction, which may be described as an apartment, condominium, townhouse, stacked housing or other name form for multi-family housing, permanent or transient, and for each dwelling unit in a mobile home park,

1. Ed. Note: See the Utility Board minutes of June 16, 1976.

- A2) as defined in Section 14-1-109, which shall be collected prior to issuance of a building permit:

<u>Inside Corporate Limits</u>	<u>Outside Corporate Limits</u>
\$387.40	\$581.10

3. Each commercial wastewater service shall be charged at the effective rate for single-family wastewater service, as defined above, for each fifteen (15) fixture unit equivalents, as set out in Section 12-5-513 of the City Code.

4. Each service connection in a mobile home subdivision as defined in Section 14-1-109 of the City Code shall be charged at the effective rate for single-family wastewater service, as defined above.

- B. The charges provided herein shall only be increased by the same percentage as the charge for each single-family wastewater service is increased and shall be effective upon such increase.
- C. Payment of the wastewater system development charges provided herein shall be payable in full in cash at the time the building permit is issued or as directed by Council. Such charges shall not be waived for any governmental, quasi-governmental, nonprofit organization, or any other user requesting connection to the wastewater supply system of the City.
- D. Requests for a refund of charges paid under this Section shall be made in writing to the Department of Utilities within one year of payment. (Ord. 86-186)

12-5-606: RECOVERY AGREEMENT CHARGE: A recovery agreement charge may be assessed for each connection to a collection line or use of a pumping facility, where such line or facility was constructed by the City or is the subject of a recovery agreement between the City and the person who constructed such line or facility. Consistent with such agreements, such charge shall be in an amount which represents a prorata share of the cost of construction of the line or facility and shall be collected prior to issuance of a building permit. Recovery agreements existing on the effective date of this Article shall remain in full force and effect.¹ (Ord. 86-186)

12-5-607: RATES AND CHARGES; BASIS FOR:

A. Basis of Wastewater Service Charges.

1. Residential. The amount of water billed for the February billing period of each year shall be the basis for determination of the daily wastewater charge. In the case of new users, user's not using City water or changing service conditions, the Manager may designate an alternative base consumption period. The consumption established during any base period shall be used for the determination of daily wastewater user charges until a new base consumption period occurs as provided herein.

2. All Other. All nonresidential customers shall be billed based on actual water consumption for each billing period. The actual water consumption will be adjusted as determined by the Manager as follows:

(a) **Consumptive Use Allowance:** All nonresidential user classes with nonsewered use, except irrigation, which is greater than ten percent (10%) of their twelve (12) month water consumption, a consumptive use allowance shall be deducted from the monthly water volume for calculating the wastewater charge.

(b) The user of such wastewater service may install at his cost and expense a meter or meters to measure the water subject to a consumptive use allowance and which is not discharged into the wastewater system. Upon determination by the Manager that due to significant situations within the user's facility, a consumptive use allowance cannot be reliably determined within reasonable accuracy by technical evaluation, the Manager may order such user to install at the user's own cost and expense, a suitable meter or meters to measure the water subject to a consumptive use allowance and which is not discharged to the wastewater system. Upon the City's acceptance of the installation of such meters, the user shall transfer ownership of such meters to the City at no expense, for continuing ownership, operation and maintenance.

(c) **Irrigation Allowance:** Nonresidential users with one thousand (1,000) square feet or more of irrigated property shall be given an irrigation allowance based on the number of one hundred (100) square feet increments of irrigated property. The irrigation credit per one

1. The ordinance from which this provision was derived became effective February 27, 1979.

A2c) hundred (100) square feet is computed on a monthly basis for the Colorado Springs area. The computed irrigation allowance shall be deducted from the monthly water volume for calculating the wastewater charge.

B. The suspension of water service and charges therefor for any premises shall relieve such premises from the payment of the monthly wastewater service charges hereby imposed during the period that no charges are made for water. (Ord. 86-186)

12-5-608: RATES AND CHARGES; COMPUTATION OF:

A. The rates and charges computed on the basis of water used as set forth in Section 12-5-607 shall be as follows:

Customer Charge - per day \$ 0.230

Normal Quantity Charge - each
100 cu. ft.:

Biochemical Oxygen Demand (BOD)	\$0.160
Total Suspended Solids (TSS)	0.097
Volume	0.233
Total Normal Quantity Charge	\$ 0.490

Customers located outside the City limits shall be charged an additional Suburban Customer Surcharge - per day \$ 0.182

Minimum Charge - per day	
Inside the City limits	\$ 0.230
Outside the City limits	\$ 0.412

B. Residential customers not connected to the Colorado Springs Department of Utilities Water Distribution System shall be billed for a quantity of 8 Ccf per month on a daily basis and at the rates in subsection A.

C. Commercial users not connected to the Colorado Springs Department of Utilities water distribution system shall be billed based on the method prescribed by the Manager as representative of the user's wastewater contribution volume and at the rates in Subsection A.

D. Surcharge. In addition to the rates and charges imposed by subsection A, designated nonresi-

D) dential user classes will be assessed a surcharge for extra strength wastewater discharges. Designated nonresidential water classes located within and without the City, which discharge biochemical oxygen demand (BOD) and/or total suspended solids (TSS), which exceed the normal domestic strength BOD (282 mg/l) and TSS (178 mg/l), will be assessed a surcharge as determined by the Manager, which determination will be based on assigned classifications and will reflect average BOD and TSS strengths for each classification.

1. The total BOD surcharge is computed by the following formula:

$$Z = a \times b \times c$$

Z = BOD surcharge amount

a = Normal domestic BOD rate per Ccf

b = % by which the classification average discharge BOD exceed the normal domestic discharge BOD (282 mg/l)

c = Water volume used to calculate the wastewater bill

2. The total TSS surcharge is computed by the following formula:

$$Y = d \times e \times c$$

Y = TSS surcharge amount

d = Normal domestic TSS rate per Ccf

e = % by which the classification average discharge TSS exceeds the normal domestic discharge TSS (178 mg/l)

c = Water volume used to calculate wastewater bill (Ord. 86-186)

12-5-609: RATES AND CHARGES; SPECIAL:

A. Discounts: None.

B. Contract Rates: In the case of organized sewer districts, municipal corporations or other similar users of the wastewater treatment system which are furnished wastewater treatment service pursuant to contract, the rates and charges for the use of the wastewater treatment system shall be as specified in said contracts so long as said contracts or renewals thereof remain in force and effect.

C. Tertiary Water Charges: The Division may

- C. dispense nonpotable tertiary water as such waters are available. Such waters shall be dispensed only at pressures, in quantities, and at times as determined by the Manager. The charges for such waters shall be as follows:

1. Irrigation Water - \$.600 per 100 cubic feet.
(Ord. 86-186)

12-5-610: **PERPETUAL LIEN:** Until paid, all charges imposed by this Part 6 shall constitute a perpetual lien on and against the property connected to or served by the wastewater treatment system of the City. Such charges shall be determined and collected as provided in Article 1 of this Chapter. (Ord. 86-186)

ARTICLE 5 WASTEWATER TREATMENT CODE

PART 10 INDUSTRIAL WASTEWATER MONITORING AND REPORTING

SECTION:

12-5-1001: Reporting Requirements
 12-5-1002: Records and Monitoring
 12-5-1003: Inspection, Sampling and Analysis

12-5-1001: **REPORTING REQUIREMENTS:**

- A. Every significant industrial user shall file an Industrial Wastewater Discharge Questionnaire on forms provided by the Manager. Unless otherwise required by the Manager, these forms shall be completed and filed not later than thirty (30) days after receipt of the report forms from the Manager. The Manager may require any other industrial user discharging or proposing to discharge into the wastewater treatment system to file such reports.
- B. The discharge report shall indicate the current status of the user and shall include, but, in the discretion of the Manager, shall not be limited to, nature or process, volume, rates of flow, mass emission rate, production quantities, hours of operation, concentrations of controlled substances or other information which relates to the generation of waste. Such reports may also include the chemical constituents and quantity of liquid materials stored on site even though they are not normally discharged.
- C. Every industrial user shall file an amended discharge report two (2) weeks prior to any planned significant change in operations or wastewater characteristics. If such significant change occurs unknowingly or is unplanned, an amended discharge report shall be filed within seven (7) days after such change becomes known. A significant change shall mean a change which will be in effect for a period of fourteen (14) days or more and shall include but is not limited to:
 1. Change in number of shifts, an additional processing operation, any new regulated substances used which may be discharged.

- C)
 2. A twenty-five percent (25%) increase or decrease in the wastewater flow or production volume.
 3. Any other change which may alter the average normal wastewater characteristics by a factor of one and one-half (1.5) or more.
- D. All users subject to National Categorical Pretreatment Standards shall submit to the Manager a baseline monitoring report on forms provided by the Manager. Such reports shall be submitted within one hundred eighty (180) days of promulgation of the standard or earlier as the Manager deems necessary and at a minimum shall contain:
 1. The name and address of the user;
 2. The location of such user.
 3. The nature, average rate of production and standard industrial classification of the operations carried out by such user;
 4. The average and maximum flow of the discharge from such user to the POTW, in gallons per day;
 5. The nature and concentration of pollutants in the discharge from each regulated process from such user and identification of any applicable pretreatment standards and requirements. The concentration shall be reported as a maximum or average level as provided for the applicable pretreatment standard. If an equivalent concentration limit has been calculated in accordance with any pretreatment standard, this adjusted concentration limit shall also be submitted to the Manager for approval;
 6. A statement, approved by an authorized representative of the user and certified by a professional engineer, indicating whether pretreatment standards are being met on a consistent basis and, if not, whether additional operation and maintenance procedures or additional pretreatment is required for the user to meet the pretreatment standards and requirements; and

D) 7. If additional pretreatment or operation and maintenance procedures will be required to meet the pretreatment standards, then the report shall contain the shortest schedule by which the user will provide such additional pretreatment. The completion date in this schedule shall not be later than the compliance date established for the applicable pretreatment standard. For new users, this report shall be submitted thirty (30) days after receipt of the appropriate forms from the Manager.

E. 90-Day Compliance Reports:

1. New Sources: All new sources subject to existing Categorical Pretreatment Standards shall submit a report to the division within ninety (90) days from the date of first discharge demonstrating actual and continuing compliance with those standards.

2. Existing Sources: All existing sources required to comply with newly promulgated Categorical Pretreatment Standards shall submit a report to the division within ninety (90) days of the date on which compliance is required with those standards demonstrating that actual and continuing compliance with such new standards has been achieved.

3. Such 90-day Compliance Report shall contain at a minimum:

a. The nature and concentration of all pollutants in the discharge from regulated processes,

b. The average and maximum daily flow from the regulated processes, and

c. A statement of compliance signed by the authorized representative of the company and certified by a qualified professional which indicates:

i. Whether the applicable pretreatment requirements are being met on a consistent basis, or

ii. If the applicable pretreatment standards are not being met, what pretreatment procedures and equipment are necessary to attain compliance.

F. Self Monitoring Compliance Report: Any user subject to a National Categorical Pretreatment Standard, shall submit to the Manager during the months of June and December, unless required more frequently in the Pretreatment Standard or by the Manager, a self-monitoring report on forms provided by the Manager indicating the nature and concentration, of pollutants in the effluent which are limited by such Pretreatment Standards.

G. Should the Manager deem it necessary to assure compliance with provisions of this Article, any nonresidential user of the City wastewater treatment system may be required by the Manager to submit a Wastewater Discharge Questionnaire on forms provided by the Manager. Any user subject to this reporting requirement shall submit a completed report no later than thirty (30) days after receipt of the notification and appropriate forms.

H. Any holder of an Industrial Wastewater Discharge Permit, Commercial User Discharge Permit, Waste Generator Discharge Permit or Pumper Permit shall submit to the Manager such additional reports as specified as conditions of the user's permit or otherwise deemed necessary by the Manager.

I. All reports and questionnaires required to be submitted by the above provisions shall bear the signature of an authorized representative of the discharging entity attesting to the accuracy of said document. Such reports and records shall be retained by the user for a minimum period of three (3) years and shall be made immediately available upon request of the Manager. (Ord. 86-186)

12-5-1002: **RECORDS AND MONITORING:**

A. All industrial users who discharge or propose to discharge wastewater to the wastewater treatment system shall maintain such records of production and related factors, effluent flows and amounts or concentrations of controlled substances as are necessary to demonstrate compliance with the requirements of this Article and any applicable State or Federal pretreatment standards or requirements.

- B. All such records shall be retained by the user for a minimum period of three (3) years, shall be made immediately available upon request of the Manager at any time during said three (3) year period or so long as actually retained.
- C. Should the Manager deem it necessary to fulfill the purposes of this Code, the owner or operator of any premises or facility discharging industrial wastewater into the wastewater system shall install at his own expense suitable monitoring facilities or equipment which isolates appropriate wastewater discharges into the wastewater system and facilitates accurate observation, sampling and measurement of appropriate discharges. Such equipment shall be maintained in proper working order and kept safe and accessible at all times.
- D. Where practical, the monitoring equipment shall be located and maintained on the industrial user's premises outside of the building. When such a location would be impractical or cause undue hardship to the user, the Manager may allow such facility to be constructed in the public street or easement area, with the approval of the City agency having jurisdiction over such street or easement, and located so that it will not be obstructed by public utilities, landscaping or parked vehicles.
- E. When more than one user is able to discharge into a common service line, the Manager may require installation of separate monitoring equipment for each user. When there is a significant difference in wastewater constituents and characteristics produced by different operations of a single user, the Manager may require that separate service lines and connections and monitoring facilities be installed for each separate discharge.
- F. Whether constructed on public or private property, the monitoring facilities shall be constructed in accordance with the Manager's requirements and all applicable construction standards and specifications.
- G. To fulfill the purposes of this Code, the Manager may order other significant, nonresidential users of the City POTW to maintain similar records and/or install and maintain similar facilities or equipment as noted above. (Ord. 86-186)

12-5-1003: **INSPECTION, SAMPLING AND ANALYSIS:**

- A. Compliance determinations with respect to Part 8 prohibitions and limitations shall be made on the basis of either instantaneous compliance samples or composite samples of wastewater as determined by the Manager. Such samples shall be taken at a point or points which the Manager determines to be suitable for obtaining a representative sample of the discharge. Composite samples may be taken over a twenty four (24) hour period, or over a longer or shorter time span, as determined by the Manager to meet specific circumstances.
- B. Laboratory analysis of wastewater samples shall be performed in accordance with the current edition of Standard Methods for Chemical Analysis of Water and Wastewater published by the American Public Health Association, American Water Works Association, Water Pollution Control Federation and the Annual Book of Standards, Part 23, Water, Atmospheric Analysis, published by the American Society for Testing and Materials, Methods for the Chemical Analysis of Water and Wastes, published by the U.S Environmental Protection Agency, or the appropriate Technicon Industrial Method, published by Technicon Instruments Corporation. Metals analysis will use a sample preparation technique at least as rigorous as acidification to a pH of less than 2. The determination may be run on the decant, contrate, or filtrate of the acidified sample. When a sample is run using different sample preparation techniques, the highest measured concentration will be used to determine compliance. Analysis of those pollutants not covered by these publications shall be performed in accordance with procedures approved by the Manager. The test results of laboratory analysis performed by the Division in accordance with this Section shall be presumed to be correct unless shown otherwise by competent evidence.
- C. Sampling of industrial wastewater for the purpose of determining compliance with respect to Part 8 prohibitions and limitations will be performed by the Division at such intervals as the Manager may designate. However, it is the goal of this Section that the Manager conduct sampling or cause such sampling to be conducted for all major contributing industries at least four (4) times per year.

- D. The Manager shall promulgate rules, regulations and procedures as necessary to insure that any and all samples obtained by Division employees can be accounted for from the time said samples are obtained to the time said samples are disposed. (Ord. 86-186)

CHAPTER 14 ZONING

ARTICLE 1 GENERAL PROVISIONS

SECTION:

- 14-1-101: Title
- 14-1-102: Intent and Purpose
- 14-1-103: Interpretation
- 14-1-104: Regulations to Apply Within Corporate Limits of City
- 14-1-105: Development of Land Both Within and Without the City Limits
- 14-1-106: Zoning Maps, Boundaries of Zones
- 14-1-107: Conformity With Regulations Required
- 14-1-108: Zones
- 14-1-109: Definitions

14-1-101: **TITLE:** This Chapter shall be known as the "Zoning Ordinance of the City of Colorado Springs" and may be so cited and pleaded. (Ord. 80-131; 1968 Code § 14-1)

14-1-102: **INTENT AND PURPOSE:** This Chapter is designed to encourage the most appropriate use of land throughout the City to insure a logical growth of the various physical elements of the City; to lessen congestion in the streets, and to facilitate the adequate provision of transportation; to secure safety from fire, panic, and other dangers; to provide adequate light and air; to improve housing standards; to conserve property values; to facilitate adequate provisions for water, sewage, schools, parks and other public requirements; to protect against flood conditions and poor geologic conditions and in general to promote health, safety and general welfare. The regulations within this Chapter shall be made with reasonable consideration, among other things, as to the character of the district and its peculiar suitability for particular uses and with a view to encouraging the most appropriate use of land throughout the City.

It is the intent and purpose of the Zoning Ordinance to protect property values, to preserve neighborhoods and to protect private property from adjacent nuisances such as noise and excessive traffic. Certain uses are not compatible in close proximity to each other. The hours of operation of

certain liquor establishments and the noise, traffic noise and the noise in relation to the hours of operation make these uses incompatible with residential uses. The objectionable impacts of these uses on residential uses can be mitigated to some degree by a separation of uses. (Ord. 81-131; Ord. 81-149; 1968 Code § 14-2)

14-1-103: **INTERPRETATION:** Where any provision of this Chapter imposes more stringent requirements, regulations, restrictions or limitations than are imposed or required by the provisions of any other law or ordinance, then the provisions of this Chapter shall govern. (Ord. 80-131; 1968 Code § 14-3)

14-1-104: **REGULATIONS TO APPLY WITHIN CORPORATE LIMITS OF CITY:** The regulations prescribed in this Chapter shall apply within the corporate limits of the City. (Ord. 80-131; 1968 Code § 14-4)

14-1-105: **DEVELOPMENT OF LAND BOTH WITHIN AND WITHOUT THE CITY LIMITS:** Any proposed zone district, the location of which will include land both within and without the City limits, shall be considered in its entirety and the portion lying within the City limits shall be considered as a part of the entire development in the consideration of area, setback, off-street parking, loading and land coverage requirements. If the major portion of the development is outside the City, and the governing body having jurisdiction over that portion of the land has similar provisions for control of the development, some of the requirements pertaining to the portions of the plan lying within the City may be varied or waived by the Planning Commission and its recommendations concerning the entire project may be forwarded to the above mentioned governing body. (Ord. 80-131)

14-1-106: **ZONING MAPS, BOUNDARIES OF ZONES:**

A. Maps. The boundaries of the zones referred to in the succeeding sections are hereby established as shown on a map entitled "Zoning Map, Colorado Springs", together with "Sectional District Zoning Maps" supplementary thereto. These maps indicating the latest amendments shall be kept up to date and on file in the office of the Planning Department for the use and benefit of the public. Such maps, amendments and all notions, references and other information and data shown thereon are hereby adopted and made a part of this Chapter.

B. Boundaries of Zones. In determining the boundaries of zones shown on the map referred to in the preceding paragraph, the following rules shall apply:

1. Streets or Alleys. Unless otherwise indicated, the zone boundaries are the centerline of streets, parkways, waterways or railroad rights of way or such lines extended. Where street, alley or other rights of way lie adjacent to each other, the zone boundary is the imaginary line bisecting the combined width of the adjacent rights of way or such line extended.

2. Block and Lot Lines. Where the zone boundaries are not otherwise indicated and where the property has been or may hereafter be divided into blocks less than two hundred fifty feet (250') wide, the boundaries are median lines between their sides. Boundaries within blocks two hundred fifty feet (250') or more wide are one hundred twenty five feet (125') distant from the less restricted side of the blocks.

3. Unsubdivided Land. In unsubdivided property, boundaries on the map referred to in the first paragraph of this Section shall be determined by use of the scale indicated on such maps.

4. Vacated Street or Alley. In the event a dedicated street or alley shown on the map is vacated by ordinance, the property formerly in the street or alley shall be included within the zone of the adjoining property on either side of the vacated street or alley. In the event the street or alley was a zone boundary between two (2) or more different zones, the new zone boundary shall be the former center line of the vacated street or alley.

5. Discrepancy in Plat Layouts. Where the street layout or stream course actually on the ground

B5) varies from the layout as shown on the zoning map or any other condition which has not be provided for, the Planning Director shall interpret the map according to the reasonable intent of this Chapter, or refer the decision to the Planning Commission at a regularly scheduled meeting.

C. Zoning of Lots. A lot may have only one zone. (Ord. 80-131; Ord. 85-43; Ord. 86-229; 1968 Code § 14-6)

14-1-107: CONFORMITY WITH REGULATIONS

REQUIRED: Except as herein specified, no building, structure or land shall hereafter be used and no building or part thereof or other structure shall be erected, raised, moved, structurally altered, converted, extended or enlarged, except in conformity with the regulations specified in this Chapter for the zone in which it is located.¹ (Ord. 80-131)

14-2-101: INTENT AND PURPOSE:

- A. Intent. The master planning process is designed to serve as a refinement of the Comprehensive Plan and, as such, is the first step in the land development process. The process is intended to provide a comprehensive means of addressing a wide range of issues in a specified geographic area. The use of a theme, or development concept, will provide a basis for relating to the Comprehensive Plan, reviewing future amendments and in determining conformance of zoning requests to the plan's intent.

The master plan constitutes a determination by the City Planning Commission and City Council in their legislative capacities of advisory guidelines to be used by the City Planning Commission and City Council in their review of applications for rezonings, plats, or other land development review as provided for in this Chapter and Chapter 15 of the City Code. Conformance to an approved master plan not found to be obsolete will constitute a community benefit as described in the Comprehensive Plan.

This Article recognizes the need for flexibility and that long term planning and consistency shall be balanced with the need to amend plans. The intent is to permit changes that conform to the approved theme. An approved master plan shall be used by the Planning Department as a guide to zoning. This process is the most generalized in the land development process and subsequent steps shall establish specific plans which are consistent with the adopted master plan.

- B. Objectives. Master plans are intended to achieve the following objectives through conformance to the criteria contained in Section 14-2-106 of this Article:

1. To serve as a refinement of the goals and policies of the Comprehensive Plan.
2. To assure the coordination of City capital improvements.
3. To serve as a guide for future land use and transportation patterns.
4. To aid the City in making annexation decisions.
5. To analyze the impact on public facilities and environmental quality.
6. To analyze the fiscal impact on the City.
7. To identify and protect significant natural features.
8. To assure coordinated implementation of adopted City plans.
9. To resolve issues of community wide interest. (Ord. 84-221)

14-2-102: DEFINITIONS:

- A. The purpose of definitions within this part is to provide consistency in land use and operational terms, to allow for comparisons between various master plans and to provide for a standard of measurement. These definitions represent the least degree of specificity and the applicant is encouraged to provide a greater level of detail and description. These definitions shall be considered as guidelines and minor variations from them are acceptable. These definitions shall apply only to master plans. This section is not intended to require each of these land uses for every master plan. These are the most commonly used definitions. Other land use types may be submitted when accompanied with an adequate definition. Various land use types may be combined to produce another land use.

- B. Land use and operational terms used in a master plan shall conform to the definitions shown below.

C. Land Use Definitions.

SECTION:

- 14-3-101: Description and Purpose
- 14-3-102: Where Established
- 14-3-103: Modification of Subdivision Regulations
- 14-3-104: Principal Permitted Uses
- 14-3-105: Conditional Uses
- 14-3-106: Procedure
- 14-3-107: Submittal Requirements and Criteria for Review
- 14-3-108: Small Lot PUD Development

- B) 6. To encourage a high quality of design in new development.
- 7. To encourage the conservation of energy.
- 8. To promote affordable housing by means of cost effective site planning.

Requests for a Planned Unit Development shall be reviewed for conformance with this purpose. (Ord. 82-83; Ord. 85-43)

14-3-101: DESCRIPTION AND PURPOSE:

- A. Description. The Planned Unit Development (PUD) district is intended to provide the means through which land may be developed through an overall unified approach rather than the traditional lot by lot approach. The district encourages clustering of units by means of flexibility in design in order to create a better living environment, preserve the unique features of the site, and provide services in a more economic manner. The PUD allows for a variety of types of residential development and encourages appropriate mixed use developments.
- B. Purpose. The purpose of the Planned Unit Development (PUD) district is:
 - 1. To encourage flexibility, innovation of design and variety of development types in order to promote the most suitable use of a site.
 - 2. To facilitate efficient provision of streets, utilities and municipal services.
 - 3. To achieve a compatible land use relationship with the surrounding area.
 - 4. To preserve the unique, natural, scenic, historical and cultural features of a site.
 - 5. To preserve and develop usable open space in new development.

14-3-102: **WHERE ESTABLISHED:** A planned unit development zone may be established upon any tract of land held under single ownership or under unified control, provided a land use proposal is submitted for the tract in compliance with the provisions of this Part. (Ord. 82-83)

14-3-103: **MODIFICATION OF SUBDIVISION REGULATIONS:** When the situation so warrants, the following requirements of the subdivision regulations may be waived or modified by the Planning Commission or City Council based on the sketch plan or the final development plan: width and right of way of streets, access and alleyways, location of utility easements or lines, requirements for or placement of curb, gutter or sidewalks, requirement for street lights and storm drainage treatment. The Planning Commission or City Council may find that such requirements are not necessary for the general health, safety and welfare of the citizens. If a waiver based on a sketch or development plan has been approved, approval of the same waiver is not required at time of platting. A waiver may be approved if the modifications would result in at least one of the following:

- A. Preservation of natural features.
- B. Provision of a more livable environment.
- C. Provision of a more efficient pedestrian system.
- D. Provision of additional open space.

- E. Provision of adequate drainage facilities. (Ord. 82-83)

14-3-104: PRINCIPAL PERMITTED USES:

- A. Dwelling units in detached, semi-detached, attached or multi-family structures or any combination thereof.
- B. Nonresidential uses of a cultural, recreational and commercial character to the extent that they are designed to serve primarily the residents of the planned unit development and are compatibly and harmoniously incorporated into the unitary design of the PUD.
- C. Religious institutions.
- D. Any use considered by the Planning Director as accessory to the principal permitted uses.
- E. Open space.
- F. Small personal care boarding home.
- G. Intermediate personal care boarding home.

- A. Human service establishments.
- B. Day Care Center
 - 1. Day care centers shall provide the minimum square footage of indoor and outdoor space per person that complies with the State's minimum square footage requirements. No part of the required outdoor space shall be situated within any front yard setback. The required outdoor space shall be screened from adjacent residential properties when necessary and appropriate to reduce play area sounds.
 - 2. Day care centers must be located on a collector street which for the purpose of this definition shall mean a street having direct access to a minor arterial roadway.
- C. Nursing home. (Ord. 82-83; Ord. 86-119)

14-3-106: PROCEDURE:

- A. Preapplication Conference. The applicant is encouraged to meet with the Planning Department prior to submittal of the application for zoning.
- B. Application for Zoning. The applicant for a PUD district shall make written application to the Planning Commission.
- C. Sketch Plan. The application shall be accompanied by a sketch plan. The maximum density, type of dwelling and maximum height shall be established at time of zoning, based on the sketch plan and the criteria listed below.
- D. Density. Maximum permissible densities will be determined as part of the sketch plan approval for a PUD. Densities will be determined in accordance with the following:
 - 1. Master Planned Areas. The density established on the approved Master Plan shall be considered the maximum allowed density unless the Planning Commission based on the sketch plan or new evidence finds that such density is not feasible.
 - 2. Other Areas. For all PUD's where there is not a currently approved Master Plan, maximum allowed density will be established in accordance with the following criteria:
 - a. The character of the surrounding neighborhood and land usage (actual or planned) and the impact of the proposed PUD on adjacent areas.
 - b. The ability of the existing off-site transportation, utility, drainage, open space and other amenities (together with improvements proposed) to handle the proposed PUD density.
 - c. The extent to which the proposed PUD contains unique or innovative features or utilizes and incorporates special site conditions into its design in order to mitigate the impact of the proposed density on adjacent areas.
 - d. Amount of usable on-site open space.
- E. Submittal of Sketch Plan: The sketch plan shall be submitted with a request for zoning. The Planning Commission shall review the zone request and request for density based on the sketch plan.
- F. Amendments to the Approved Sketch Plan: Minor changes in siting of buildings, interior access or arrangement of parking or open space may be approved by the Planning

- F) Director. Major changes as described below require an amendment to the sketch plan which is reviewed by the Planning Commission:
- Increased density.
 - Relocation of points of access.
 - Decreased perimeter setbacks.
 - Major changes in building location, arrangement of parking, or open space.
 - Change in unit type (townhouse to apartments, etc.)
 - Projects over 20 acres:
 - Over 10% reduction in area of open space.
 - Over 10% increase in lot coverage.
 - Projects under 20 acres:
 - Over 5% reduction in area of open space.
 - Over 5% increase in lot coverage.
- G. Submittal of the Final Development Plan. The final development plan must substantially conform to the approved sketch plan. A final development plan which is in substantial conformance with the approved sketch plan and which conforms to criteria contained in this Section may be approved by the Planning Department. The plan may be referred to the Planning Commission by the Planning Department or the decision of the Planning Department may be appealed by the applicant or other affected party.
- H. Subdivision. No subdivision of the PUD district shall be approved nor any building permits issued until a final development plan is approved for an entire district, except for approved phased projects. Platting of separate phases may be approved if there is an approved sketch plan over the entire district and an approved final development plan on the phase to be platted. This does not preclude the platting of the entire district as one lot prior to the approval of a final development plan. The final development plan may be used in place of the preliminary plat requirements.
- I. Amendments to the Approved Final Development Plan. Minor changes in siting of buildings, interior access or arrangement of parking or open space may be approved by the Planning Director. Major changes as described below require an amendment to the Final Development Plan which is reviewed by the Planning Commission:
- Increased density.
 - Relocation of points of access.
 - Decreased perimeter setbacks.
 - Major changes in building location, arrangement of parking, or open space.
 - Change in unit type (townhouse to apartment type, etc.)
 - Substantial changes in the landscape plan.
 - Projects over 20 acres:
 - Over 10% reduction in area of open space.
 - Over 10% increase in lot coverage.
 - Projects under 20 acres:
 - Over 5% reduction in area of open space.
 - Over 5% increase in lot coverage.
- J. Amendments to Sketch and Development Plans: Determination of whether an amendment to the approved sketch plan or final development plan is necessary shall be made by the Planning Director. If changes are slightly in excess of the criteria above, but would result in minimal impact on the development or its surroundings, the requirement for an amendment may be waived.
- K. Staff Review: Staff shall review the final development plan and inform the applicant of its findings within fifteen working days of a complete submittal.
- L. Control of Common Amenities in Phased Projects: If a phased project contemplates a disproportionate share of the open space, recreational facilities or other common amenities ("Common Facilities") to be provided in later phases, some form of assurance is required so that if the later phases are not developed, sufficient common facilities will be provided for the phases actually developed.
- Suitable assurances may be in the form of a letter of credit, escrow, or recorded agreements by the mortgage holder or owner guaranteeing the development of the open space.

Does the design reflect an effort by the developer to blend the project harmoniously into the surrounding area by means of appropriate density, landscaped buffering, building types, bulk and placement access and other means?

2. Does the proposed density relate to the topography and other natural features of the site? Does the design minimize destruction of desirable natural features and utilize these elements in the design of the project?

3. Is a continuity of design reflected in the site planning? Is there a variety of unit types and placement in large projects?

4. The provision of adequate, functional common open space shall be required to provide adequate light, air and privacy, to provide relief from density, to buffer adjacent properties, to provide active and passive recreation opportunities to preserve the unique features of the site.

Are units or lots clustered around open space with convenient access to that space to all units? Does each unit have adequate private outdoor space when appropriate? Is linear open space wide enough to function as such? Minimum widths are usually at least thirty feet (30') between one story units and forty feet (40') between two (2) story units. (This requirement does not relate to building separation when not counted as open space for purposes of plan review or park credits.)

5. Does the development provide appropriate recreational facilities in terms of the type of resident expected in the project?

6. Are structures adequately separated and arranged to provide visual and aural privacy, functional open space, visual relief from density and to protect solar access?

- B) 7. Is adequate and convenient parking provided which is separated and screened from living areas? Does the amount of parking reflect the type of unit, family size, age and income level of residents? (Waivers based on these factors may be granted upon consideration of the sketch plan.)

8. Are vehicular facilities designed to maximize safety and convenience for the residents and minimize the intrusion of adverse sights and sounds? Do the facilities discourage large volumes of traffic within the project and lessen the impact generated by the project upon public streets and surrounding areas? Are mid or high density projects convenient to transit?

9. Are the buildings and units oriented to take advantage of views, provide for privacy for residents and conserve energy?

10. Is provision made for pedestrian travel, particularly travel to common open space and/or public parks? Has the multi-use trails plan been considered?

- C. Final Development Plan.

1. Final Development Plan Requirements.

a. Boundaries and size of parcel, legal description.

b. Vicinity map.

c. Appropriate scale.

d. Existing ownership.

e. Proposed ownership configuration.

f. Design parameters (if not shown on sketch plan).

g. All major improvements of surrounding properties within three hundred feet (300') of the proposed PUD.

h. Gross and net density, number of units, size of units, number of bedrooms, height of buildings.

i. Area to be conveyed, dedicated or reserved for parks or trails, schools and other public or semi-public purpose sites.

C,1) j. Area to be used as common open space and recreational facilities.

k. Existing and proposed entrance and exit drives, traffic islands and other devices.

l. Lighting standards, location and height.

m. Location and width of ROW and pavement of proposed streets, public and private.

n. Public facilities plan - placement and size of all public facilities including curb, gutter, sidewalks, pavement, utility lines and storm drainage facilities and easements.

o. The location, number and detail plans of proposed off-street parking and loading facilities. The percent of the lot covered by pavement.

p. Detailed landscaping plan (See Landscape Plan Requirements in Section 14-10-104).

q. Building size and location, including details of private outdoor space. Percent of coverage of lot by building.

r. Pedestrian facilities including types of surfacing.

s. Location, height and material of fencing or walls.

t. Existing and proposed contours and method of erosion control and reclamation when applicable. In areas of steep slope or areas requiring substantial cut and fill, a grading plan may be required.

u. Details of natural features such as mature trees, streams, rock outcroppings and the means of incorporation into the design of the project.

v. Single family developments: Setbacks in single family developments may be established by showing the building envelope on the lots. In hillside areas the location of building envelopes must be based on a detailed

C,1) site plan showing how disturbance of terrain and destruction of natural features has been minimized.

The landscaping plan may be general in nature if the Planning Director determines that the development so warrants.

2. Criteria for Review of Final Development Plan. In addition to the purposes of this Section, the review criteria for the concept plan and the criteria in Article 5, the following criteria shall be used in reviewing the development plan:

a. Design Compatibility With the Surrounding Area. Does the circulation plan minimize traffic impact on the adjacent neighborhood? Do the design elements reduce the impact of the project's density? Is placement of buildings compatible with the surrounding area? Is adequate buffering from adjacent properties provided by means of setbacks, landscaping, decorative walls or grade separation?

b. Traffic Circulation. Is the circulation system designed to be safe and functional? Does the design of parking and access result in a minimum of area devoted to asphalt? Are landscaping and grade separation and other techniques used to provide visual relief from access areas, service areas and parking? Are units protected from arterial traffic by the provision of adequate setbacks, grade separation, walls, landscaping and building orientation?

c. Privacy. Is privacy provided where appropriate by means of staggered setbacks, courtyards, private patios, grade separation, landscaping, window placement or other means?

d. Pedestrian Circulation. Are pedestrian facilities provided, particularly those giving access to open space and recreation facilities? Are those facilities separated from vehicular traffic and adequately landscaped?

e. Landscaping. Does the landscape design contribute to the livability of the project,

C,2,e)offer relief from density, aid in energy conservation and provide for privacy? Are a variety of species provided and selected with regard to color, shape, massing and screening? Are large expanses of gravel, bark or pavement avoided?

The use of native vegetation or drought-resistant species including grasses is encouraged. Assistance from the Soils Conservation Service, the City Forester and the Colorado State University Extension Service is recommended for selection of plant materials.

f. Variety. Is a mix of unit types and/or exterior elevations provided in larger projects?

g. Open Space. The provision of adequate, functional common open space shall be required to provide adequate light, air and privacy, to buffer adjacent properties, to provide active and passive recreation opportunities and to preserve the unique features of the site. The area provided for vehicular access, parking and storage shall not be counted as open space.

Common open space may be used to reduce the park dedication requirements if the open space is functional and provides enough area or recreational facilities to relieve pressure on neighborhood parks. Credit may also be given if the provision of open space results in the preservation of significant natural features.

All units should include well-designed private outdoor living space featuring adequate light, air and privacy where appropriate.

Provision of a homeowner's association where appropriate for purpose of maintaining common area is required. Agreements or covenants shall be provided which reflect suitable guarantees for such maintenance.

Natural features such as trees, drainage channels, slopes, rock outcroppings, etc. are to be incorporated into the design of the open space.

C,2) Recreational facilities should reflect the needs of the type of resident and proximity to public facilities.

D. Interpretation. This Part is intended to be flexible to allow for innovative, efficient and compatible land uses and consequently, many of the requirements contained in it are intended to provide general guidance rather than specific requirements. Interpretations of this Part shall be reasonable, in light of the purposes of the PUD, and any interpretations which may significantly increase the cost of a proposed project must be clearly warranted by the requirements and intent of the Part. (Ord. 82-83; Ord. 86-39)

14-3-108: SMALL LOT PUD DEVELOPMENT:

A. Definition. For the purpose of this Part, small lot PUD development shall be defined to mean any residential project of single-family dwellings or attached dwellings where each unit is located on an individual lot with sizes and setbacks that are based on the PUD development plan.

B. Purpose. It is the purpose of this Section to provide for small lot PUD development allowing maximum design flexibility while preserving compatibility with existing and proposed PUD development through development plan review.

C. Criteria. Establishment of a small lot PUD development shall be reviewed based on the following criteria:

1. Does the proposed development add to the available mixture of housing types in the neighborhood in which it will be located?

2. Is the size of the proposed development compatible with its location?

3. Is the proposed development compatible with surrounding land uses, both existing and proposed?

4. Are school and park sites, existing or planned, available within the neighborhood to serve this proposed development? (Ord. 82-83)

AIRPORT REFERENCE POINT means the point established as the approximate geographic center of the airport landing area and so designated on the Airport Zoning Map.

DATUM PLANE means a horizontal plane or surface which includes the surface point of the Airport elevation.

HEIGHT for the purpose of determining the height limits, the datum shall be Mean Sea Level elevation unless otherwise specified.

INSTRUMENT RUNWAY means a runway equipped or to be equipped with a precision electronic navigational aid or landing aid or other air navigation facilities suitable to permit the landing of aircraft by an instrument approach under restricted visibility conditions.

LANDING AREA means the area of the Airport used for the landing, taking off or taxiing of aircraft.

LEGAL NONCONFORMING USE means any structure, tree, natural growth or use of land existing on the effective date of this Part 26 which is inconsistent with the provisions of this Part 26 or any amendment hereof.

NONINSTRUMENT RUNWAY. A runway other than an instrument runway.

PERSON. As defined in Section 1-1-203 of this Code and includes a trustee, receiver, assignee, administrator, executor, guardian or other representative.

RUNWAY. The paved surface of the Airport landing area used primarily for the landing and take-off of aircraft.

STRUCTURE. An object constructed or installed by man, including, but without limitation, buildings, towers, smokestacks, overhead transmission lines and similar objects.

TREE. An object of natural growth. (Ord. 3904; Ord. 80131; 1968 Code § 14-51.2)

14-3-2603: CRITERIA; TREES AND STRUCTURES GENERALLY: There are hereby adopted the following criteria for the use of airspace in relationship to the Airport. Except as otherwise provided in this Chapter. No structure or tree shall be erected, altered, allowed to grow or maintained in any zone established by this Chapter to a height in excess of any of the Airport referenced surfaces described below. Nothing in this Part 26 shall be construed as prohibiting the growth, construction or maintenance of any tree or structure to a height up to twenty two feet (22') above the surface of the land. (Ord. 3904; Ord. 8013; 1968 Code § 14-51.3)

14-3-2604: CRITERIA; INSTRUMENT APPROACH ZONE: For all instrument approach runways at the Airport, the following criteria and definitions shall apply, and the boundaries of the instrument approach shall be the boundaries of the outermost surface or surfaces, projected vertically if required:

- A. Primary Surface. A surface located on the ground or water longitudinally centered on each runway extending two hundred feet (200') beyond each end of that runway. The width of the primary surface is one thousand feet (1,000').
- B. Clear Zone Surface. A surface located on the ground or water at each end of the primary surface, with a length of one thousand feet (1,000') and the same width as the primary surface.
- C. Horizontal Surface. A plane, oval in shape, at a height of one hundred fifty feet (150') above the established airport elevation. The plane is constructed by scribing an arc with a radius of ten thousand feet (10,000') above the centerline at the end of the primary surface of each runway and interconnecting these arcs with tangents.
- D. Conical Surface. A surface extending from the periphery of the inner horizontal surface outward

D) and upward at a slope of twenty to one (20:1) for a horizontal distance of four thousand feet (4,000').

E. Approach Surface for Instrument Runways. An inclined plane, symmetrical about the runway centerline extended, beginning at each end of the primary surface at the centerline elevation of the runway end and extending for fifty thousand feet (50,000'). The slope of the approach surface is fifty to one (50:1) along the runway centerline extended for a distance of ten thousand feet (10,000'). It then continues outward and upward at a slope of forty to one (40:1) to a point fifty thousand feet (50,000') from the point of beginning. The width of this surface at the runway end is the same as the primary surface, it flares uniformly, and the width at fifty thousand feet (50,000') from the end of the runway is sixteen thousand feet (16,000').

F. Transitional Surfaces for Instrument. Those surfaces that connect the primary surfaces and the approach to the horizontal surface, conical surface, or other transitional surfaces. The slope of the transitional surface is seven to one (7:1) outward and upward at right angles to the runway centerline. (Ord. 3904; Ord. 80-131; ord. 86-229; 1968 Code § 14-51.3)

14-3-2605: CRITERIA; NONINSTRUMENT APPROACH ZONE: For all noninstrument approach runways at the Airport, the following criteria shall apply and the boundary of the noninstrument approach zone shall be the boundaries of the outermost surface or surfaces, projected vertically if required:

- A. Primary Surface for Noninstrument Runways. A surface longitudinally centered on a runway and extending in length two hundred feet (200') beyond each end of a noninstrument runway. The width of the primary surface for noninstrument runways shall be five hundred feet (500'). The elevation of any point on the longitudinal profile of a primary surface, including the extensions, coincides with the elevation of the centerline of the runway, or extension, as appropriate.

- B. Approach Surface for Noninstrument Runways. The approach is five hundred feet (500') wide (at each end of the primary surface) and extends outward and upward at a slope of twenty to one (20:1), expanding to a width of two thousand feet (2,000') at a horizontal distance of five thousand feet (5,000').
- C. Transitional Surfaces for Noninstrument Runways. Transitional surfaces for noninstrument runways shall extend outward and upward at right angles to the runway centerline at a slope of seven to one (7:1) from the edges of the primary and the approach surfaces until they intercept the horizontal and conical surface of an instrument approach zone. (Ord. 3904; Ord. 80-131; Ord. 86-229; 1968 Code § 14-51.3)

14-3-2606: **USE RESTRICTIONS:**

- A. Notwithstanding any other provisions of this Chapter, no use may be made of land within any zone established by this Chapter in such a manner as to create electrical interference with radio communication between the Airport and aircraft, make it difficult for flyers to distinguish between Airport lights and others, result in glare in the eyes of flyers using the Airport, impair visibility in the vicinity of the Airport or otherwise endanger the landing, taking off or maneuvering of aircraft.
- B. Within the area designated on the map indicated as Plan Development Zone Limit Map for the Airport, only the following zones may be established provided said zones are established in conformance with the basic policies of the City's Comprehensive Plan:
 1. PIP-1 Planned Industrial Park.
 2. PIP-2 Planned Industrial Park.
 3. PBC-2 Planned Business Center.
 4. PBC-2 Planned Business Center.

14-3-2607: **NONCONFORMING USES:**

- A. Regulations Not Retroactive. The regulations prescribed by this Part 26 shall not be construed to require the removal, lowering or other changes or alteration of any structure or tree not conforming to the regulations as of the effective date of this Part 26, or otherwise interfere with the continuance of any nonconforming use. Nothing herein contained shall require any change in the construction, alteration or intended use of any structure, the construction or alteration of which was begun prior to the effective date of this Part 26, and is diligently prosecuted.
- B. Marking and Lighting. Notwithstanding the preceding provisions of this Part 26, the owner of any nonconforming structure or tree shall permit the installation, operation and maintenance thereon of such markers and lights as shall be deemed necessary by the Airport Advisory Board to indicate to operators of aircraft in the vicinity of the Airport the presence of such Airport hazards. Such markers and lights shall be installed, operated and maintained at the expense of the City.
- C. Existing Uses. No permit shall be granted that would allow the establishment or creation of an Airport hazard or permit a nonconforming use, structure or tree to be made or become higher, or become a greater hazard to air navigation than it was on the effective date of this Chapter¹ or any amendments thereto or than it is when the application for a permit is made. (Ord. 3904; Ord. 80-131; 1968 Code §§ 14-51.5)

14-3-2608: **VARIANCES:** The proponents of a variance of this Part 26 shall make written application to the Planning Commission for its consideration. The Planning Commission shall hold

1. The ordinance from which this provision derives became effective August 26, 1969.

at least one public hearing on the proposed variance and if, from the evidence submitted, the Commission finds that said variance is consistent with the intent and purpose of this zone, the Planning Commission may recommend approval of said variance. If the Planning Commission elects to recommend that the proposed variance be approved, said recommendation will then be reported to the City Council. If the Council does not object at the Council meeting at which the action of the Planning Commission is reported, the variance shall be automatically approved and shall thereafter be in full force and effect. At the public hearing before the City Planning Commission, recommendations from the Airport Advisory Commission, the Federal Aviation Administration, and any affected local or regional planning agency concerning the proposed variance must be reviewed. In the event the Planning Commission disapproves the requested variance, appeal may be taken to the City Council according to the procedures set forth in this Chapter. Any variance granted may, if such action is deemed advisable to effectuate the purpose of this zone and be reasonable in the circumstances, be so conditioned as to require that the proponents install, operate and maintain at their expense, upon the structure or tree in question such markers and lights as may be necessary to indicate to flyers the presence of Airport hazards. (Ord. 3904; Ord. 80-131; 1968 Code § 14-51.6)

14-3-2609: ENCROACHMENT A NUISANCE: It shall be unlawful for anyone to build, rebuild, create or cause to be built, rebuilt or created any object or plant, cause to be planted or permit to grow higher any tree or trees or other vegetation, which shall encroach upon any Airport protection privileges, but it shall be lawful to make maintenance repairs to or to replace parts of existing nonconforming structures or trees which do not enlarge or increase the height of an existing nonconforming structure or tree. Any such encroachment is declared to be a public nuisance and may be abated in the manner prescribed by law for the abatement of public nuisances or the City may go upon the land of others and remove any such encroachment without being liable for damages in so doing. (Ord. 3904; Ord. 80-131; 1968 Code § 14-51.7)

The purpose of the Flood Plain district is to secure safety from flood; to prevent loss of life; to prevent property damage and all other related dangers; to promote the public health and general welfare by regulating and restricting areas in the flood plains of watercourses in the City which are subject to periodic flooding; and to preserve the location, character and extent of natural drainage courses. (Ord. 74-94; Ord. 80-131; 1968 Code §§ 14-49, 14-49.2)

reached by the one hundred (100) year flood if it occurred under conditions existing at the time this Part 28 was passed, plus one foot (1') to allow for encroachments due to insignificant increase above that of natural conditions.

NATURAL OBSTRUCTION shall mean any rock, tree, gravel or analogous natural matter that is an obstruction and has been located within a floodway by a nonhuman cause.

- A. The Board shall initiate a program for the delineation of flood plains for watercourses in the City. It shall make a study relating to the acquiring of flood data, and have authority to enter into arrangements with local, State or Federal governmental agencies, or private firms to provide for such acquisition of data.
- B. When sufficient data has been acquired to reasonably locate the flood plain of a one hundred (100) year flood for a watercourse, the Board shall after a public hearing, recommend to the City Council the lines and limits of the Flood Plain district on the zoning map and drainage basin maps of the City. The City Council shall consider such recommendations and either approve, disapprove or modify such recommendations.

- C. If approved or modified, the City Council shall enact an ordinance delineating such lines on the zoning map of the City. The City Council shall have the power to alter such lines at any later time upon recommendation of the Board, if a re-evaluation of the then available flood data warrants it.

- D. Notice of any such hearing or order of the Board establishing or altering any such Flood Plain district or portion thereof shall be given in accordance with this Chapter.¹ Prior to the public notice, copies of the delineation shall be available for inspection by any citizen in the office of the City Engineer. (Ord. 74-94; Ord. 80-131; 1968 Code § 14-49.3)

14-3-2804: OBSTRUCTION, PUBLIC NUISANCE:

Any obstruction in any flood plain not exempt under this Chapter is hereby-declared to be a public nuisance unless a permit has been obtained for such obstruction from the Director of Public Works. (Ord. 74-94; Ord. 80-131; 1968 Code § 14-49.4)

14-3-2805: UNLAWFUL ACTIVITIES:

- A. It shall be unlawful for any person to locate any obstruction within an established flood plain, or for any owner to permit any obstruction to remain within designated flood plains without a permit from the Director of Public Works. No obstruction existing on the effective date of this Part 28² shall be affected; provided, that no person shall make nor shall any owner allow alterations of any obstruction within an established flood plain before or after the effective date of this Part 28² except upon express written approval of the Director of Public Works. No alteration, addition or repair to any nonconforming obstruction over the life of the obstruction shall exceed fifty percent (50%) of its value, unless the obstruction is permanently changed to a nonconforming use.
- B. Any owner of land may channelize, confine, relocate or alter a watercourse or standing body of water traversing or bordering such land with the purpose of minimizing flooding, ponding or erosion, and be permitted to fill or grade adjacent land; provided, that all such changes are based on sound engineering design and a permit or permits are secured as required by

1. See "Public Notice" under Section 14-1-109 of this Code. See also Section 14-17-111.

2. The ordinance from which this provision derives was approved July 23, 1974.

- B) this Code. As a condition of permitting a watercourse or standing body of water to be channelized, confined, relocated or altered, the Director of Public Works may require that the channelized, confined, relocated or altered watercourse or standing body of water be dedicated to the public use. (Ord. 74-94; Ord. 80-131; 1968 Code § 14-49.5)

14-3-2806: PERMITS:

 2. The danger that the obstruction will be swept downstream to the injury of others;
 3. The availability of alternate locations;
 4. The construction or alteration of the obstruction in such a manner as to lessen the danger;
 5. The permanence of the obstruction;
 6. The anticipated development in the foreseeable future of the area which may be affected by the obstruction; and
 7. Such other factors as are in harmony with the purpose of this Section. (Ord. 74-94; Ord. 80-131; 1968 Code § 14-49.6)

- B. All uses allowed in the zone upon which the Flood Plain district has been superimposed shall be allowed in the Flood Plain district upon issuance of a permit by the Director of Public Works and subject to the following floodproofing regulations:
1. Buildings or structures may be located and existing buildings or structures may be altered, provided the first floors of said buildings or structures are placed at or above the minimum building elevation.
 2. Foundations of all structures shall be designed and constructed to withstand flood conditions at the proposed construction site.
 3. Basements, lower floors or appurtenances located below the minimum building elevation shall be designed and constructed to prevent passage of water into the building or structure and withstand flood conditions, including hydrostatic pressure of elevated water-tables and the momentum of floodflows. Materials for construction shall be of the type not deteriorated appreciably by water. Windows, doorways and other openings into the building

B,3) or structure that are located below the minimum building elevation shall be designed and constructed incorporating adequate flood proofing.

4. All electrical equipment, circuits and installed electric appliances shall be located so as not to be subject to flooding or shall be flood proofed to the minimum building elevation.

5. Sanitary and storm sewer drains shall be equipped with valves capable of being closed, manually or automatically, to prevent backup of sewage and storm waters into the building or structure. Gravity drainage of basements may be eliminated by mechanical devices.

6. Chemical storage, explosive, buoyant and flammable liquid storage shall be located at or above the minimum building elevation, or shall be adequately flood proofed to prevent flotation of tanks or other appreciable damage or escape of toxic materials into floodwaters.

For the permit to remain in force, any obstruction must be maintained so as to comply with the conditions and specifications of the permit. All permits are subject to revocation in accordance with Section 72 of the Charter. (Ord. 75-94; Ord. 80-131; 1968 Code § 14-49.8)

14-3-2809: PERMIT APPROVAL OR DENIAL:

Permit applications for obstructions to be located in the flood plain must be specifically approved or denied within twenty (20) days of receipt by the Director of Public Works; permit applications for obstructions in the flood plain shall be conclusively deemed to have been granted after twenty (20) days of receipt of application, unless the Director of Public Works notified the applicant that the permit application is denied. (Ord. 74-94; Ord. 80-131; 1968 Code § 14-49.9)

14-3-2810: PERMIT FEE: The Board may establish a permit fee to cover the cost of processing permit applications and inspections. (Ord. 74-94; Ord. 80-131; 1968 Code § 14-49.10)

- A. Where a natural obstruction to a flood plain has been created by fallen trees, silt, debris and like matter, the Director of Public Works may, in his discretion, remove the natural obstruction, in which case the cost of removal shall be borne by the City.
- B. Where, after investigation, notice and hearing, an order has been issued to the owner of an obstruction not exempt under the provisions of this Chapter for its removal or repair, and the order is not complied with, within such reasonable time as may be prescribed by the Director of Public Works; or, if the owner cannot be found or determined, the Director of Public Works may make or cause such removal or repairs to be made. The reasonable cost of the removal or repairs shall constitute a lien against the obstruction removed or repaired and against the lot or parcel of land from which it was repaired. (Ord. 74-94; Ord. 80-131; 1968 Code § 14-49.11)

14-3-2812: ENTRY ON LANDS: The Board and the Director of Public Works or his agents may make reasonable entry upon any lands and waters within the Board's jurisdiction for the purpose of making any investigation, survey, removal or repair contemplated by these sections. An investigation of any natural or artificial obstruction shall be made by the Board either on its own initiative or upon the written request of any three (3) owners of land abutting the watercourse involved. (Ord. 74-94; Ord. 80-131; 1968 Code § 14-49.12)

14-3-2813: ORDERS: The Director of Public Works may issue such orders as are necessary to implement the provisions of this Part 28. If an order is issued to the owner of an obstruction not exempt under the provisions of this Chapter for its removal or repair, such order shall not become effective less

than ten (10) days after a hearing is held relating to such order. Where any order is issued which affects with particularity the land adjacent to any watercourse, notice of the contents of such order and of any required hearing shall be mailed by the Director of Public Works to the owner of such land not less than ten (10) days before the date of such hearing; or, if there is a required hearing, to the owner of such land and to the owner of the obstruction not less than ten (10) days before the date of such hearing; provided, that such notice need not be given to the owner of the obstruction if the owner cannot be found or determined. All orders issued by the Director of Public Works shall be on file at the office of the Director of Public Works. (Ord. 74-94; Ord. 80-131; 1968 Code § 14-49.13)

14-3-2814: APPEAL: Any person aggrieved by any decision of the Director of Public Works may appeal from such order to the Board. Any person aggrieved by any order of the Board may appeal from such order to the City Council. Such appeal may be taken within thirty (30) days after the order has been entered. In the event such an appeal is taken, enforcement of such order shall be stayed pending the outcome of such appeal, unless the Board determines there is imminent danger to the public. (Ord. 74-94; Ord. 80-131; 1968 Code § 14-49.14)

14-3-2815: FLOODWAY OBSTRUCTION REMOVAL FUND: The City Treasurer is hereby directed to create and establish the Floodway Obstruction Removal Fund and to credit to such for the removal of natural obstructions as provided in this Code, such money as shall be specifically appropriated by the City Council. Funds collected under Section 14-3-2810 shall be included in this Fund. (Ord. 74-94; Ord. 80-131; 1968 Code § 14-49.15)

14-3-2816: DISCLAIMER:

A. The granting or denial of a permit shall not have any effect on any remedy of any person at law or in equity; provided, that where it is shown that there is a wrongful failure to comply with this Part 28, there shall be a rebuttable presumption that the obstruction was the proximate cause of the flooding of the land of any person bringing suit.

B. The granting of approval of any structure or use shall not constitute a representation, guarantee or warranty of any kind or nature by the City or by any officer or employee thereof, of the practicability or safety of any structure or use proposed, and shall create no liability upon or cause of action against the City, the Board or a member of the Board or City employee. (Ord. 74-94; Ord. 80-131; 1968 Code § 14-49.17)

PART 29 HS - HILLSIDE AREA (OVERLAY)

SECTION:

14-3-2901: Description and Purpose
 14-3-2902: Designations
 14-3-2903: Applicability
 14-3-2904: Land Suitability Analysis
 14-3-2905: Development Plan
 14-3-2906: Master Facilities Plan
 14-3-2907: Grading Plan, Erosion Control and Reclamation
 14-3-2908: Issuance of Building Permits
 14-3-2909: Restoration and Maintenance
 14-3-2910: Appeals

14-3-2901: DESCRIPTION AND PURPOSE:

- A. Certain areas of the City are characterized by slope, vegetation, drainage, rock outcroppings, geologic conditions and other physical factors and which, if disturbed for purposes of development, could cause physical damage to public or private property or both. Therefore, the development of such areas and adjacent land requires special care on the part of the public and private sectors.
- B. The purpose of these regulations is to specify conditions for any type of development in areas where, due to topography, disturbance of the natural environment, or for other reasons, problems may be created which are detrimental to the public health, safety and welfare. It is the intent of these regulations to prevent physical damage to public and private property and to aid in the preservation of the natural heritage of the City. It is furthermore the purpose of this Part to allow an appreciable degree of development flexibility in order to protect the environment of hillside areas. Specifically, the objectives of this Section are:
 1. To conserve the unique natural features and aesthetic qualities of hillside areas.
 2. To provide safe and convenient access to hillside areas.

- B) 3. To minimize water runoff and soil erosion problems incurred in adjustment of the terrain to meet development needs.
4. To assure type, distribution, and densities of development which are compatible with the natural systems and terrain of the hillside areas.
5. To assure that the taxpayers of Colorado Springs are not burdened by extraordinary costs for services attributable solely to the development of hillside areas. (Ord. 83-229)

14-3-2902: DESIGNATIONS:

- A. The Hillside Area Overlay Zone map dated March 24, 1981 adopted by the City Council by Ordinance No. 81-49 establishes and depicts the areas of the City covered by the Hillside Area Overlay Zone. The Council may at its discretion and from time to time add areas to the Hillside Overlay Zone map if such areas meet the criteria in subsection 14-3-2901A.
- B. The Hillside Area Overlay is to be combined where applicable with other zoning districts in the City. Public notices for designating an area a hillside area shall be in accordance with this Chapter; however, posting shall not be required. (Ord. 83-229)

14-3-2903: APPLICABILITY:

- A. No building or structure may be erected, reconstructed, or structurally altered on land which is designated on the zoning maps of the City as a hillside area, nor shall such land be subdivided, graded, or otherwise disturbed for purposes of development, subdivision, or any other purpose unless such construction, subdivision, disturbance, or development is undertaken in accordance with the requirements set forth in this Part and all other laws of the City.

- B. Upon written request from a landowner or authorized representative, the Planning Director and the Director of Public Works may exempt certain property from all or part of the requirements of Part 29 if the subject property is not a characteristic hillside area as described in subsection 14-3-2901A. the request shall clearly state the rationale for any exemptions and list all exemptions being sought. The Directors of Planning and Public Works shall respond in writing to the applicant within fifteen (15) working days of receiving an exemption request. (Ord. 83-229)

14-3-2904: LAND SUITABILITY ANALYSIS:

- A. A land suitability analysis shall be required as part of the justification for the proposed development of a hillside area. The analysis shall consist of an evaluation of all physical and environmental factors on the site so that type, density, and distribution of development may be established in the most environmentally compatible manner that will minimize land disturbance, protect natural plant and animal communities, and minimize costs and liability to the City. The suitability analysis shall be prepared in conjunction with the master plan, and the master plan shall be clearly reflective of the analysis. (See Article 2 of this Chapter). Should any land in a designated hillside area not be master planned under the provisions of Article 2, the suitability analysis shall be prepared in conjunction with the development plan. The development plan shall be clearly reflective of that analysis in terms of type, density, and distribution of proposed development.
- B. Should any land in a designated hillside area have an existing, approved master plan which was adopted without an approved suitability analysis, the landowner may at his option:
1. Submit land suitability analysis upon which the master plan was based, or
 2. In lieu of a land suitability analysis, submit written or graphic material or both to the Planning Department addressing the physical and aesthetic factors of the hillside site and demonstrating how these factors influenced the type, distribution, and density depicted by the master plan, or
- B) 3. Prior to or at the time that the development plan is submitted, the landowner shall submit written or graphic material or both addressing the physical and aesthetic factors of the hillside site and demonstrating how these factors influence the project's design as shown on the development plan. (Ord. 83-229)

14-3-2905: DEVELOPMENT PLAN:

- A. No subdivision plat shall be submitted until such time as a detailed development plan has been approved as set forth in subsection B below. The development plan shall be prepared in compliance with Article 5 of this Chapter and shall contain all information required therein unless specifically exempted under subsection 14-3-2903B.
- B. Review and Approval. The Planning Department shall review the submitted development plan. The development plan may be approved by the Department or referred to the Planning Commission at the next regularly scheduled meeting. The Planning Department will notify the applicant in writing within fifteen (15) working days of submittal as to approval, disapproval, or referral to the Planning Commission.
- C. Submittal Requirements. In addition to the submittal requirements A through U listed in Section 14-5-103, the following information is required to accompany a development plan in a designated hillside area, except that in meeting requirements D, H, I, J, M and Q of Section 14-5-103 and requirements 1 and 4 below, the applicant shall not be required to depict actual construction on individual lots in a single-family detached residential development. These exceptions shall not apply to zero lot line or single-family attached developments.
1. Location of a general building area for each lot. This can also be shown by proposing "preservation areas" on lots where appropriate. Proposed access shall also be indicated. (See subsection 14-3-2905C6 below.)
 2. Location and species of vegetation (common names are acceptable) and an indication of vegetation to be removed;
 3. Location of rock outcroppings;

- C) 4. A map of proposed road alignments identifying segments at grades of 0-4%, 4-8%, and 8% and above. Centerline profiles shall be required for all road segments which exceed a grade of 8%. Profiles may be required for segments with grades of less than 8% if deemed necessary by the Director of Public Works.

5. Where grading is to occur, plans showing the relationship of all cuts and fills to the existing topography and plans for the stabilization, restoration, and control of erosion for disturbed areas as required by Section 14-3-2907. A letter of credit or bond shall be required in order to assure proper restoration of disturbed areas in accordance with the approved erosion control/reclamation plan.

6. The manner in which access will be provided or restricted due to topographic and other physical constraints, from the access road to each lot; and

7. Where deviations from those standards contained in the Subdivision Policy Manual are being proposed, a master facilities plan shall be required in accordance with Section 14-3-2906 below.

- D. Criteria for Review. In addition to criteria A through H listed in Section 14-5-104, criteria for review of a development plan in a designated hillside area shall also be as follows:

1. Is terrain disturbance minimized?

2. Is natural vegetation preserved and incorporated into the project design to the maximum possible extent?

3. Have visual impacts upon off-site areas been avoided or reasonably mitigated? Mitigation measures which may be demonstrated on the development plan may include, but are not limited to:

(a) Alternative siting of structures so that there is a mountain or hillside backdrop to the structure from areas where the structure is visible. However, this shall not preclude siting of structures on ridge lines where alternative siting is not available.

- D,3) (b) Use of existing vegetation to soften structural mass when building sites are located in highly visible areas.

(c) Use of supplementary native landscaping to soften structural mass when building sites are located in highly visible areas.

(d) Designation of special height restrictions for highly visible areas. Height may not be restricted to less than two (2) stories if other appropriate mitigation measures are incorporated.

(e) Use of visually compatible stabilization measures for cuts and fills.

- E. Amendments. All amendments to an approved development plan shall be processed in the same manner as the original development plan, except that development plans approved by Planning Commission and Council may be revised administratively. (Ord. 83-229; Ord. 86-67)

14-3-2906: MASTER FACILITIES PLAN: In order to allow for design flexibility, a master facilities plan shall be required concurrent with the detailed development plan when deviations from City development standards as contained in the Subdivision Policy Manual are being proposed. Standards for development of hillside areas are contained in the Subdivision Policy Manual. Due to the unique and often fragile nature of hillside environs, certain variances from the hillside standards may be allowed if they will result in superior and more environmentally compatible design. The master facilities plan shall be used to demonstrate that the proposed deviations will not adversely affect the public health, safety or welfare, and shall specify how the unique natural features of the site will be protected through the careful placement of services. The plan shall be presented by the applicant in lieu of individual waivers requested under Article 3, Part 13 of the Subdivision Code, and shall contain as much information as necessary to justify any deviations from standards contained in the Subdivision Code or Subdivision Policy Manual.

A master facilities plan shall be deemed approved by Planning Commission and City Council when the development plan is approved, consistent with Article 3, Part 13 of the Subdivision Ordinance. Should an

applicant wish to submit a master facilities plan prior to submitting a development plan, it shall be processed as a waiver pursuant to Article 3, Part 13 of the Subdivision Code. (Ord. 83-229)

14-3-2907: GRADING PLAN, EROSION CONTROL, AND RECLAMATION:

A. The primary objective of the grading/erosion control/reclamation plan is to minimize terrain disturbance and to restore and stabilize those areas which are disturbed. Plans for grading and control of erosion shall be submitted by the applicant with the development plan, development plan amendment, or replat, whichever is applicable, in any designated hillside area. No land so designated shall be subdivided, graded, otherwise disturbed for purposes of development, or any other purpose until the plan for grading and erosion control is approved by the Planning Director and the Director of Public Works. The grading plan shall meet all the requirements of Section 15-3-1503 of the City Code. In addition, the grading plan shall show all areas to be disturbed by grading and fill and shall show proposed final contours for these areas. The contour interval shall be two feet (2') and the horizontal scale 1" = 40' unless otherwise approved by the Department of Public Works. The erosion control/reclamation plan or program shall state in detail how each type of restoration situation will be dealt with, recognizing that different combinations of slope and material may require varied stabilization methods. No cleared, graded, or otherwise disturbed land may be left without temporary protective stabilizing cover longer than six (6) months or without permanent cover as described in the erosion control plan longer than one year from the date of disturbance. All grading plans prepared and submitted under this Section shall include measures for drainage and erosion control to be employed during construction. Such measures shall remain in place after construction has been completed until such time as temporary or permanent protective cover is applied. Whenever possible and wherever appropriate, erosion control and restoration shall incorporate the use of live native plant materials. Criteria for treatment shall include visual compatibility with the surrounding landscape, sustained survivability under arid conditions, and effectiveness in prevention of soil erosion and slope failure.

- B. All grading plans prepared and submitted under this Section shall include plans for limiting ecological damage through restrictions on the use of construction equipment and placement of supply and equipment storage areas.
- C. Revisions of any approved grading plan shall be submitted to the Planning Department for review and shall be acted upon by the Director of Planning and Public Works within ten (10) working days of receipt.
- D. A letter of credit or surety bond shall be required in order to assure proper restoration of disturbed areas in accordance with the approved erosion control/reclamation plan. This letter or bond need not be submitted for the final plat to be approved, but shall be submitted prior to any land disturbance (including removal or alteration of vegetation) or prior to issuance of any building permit, whichever occurs first. (Ord. 83-229)

14-3-2908: ISSUANCE OF BUILDING PERMIT:

- A. No building permits shall be issued in any designated Hillside Area until such time as:
 - 1. The final plat is recorded, and
 - 2. The surety bond or letter of credit is posted by the developer in accordance with subsection 14-3-2907D, and
 - 3. A plan for grading and erosion control for the individual lot is approved by the Planning Department. This plan shall consist of the following:
 - (a) Plot plan drawn to scale.
 - (b) Two foot (2') contour - existing and proposed.
 - (c) All existing vegetation and rock outcroppings.
 - (d) All areas of cut or fill, or both, including driveway.
 - (e) Erosion control/stabilization methods for cuts and fills.
 - (f) Restrictions on equipment use and supply storage areas so that disturbances and ecological damage is minimized.

- A,3) The Planning Department shall respond to this plan within three (3) working days of receipt. (Ord. 83-229)

14-3-2909: RESTORATION AND MAINTENANCE:

A. Restoration.

1. Unpermitted land disturbance or alteration. If any land disturbance or alteration including, but not limited to grading or otherwise disturbing natural ground cover occurs in a Hillside Overlay Zone which is not in accordance with the properly approved plans as required by this Part, a stop order may be issued in accordance with Section 14-17-101 of this Code prohibiting all further activity until all required plans have been submitted and properly approved. The landowner shall have forty five (45) days after such a stop order is issued to submit a plan pursuant to Sections 14-3-2907 and 14-3-2905. The Director of Planning with the concurrence of the Director of Public Works may extend this time period for an additional forty five (45) days for good cause shown. The Director of Planning and Director of Public Works may also condition their approval of any restoration measures upon supplying a satisfactory bond, letter of credit or other suitable guarantee for the performance of any proposed restoration. Such plan shall require that restoration commence within thirty (30) days after the plan approval and proceed with due diligence to completion.

B. Maintenance.

1. Obligation to Maintain. All facilities, vegetation, and other items required by the approved grading, erosion control and reclamation plan shall be properly maintained by the owners of the property. Such maintenance shall include, but not be limited to keeping all erosion control facilities in good order and functional, repairing any erosion damage that occurs, keeping all vegetation healthy and in growing condition and replacing any dead vegetation as soon as practicable. This obligation to maintain shall not apply to individual lots except as the individual lots may be subject to maintenance obligations incurred under the approved grading, erosion control and reclamation plan and except for obligations incurred under Section 14-3-2908.

- B) 2. Failure to Maintain. ARTICLE 5 DEVELOPMENT PLANS

SECTION:

- 14-5-101: Purpose
- 14-5-102: Definition
- 14-5-103: Submittal Requirements
- 14-5-104: Criteria for Review
- 14-5-105: Procedure for Review
- 14-5-106: Additional Information

14-5-101: PURPOSE: Each zoning district is primarily intended for a predominant type of land use, with specific minimum and maximum physical requirements which regulate height, bulk and placement on the site. Depending upon the specific location, all combinations of permitted uses and physical requirements may not be appropriate. It is necessary to require a development plan review so that the impact of the proposed use can be judged against all the circumstances weighing upon this individual case. This review may indicate the most appropriate development for the site is one which is less, in terms of height, density, range of uses, etc., than the maximum allowed by the zone. (Ord. 82-46)

14-5-102: DEFINITION: A development plan is a graphic representation of a proposed development plan showing the intended uses and layout of the property including, but not limited to, building locations, parking, ingress/egress, landscaping, and location of freestanding and low profile signage. The approved development plan becomes the official zone for the property and development of the property must be made in accordance with the approved development plan. Changes in the development plan may be affected only by approval of an amendment to the development plan. (Ord. 82-46)

14-5-103: SUBMITTAL REQUIREMENTS: All submitted development plans shall contain the following information:

- A. Completed application form.
- B. Indication of scale (1" = 40') and a bar scale.
- C. North arrow.
- D. The location, exterior horizontal dimensions and proposed height of all buildings with reference to property lines and public rights of way.
- E. All public and private easements.
- F. All existing and/or proposed entrance and exit curb cuts, deceleration and acceleration lanes, traffic island and other devices.

- M. Landscaping plan.
- N. Indicate adjoining properties as to significant buildings, parking, access drives, vacant, zoning, etc.

- Q. Existing and proposed contours at two foot (2') intervals.
- R. Legal description.
- S. Lighting standards, location and height.
- T. Anticipated future expansions, if known.
- U. Approximate schedule for development.
- V. Designation of all public or private street names and right of way, easement and mat widths and designation of private street by including "(private)" immediately following street name. (Ord. 82-46; 86-106)

14-5-104: CRITERIA FOR REVIEW: A development plan shall be reviewed using the criteria listed below. No development plan shall be approved unless the plan complies with all the requirements of Article 5, is consistent with the intent and purpose of the Chapter and is compatible with the land uses surrounding the site.

- A. Does the proposed development have a detrimental effect upon the general health, welfare, safety and convenience of persons residing or working in the neighborhood of the proposed development?
- B. Does the proposed development provide for adequate light and air both on and off the site?
- C. Are the height, area, setbacks and bulk of the structures plus the landscaping appropriate to the development, the neighborhood and the community?
- D. Are the ingress/egress points, the internal traffic circulation, off-street parking facilities, loading and service areas and pedestrian ways designed so as to promote safety, convenience and ease of traffic flow both on and off the site?
- E. Does the proposed development overburden the capacities of existing streets, utilities, parks, schools and other public facilities?
- F. Does the proposed development promote the conservation of the existing property values of adjacent areas and the stabilization of surrounding residential neighborhoods?
- G. Does the development plan show how any

- G) potentially poor use to use relationships (commercial use adjacent to single-family homes) will be mitigated?
- H. Is the proposed development plan in conformance with all elements of the City's Comprehensive Plan? (Ord. 82-46)

14-5-105: PROCEDURE FOR REVIEW: The procedure for review of development plans is specified in each zone, and shall be further detailed by Planning Department policy as needed. (Ord. 82-46)

CHAPTER 14 ZONING

ARTICLE 6 CONDITIONAL USES

SECTION:

14-6-101: Description and Purpose
 14-6-102: Authorization
 14-6-103: Conditions to Authorization
 14-6-104: Application; Development Plan
 14-6-105: Processing
 14-6-106: Amendment to Approved Development Plan

14-6-101: DESCRIPTION AND PURPOSE: The development and administration of a comprehensive zoning ordinance is based upon the division of the City into zone districts within which districts the use of land and buildings and the bulk and position of buildings and structures in relation to the land are relatively uniform. It is recognized, however, that there are occasions when in addition to the principal permitted uses, special uses, hereinafter referred to as conditional uses, because of their unique characteristics and because of the uniqueness of their proposed location, may be allowed after careful consideration of the impact of the particular uses upon the neighborhood and the public facilities therein. (Ord. 80-131)

14-6-102: AUTHORIZATION: The City Council may, by resolution, grant a conditional use and so authorize the proper zoning official to amend the official zoning map in accordance with the provisions of this Chapter after recommendation and at least one public hearing by the Planning Commission. (Ord. 80-131)

14-6-103: CONDITIONS TO AUTHORIZATION: No conditional use shall be granted by the City Council until the City Council first finds:

- A. Surrounding Neighborhood. That the value and qualities of the neighborhood surrounding the conditional use are not substantially injured.
- B. Intent of Chapter. That the conditional use is consistent with the intent and purpose of this

B) Chapter to promote public health, safety and general welfare.

C. Comprehensive Plan. That the conditional use is in keeping with the Comprehensive Plan of the City. (Ord. 80-131; Ord. 82-247)

14-6-104: APPLICATION; DEVELOPMENT PLAN:

An application for conditional use shall be filed with the Planning Department on a form provided for that purpose. The application shall be accompanied by a development plan as described in Article 5. The approved conditional use and development plan shall be binding on the property until officially amended.

Except as otherwise recommended by the Planning Commission, the development of conditional uses shall conform to the applicable regulations of the district in which it is to be located. The provisions for appeals from the Planning Commission as provided in this Chapter shall be applicable to conditional uses. (Ord. 80-131)

14-6-105: PROCESSING: Same as zone change request, although approval by City Council shall be by resolution and require one reading. (Ord. 80-131)

14-6-106: AMENDMENT TO APPROVED DEVELOPMENT PLAN:

- A. The Planning Director may approve minor amendments in keeping with the intent of the original approval, or refer the amended plan to the Planning Commission at the regularly scheduled Planning Commission meeting or informal Planning Commission meeting. The process does not require a public hearing or processing to City Council, although if the Planning Commission finds the requested amendment to be a significant change to the intent of the original approval, the Commission may call for a complete new submittal requiring processing in the same fashion as the original conditional use request. (Ord. 80-131)

ARTICLE 7 USE VARIANCE

SECTION:

- 14-7-101: Intent and Purpose
- 14-7-102: Nonuse Variances
- 14-7-103: Criteria for Granting a Nonuse Variance
- 14-7-104: Guidelines for Review of Nonuse Variances
- 14-7-105: Conditions of Approval
- 14-7-106: Application for Requested Nonuse Variance
- 14-7-107: Use Variances
- 14-7-108: Criteria for Granting a Use Variance
- 14-7-109: Application for Requested Use Variance
- 14-7-110: Termination of Right
- 14-7-111: Comprehensive Plan

14-7-101: INTENT AND PURPOSE: In establishing the provisions of Article 7, the Colorado Springs City Council hereby finds and determines that there may be exceptional or extraordinary circumstances or conditions which are applicable to properties within the City, or to the intended uses of properties within the City that do not generally apply to the property or class of uses in the same zone, and such that denial of an application for relief would result in an inability to reasonably utilize property. Therefore it is necessary to provide for such extraordinary relief in the form of nonuse variances and use variances. In reviewing such applications for variances, the burden shall be upon the applicant to meet the criteria set forth in this Article 7. (Ord. 85-136)

14-7-102: NONUSE VARIANCES: Subject to the requirements of Chapter 14 and this Article 7, nonuse variances, as defined herein, are hereby authorized. A nonuse variance is defined as authorization to deviate from restrictions which relate to a permitted use, rather than a limitation on the use itself, such that the essential character of the use remains the same. Examples of dimensional and other zoning ordinance requirements that may be the subject of nonuse variances include, but are not limited to, restrictions on the bulk, height and size of buildings, or extent of lot coverage, or on the placement of buildings and structures on the lot with respect to required yard sizes; or the physical characteristics of the land itself, including minimum lot area required

for a permitted use and setbacks; the required width of the lot or its frontage on the street, or limitations on the time prescribed by Chapter 14 for the substantial completion of the construction of the structure; or restrictions on the number of off-street parking spaces required or the location and number of parking areas in relation to a structure to which they are an accessory, or the size of the spaces; or for the expansion of nonconforming structures; or for any other similar restriction to the right to develop or use land for a purpose or in a manner otherwise expressly provided by law, but which still insures that the essential permitted use remains the same. (Ord. 85-136)

14-7-103: CRITERIA FOR GRANTING A NONUSE VARIANCE: The following criteria must be met in order for a nonuse variance to be granted:

- A. The property has extraordinary or exceptional physical conditions that do not generally exist in nearby properties in the same zoning district; and
- B. That the extraordinary or exceptional physical condition of the property will not allow a reasonable use of the property in its current zone in the absence of relief; and
- C. That the granting of the variance will not have an adverse impact upon surrounding properties. (Ord. 85-136)

14-7-104: GUIDELINES FOR REVIEW OF NONUSE VARIANCES: As a guide to applying the above criteria for nonuse variance applications, where applicable, the fact-finder may, but is not required to consider any or all of the following circumstances which have been established by the evidence in determining whether the applicable criteria have been met:

- A. Extraordinary or Exceptional Physical Conditions:
 - 1. The physical conditions of the property shall

- A1) not be conditions general to the neighborhood or surrounding properties.

2. The unique physical conditions of the property may be its size, shape, location, topography, soils; or

3. The unique physical conditions of the property may be the size or location of existing structures on the property if such structures are not self-imposed conditions; or

4. The unique physical conditions may be certain onsite or offsite environmental features which may positively or negatively affect the property in question, including but not limited to adjacent land uses, traffic, noise views and location of significant natural, architectural or historic features.

- B. No Reasonable Use:

1. The demonstrated extraordinary or exceptional physical conditions of the property must directly relate to the inability to reasonably use the property in conformance with the applicable zoning ordinance regulations.

2. The concept of less reasonable use may be considered if a neighborhood standard exists and if it is demonstrated that the property in question has a less reasonable use by comparison with proximate and similar properties in the same zoning district.

3. The purchase price of the property, the desire for greater economic return on investment or mere inconvenience do not constitute, by themselves, evidence of no reasonable use.

4. Self-imposed conditions such as prior voluntary rezoning, platting, or building in violation of City codes and ordinances do not constitute evidence of no reasonable use.

5. Knowledge, or lack of knowledge, of zoning restrictions and physical site constraints at the time the property is purchased is immaterial to evidence of no reasonable use of the property.

- C. No Adverse Impact:

1. The granting of a variance shall not be detrimental to public health, safety and welfare or injurious to surrounding properties.

- C) 2. The granting of a variance shall not be inconsistent with any plans adopted by the City.

3. The granting of a variance shall not weaken the general purpose of the Zoning Ordinance or its regulations.

4. The variance, if granted, shall only be to the extent necessary to afford a reasonable use of property. (Ord. 85-136)

14-7-105: CONDITIONS OF APPROVAL:

- A. Special conditions may be imposed upon nonuse variance approvals in order to alleviate or mitigate potential adverse impacts.
- B. Conditions must relate to the property and may, in addition, relate to specific persons or organizations which have a direct association with the use of the property as contemplated by the requested variance. (Ord. 85-136)

14-7-106: APPLICATION FOR REQUESTED

NONUSE VARIANCE: Any owner of record, or authorized agent for said owner, whose authorization shall be made a part of the application record, may submit an application for a nonuse variance to the Planning Department for processing. A submitted complete application shall include a site sketch. (Ord. 85-136)

14-7-107: USE VARIANCE: Subject to the requirements of Chapter 14 and this Article 7, use variances, as defined herein, are hereby authorized. A use variance is defined as authorization to deviate from the list of permitted uses listed in a zoning district. The City Council may impose reasonable provisions or restrictions as it may deem appropriate or necessary. (Ord. 85-136)

14-7-108: CRITERIA FOR GRANTING A USE VARIANCE: The following criteria must be met in order for a use variance to be granted:

- A. That there are exceptional or extraordinary circumstances or conditions applicable to the property involved or to the intended use of the property that do not apply generally to the property or class of uses in the same zone so

- A) that a denial of the petition would result in undue property loss; and
- B. That such variance is necessary for the preservation and enjoyment of a property right of the petitioner; and also,
- C. That such variance will not be detrimental to the public welfare or convenience nor injurious to the property or improvements of other owners of property. (Ord. 85-136)

right. The property affected thereby shall be subject to all other provisions and regulations of this Chapter applicable to the zone in which such property is classified by this Chapter at the time of such termination. (Ord. 86-214)

14-7-111: COMPREHENSIVE PLAN: The Comprehensive Plan and other adopted plans, if applicable, shall be considered and addressed in applying the provisions of this Article 7. (Ord. 85-136)

14-7-109: APPLICATION FOR REQUESTED USE VARIANCE:

- A. Any owner of record or authorized agent for said owner may submit an application for a use variance to the Planning Department for processing. A submitted complete application shall include a development plan as described in Article 5.
- B. Development Plan: The submitted and approved development plan for the requested use variance shall be binding on the property until officially amended.
- C. Amendments to approved Development Plan: All requested amendments to the originally approved use variance development plan shall be processed in the same manner as the original use variance request.
- D. Any variance granted pursuant to this Article shall expire within six (6) months from date of granting by the hearing officer or by the City Council on appeal if action is not taken thereon within said time, unless said time is extended for good cause shown by the Hearing Officer or City Council. For purposes of this subsection, action means obtaining a building permit pursuant to the granting of the variance, or if a building permit is not required, the right which is granted pursuant to the variance is put to use pursuant to the variance. (Ord. 85-136; Ord. 86-214)

14-7-110: TERMINATION OF RIGHT: Except as provided in Section 14-7-109D discontinuance of the exercise of any right heretofore or hereafter granted by any variance for a continuous period of twelve (12) months shall terminate such

ARTICLE 8 PARKING

SECTION:

- 14-8-101: Purpose
- 14-8-102: General Provisions, Restrictions and Prohibitions
- 14-8-103: Parking Requirements by Use
- 14-8-104: Parking Lot Landscape Requirements
- 14-8-105: Parking Exempt Zone

14-8-101: **PURPOSE:** The purpose of this Article is to ensure the provision and design of off-street parking areas that: are safe for pedestrians and motorists; minimize potential negative impacts to adjacent properties; and reduce the reliance for on-street parking so that safe and efficient vehicular travel on the streets is promoted. (Ord. 86-124)

14-8-102: **GENERAL PROVISIONS, RESTRICTIONS AND PROHIBITIONS:** The following provisions apply in all zones, except as otherwise specifically mentioned.

- A. **Conformance Required:** Off-street parking and maneuvering areas in conformance with this Article shall be provided for any building constructed, for any building that is expanded, or any change in use that would result in additional parking spaces being required.
- B. **Plans Required:** Whenever parking is required under the provisions of this Article, or whenever existing parking is changed or redesigned, plans drawn to scale shall be submitted to the Planning Department prior to construction indicating conformance with this Article.
- C. **Continuation:** Off-street parking and maneuvering areas lawfully existing at the time this Article became effective may be continued, except as otherwise provided in this Article.¹ Off-street parking and maneuvering areas in conformance with this Article shall be maintained with the use to which they relate so long as such use remains.

- D. **Paving of Unpaved Areas:** The Planning Director may require the paving of lawfully existing unpaved parking, maneuvering or access areas or automobile display or storage areas for any use except a one-family residence. The requirement to pave shall be made after evaluating such factors as the character of the neighborhood and the amount and type of traffic generated by the use. The Planning Director shall find and determine that the use of the unpaved area causes air pollution due to blowing dust or adverse drainage conditions or that the use constitutes a nuisance to the residents or occupants of the neighborhood. Paving shall be provided as required by Section 14-8-102E12.

E. Design Guidelines:

1. **Location:** All required off-street parking spaces shall be located on the same lot as the use. Access or maneuvering areas may be located on adjacent lot(s) as long as a recorded document is provided for common use and maintenance. In commercial centers either the required parking spaces shall be located on the same lot as the use as required above, or all parking, access, and maneuvering areas shall be available for all users of the commercial center through the use of easement(s) or tract(s). The easement or tract shall be established by a recorded statement on the plat that the easement or tract is to be used and maintained by all the lot owners within the commercial center. An easement may also be established pursuant to a grant of easement or other appropriate recorded document. For attached dwelling units in the PUD zone parking, access, and maneuvering areas may be provided in a tract. The tract shall be established by the recorded plat, with a statement on the plat that the tract is to be used and maintained by all the lot owners within the PUD zone.

2. **Front Yards:** No portion of any required front yard shall be included as a part of the off-street parking or maneuvering area in the A, R, R-1 9000, R-1 6000, R-2 or OR Zones or in any

1. This Article became effective on 4th day of September, 1986, pursuant to Ordinance No. 86-124 as to the property located within the City upon that date.

- E2) single family or duplex project in any zone except for religious institutions which are regulated by requirements in individual zone districts. Driveways may cross the required front yards to provide access for off-street parking or off-street loading requirements.

3. Public Right-of-Way: Parking or maneuvering areas located within the public rights-of-way shall not be used to meet off-street parking or off-street loading requirements.

4. Backing Across Property Lines: No parking space shall be permitted where the unparking vehicle must be backed across any property line adjacent to a public right-of-way except for one-family or two-family residences.

5. Parking Dimensions: Dimensions of parking or maneuvering areas shall be provided as shown on Figure 1 of this Article.

6. Parking Space Overhang: The paved depth of parking spaces may be decreased by the overhang dimensions indicated in Figure 1 of this Article, providing that the following conditions are met:

a. No sidewalk shall be decreased to less than four feet (4') in width by use of an overhang. No overhang is permitted into a sidewalk that is located within a public right-of-way.

b. No required landscaped area shall be reduced by use of an overhang.

7. Parking Structure or Garage: Parking or maneuvering areas located inside a structure or garage shall be provided as shown on Figure 1 of this Article.

8. Compact Spaces: A maximum of forty percent (40%) of all provided parking spaces may be compact spaces. Dimensions for compact spaces are shown on Figure 1 of this Article. Compact spaces shall be designated as such.

9. Handicapped Parking: Handicapped parking spaces shall be provided in accordance with the schedule listed below. The minimum width of a handicapped space shall be twelve feet (12'), or nine feet (9') if an additional adjacent delineated access aisle at least three feet (3')

- E9) wide is provided along one side; spaces nine feet (9') in width may share a common access aisle between two (2) spaces. The depth of a handicapped space shall be provided as shown on Figure 1 of this Article. Each handicapped space shall be designated by a sign showing the international disabled symbol of a wheelchair. Each sign shall be no smaller than one foot by one foot (1' x 1') and shall be located at the end of the space at a height between four feet (4') and seven feet (7'). The sign may either be wall mounted or freestanding. Handicapped spaces shall be located so as to provide convenient access to a primary accessible building entrance unobstructed by curbs or other obstacles to wheelchairs.

a. Handicapped parking for residential uses shall be provided at the rate of one space for each dwelling unit that is designed for occupancy by the physically handicapped.

b. Handicapped parking spaces shall be provided for all uses other than residential at the following rate:

Number of Parking Spaces Provided	Number of Handicapped Spaces Required
1 - 24	0
25 - 74	1
75 - 99	2
100 - 199	3
200 - 299	4
300 - 399	5
400 and above	6 + 1 for each 200 additional parking spaces provided

c. Handicapped parking spaces required by this Article shall count toward fulfilling off-street parking requirements.

10. Driveway Intersections with Public Streets: Location, design and width of any driveway that intersects with a public street shall be subject to the specifications as outlined in the Department of Public Works/Traffic Engineering Division Policy and Design Standards.

11. Driveway Widths: Any driveway providing access to a parking area for a use other than a one-family or two-family residence shall be a minimum of twenty feet (20') in width where two (2) way traffic is allowed and a minimum of twelve feet (12') in width where one-way traffic is allowed.

- E) 12. Paving: Except for parking areas provided for one-family residences, the surface of all parking spaces, drives, aisles, maneuvering and automobile display or storage areas shall be paved.

13. Perimeter Enclosures: Except for parking areas provided for one-family or two-family residences the perimeter of all parking, maneuvering, driveways and automobile display or storage areas shall be enclosed by a permanent wall, fence, curb, wheel or bumper barrier. The barrier must be a minimum of four inches (4") in height. A discontinuous barrier may be used as long as the separation between barriers does not exceed four feet (4').

14. Striping: Except for parking spaces for one-family or two-family residences, all parking spaces shall be clearly delineated or striped and the striping shall be maintained so it is visible.

15. Directional Signs: Directional signs for parking, maneuvering or drive areas are subject to the provisions of Section 14-9-103K.

16. Lighting: Lights used for illumination of parking areas and driveways shall be directed away from adjacent properties and rights-of-way so as to confine direct rays to the site.

17. Off-Street Loading: For any industrial use, off-street loading spaces and maneuvering areas shall be provided on the same lot in accordance with the schedule listed below. Maneuvering or access areas may be located on adjacent lot(s) as long as a recorded document is provided for common use and maintenance.

<u>Square footage of building</u>	<u>Number of spaces</u>
up to 3,000	0
3,001 to 20,000	1
20,001 to 80,000	2
80,001 to 140,000	3
for each additional 100,000	1 additional

The minimum dimensions of an off-street loading space are twelve feet wide by forty feet long (12' x 40') with a minimum vertical clearance of fourteen feet (14'). A minimum maneuvering aisle width of forty feet (40') shall be provided behind the off-street loading space.

18. Drive-Through Stacking Lanes: Automobile stacking lanes for drive-through uses shall be provided according to the following:

- E18) a. Restaurants shall provide ninety feet (90') behind each order and pick-up window, or if the functions are separated, thirty feet (30') behind an order board, and sixty feet (60') behind the pick-up window.

b. Financial institutions and/or financial transactions facilities (i.e. bill payment windows) shall provide seventy feet (70') behind each window or transfer facility. Where more than one window or transfer facility is provided, the stacking lanes may be distributed in twenty foot (20') increments among the various lanes as long as no lane is less than thirty feet (30') in length.

c. A car wash shall provide forty feet (40') behind each bay or stall.

d. The minimum width of a drive-through lane shall be eight feet (8').

e. Required drive-through stacking lanes shall not intersect with pedestrian access to a public entrance of a building.

f. Each drive-through lane shall be striped, marked or otherwise distinctly delineated.

g. Driveways in conformance with Section 14-8-102E11 shall be provided to all stacking lanes.

19. Commercial Centers: In addition to retail uses, a commercial center may include offices, restaurants, theatres, automobile services or other uses as permitted by the zone district. If common parking, access and maneuvering agreements are provided as stated by Section 14-8-102E1, then the parking requirement shall be as required by Section 14-8-103A13 regardless of the mix, location or number of different uses within the boundaries of the commercial center.

20. Tandem Parking: A parking space that is blocked by a tandem parking space shall not count toward fulfilling off-street parking requirements. A tandem parking space is a parking space located so that it abuts a second parking space such that vehicular access to that second space can only be made through the abutting (tandem) space.

21. Repair Bays: Repair bays within an automobile service station, repair garage or other

E21) similar use shall not be counted as part of the required off-street parking spaces.

22. Display or Storage Areas: Required parking, maneuvering, or access areas for automobile sales uses shall not be used for display or storage of automobiles. Display or storage areas shall be delineated on required plans. For determining compliance with Section 14-8-104A every two hundred fifty (250) square feet of area used for display or storage shall represent one parking space. Striping shall not be required for automobile display or storage areas.

23. Self-Storage or Mini Warehouse Facilities: A driveway aisle for mini-warehouse or self-storage facilities shall be a minimum width of twenty four feet (24'). A driveway aisle where access to storage units is only on one side of the aisle

E23) may be twenty feet (20') in width. No off-street parking spaces are required for these facilities. Off-street parking as indicated in Section 14-8-103 shall be provided for any accessory use (i.e. office, dwelling) of the mini-warehouse or self-storage facility. (Ord. 86-124; Ord. 86-229)

The tree types and minimum planter sizes shall be consistent with a "Landscape Policy Manual" prepared by the City Planning Department. The required trees may be clustered but shall be located to divide and break up expanses of paving and long rows of parking spaces and to create a canopy effect in the parking lot. In order to be considered within the parking lot, the trees must be located in planters that are bounded on at least three (3) sides by parking lot paving. This means that only trees in landscaped "islands" or "fingers" can count toward the parking lot tree requirement. Planters shall be of sufficient size and design to accommodate the growth of the trees and to prevent damage to the trees by vehicles.

Administrative Relief of the requirements of this sub-section may be requested under Article 19.

- B. Required Screening: Open parking spaces--except in one-family and two-family residential projects in any zone district shall be screened from view from adjacent properties and streets to an eventual minimum height of three feet (3') by the use of berms and/or plantings. A minimum of two-thirds ($\frac{2}{3}$) of the affected street frontage or property boundary--not counting intersecting driveways--must have the required screen. Structures such as decorative walls or fences may be approved through an Administrative Relief request if the Zoning Administrator (or other Planning Division designee) finds that:

1. The structures avoid a blank and monotonous appearance by such measures as architectural articulation and the planting of vines, shrubs or trees or

2. The total use of berms and/or plantings is not physically feasible, or

3. The structures attractively complement the use of berms and/or plantings.

The maximum spacing of plants to achieve an acceptable screen and the maximum acceptable

- B) grades for screening areas--such as sodded berms and planting beds--shall be consistent with a "Landscape Policy Manual" prepared by the City Planning Department.

- C) standards including parking angle and space dimensions that must be complied with are hereby incorporated into this Code and appear at the end of this Chapter.
- D. Location. The parking area must be provided on the same lot as the principal buildings, except when off-street parking is required in a C-6 zone, in which case the parking area may be within five hundred feet (500') of the principal building but not separated by an arterial street. When the required off-street parking space is provided on a separate lot from the main building, there shall be recorded in the office of the City Clerk a covenant by the owner of such lot that such parking spaces will be maintained as long as such building is maintained.
- E. Existing Parking Area. Off-street parking space being maintained in any of the zones in connection with any existing structures on the effective date of this Chapter shall thereafter be maintained so long as such building remains, unless an equivalent number of such spaces are provided conforming to the requirements of this Section; provided, however, that this regulation shall not require the maintenance of more automobile parking space than is herein required for a new building.
- F. Use of Required Off-Street Parking by Another Building. No part of an off-street parking space required for any building or use for the purpose of complying with the provisions of this Chapter shall be included as a part of an off-street parking space similarly required for another building or use, unless the type of structure indicates that the periods of usage of such structure will not be simultaneous with each other.
- G. Free Parking Space Required. With the exception of the off-street parking exempted area as set forth in the section above, and the Municipal Airport, the minimum number of off-street parking spaces required by this Article shall be provided without direct charge to the users of the facilities providing such parking spaces.

The providers of such minimum off-street parking spaces shall have the right to reasonably control the users thereof by means

- G) which may include, but not be limited to, restricting all parking to the users of the facility providing such parking spaces; parking lot attendants; control gates; tow-away areas; employee, tenant and staff restricted areas; customer and visitor restricted areas; and imposing reasonable time limitations on users other than tenants, employees and staff. None of the above control means shall be applied to defeat the intent of this Section. Direct charges may be made to users who exceed minimum time limits.
- H. No parking space shall be approved where the unparking vehicle must be backed across any property line except in single-family and two-family areas, nor for any parking space that is blocked off by another vehicle.
- I. Design Standards. The stall length of required parking spaces may be decreased by the dimensions indicated in the table on the following page, providing that the following conditions are met:
 - 1. Parking spaces so reduced shall be located at the perimeter of the parking area.
 - 2. No sidewalk shall be decreased to less than four feet (4') in width by permitting the overhang.
 - 3. No required landscaped area shall be reduced by permitting the overhang.
- J. Except for parking areas provided for one and two-family dwellings, the surface of all required parking spaces, drives and aisles, shall be paved with asphalt, concrete or similar permanent surfacing. (Ord. 80-131; Ord. 81-102; Ord. 85-11; Ord. 86-39)

14-8-106: PARKING LOT LANDSCAPE REQUIREMENTS:

- A. Required Trees: One tree of a type suitable for parking lots shall be provided for every fifteen (15) open (not in a garage) vehicular parking stalls in parking lots with fifteen (15) or more stalls. The tree types and minimum planter sizes shall be consistent with a "Landscape Policy Manual" prepared by the City Planning Department. The required trees may be clustered but shall be located to divide and break up expanses of paving and long rows of parking stalls and to create a canopy effect in the parking lot. In order to be considered within the parking lot, the trees must be located in planters that are bounded on at least three (3) sides by parking lot paving. This means that only trees in landscaped "islands" or "fingers" can count toward the parking lot tree requirement. Planters shall be of sufficient size and design to accommodate the growth of the trees and to prevent damage to the trees by vehicles.

Administrative relief of the requirements of this subsection may be requested under Article 19.

- B. Required Screening: Open parking spaces, except in one-family and two-family residential projects in any zone district, shall be screened from view from adjacent properties and streets to an eventual minimum height of three feet (3') by the use of berms and/or plantings. A minimum of two-thirds ($\frac{2}{3}$) of the affected street frontage or property boundary, not counting intersecting driveways, must have required screen. Structures such as decorative walls or fences may be approved through an administrative relief request if the Zoning Administrator (or other Planning Department designee) finds that:

1. The structures avoid a blank and monotonous appearance by such measures as architectural articulation and the planting of vines, shrubs or trees; or

2. The total use of berms and/or plantings is not physically feasible; or

3. The structures attractively complement the use of berms and/or plantings.

- B) The maximum spacing of plants to achieve an acceptable screen and the maximum acceptable grades for screening areas, such as sodded berms and planting beds, shall be consistent with a "Landscape Policy Manual" prepared by the City Planning Department.

Administrative relief of the requirements of this subsection may be requested under Article 19. (Ord. 86-39)

CHAPTER 14 ZONING

14-9-102: Definitions

14-9-103: General Provisions, Restrictions and Prohibitions

14-9-101: **PURPOSE:** The purpose of this Article is to permit signs that will not, by their size, location, and construction endanger the public health and safety of individuals, or confuse, mislead, or obstruct the vision necessary for traffic safety, or decrease the value of surrounding properties. Also, because of the reliance of the community on the tourist industry due to the natural and scenic beauty of the area, this Article is intended to create a more aesthetically pleasing community to both visitors and residents by preventing the over-concentration, improper placement, and bulk of signs. C. No billboard shall be erected or maintained which exceeds fifty feet (50') in height above the ground elevation.

D. Billboards shall be located no closer than fifty feet (50') from any residential zone for those signs of twenty five feet (25') in height or less. Those signs in excess of twenty five feet (25') in height shall be setback four (4) additional feet from the residential zone for every one additional foot in height.

E. No billboards shall be spaced less than the required number of feet as shown in the chart below; provided, however, signs may be erected back to back and shall count as one sign for spacing purposes. Physical spacing of

- E) billboards shall be determined by the date of issuance of the permit and the person first obtaining a permit shall have priority pursuant to the spacing provision of this Section. Distances between signs shall be measured horizontally along the centerline of the street or highway to which the sign is directed.

Spacing Requirement

PIP-2	1,000 ft.
C-6	1,000 ft.
M-1	1,000 ft.
M-2	400 ft.
(Ord. 84-28)	

14-9-204: BENCHES AT BUS STOPS: Within all zones of the City advertising displays not exceeding twelve (12) square feet in area shall be permitted and authorized upon benches at bus stops provided for the convenience of patrons of buses or other public carriers, if said benches have been placed within the public rights of way under proper permit or authority of the City Council. (Ord. 84-28)

14-9-205: IDEOLOGICAL SIGNS: One ideological sign shall be allowed per lot not exceeding six (6) square feet in sign area and four feet (4') in height. An ideological sign is in addition to any other signs permitted by this Article. (Ord. 84-28)

CHAPTER 14 ZONING

ARTICLE 10 LANDSCAPE REQUIREMENTS

SECTION:

- 14-10-101: Purpose and Intent
- 14-10-102: Objectives
- 14-10-103: Definitions
- 14-10-104: Landscape Plan Requirements
- 14-10-105: Landscape Material Specifications
- 14-10-106: General Landscape Requirements
- 14-10-107: Enforcement/Assurances for Installation and Completion
- 14-10-108: Maintenance
- 14-10-109: Special Landscape Districts
- 14-10-110: Landscape Policy Manual

14-10-101: **PURPOSE AND INTENT:** This Section is intended to provide uniform standards for development and maintenance of the landscaping of private property and public rights-of-way.

The City recognizes that landscaping can be a significant expense to business people and residents. At the same time, landscaping improves the livability of residential neighborhoods, enhances the appearance and customer attraction of commercial areas, increases property values, improves the compatibility of adjacent uses, screens undesirable views, contributes to the image and appeal of the overall community, and can reduce air and noise pollution. The intent of these regulations is to achieve a reasonable balance between the right of individuals to develop and maintain their property in a manner they prefer and the right of City residents to live, work, shop, and recreate in pleasant and attractive surroundings. (Ord. 86-39)

14-10-102: **OBJECTIVES:** Landscaping shall enhance the streetscapes along the City's public rights-of-way with an emphasis on trees, to define and separate vehicular and pedestrian traffic areas, screen the appearance of parking areas from public rights-of-way and adjacent properties, mitigate the visual harshness and summer heat gain within parking areas, screen objectionable and higher intensity uses from lower intensity uses, and enhance the appearances of structures. (Ord. 86-39)

14-10-103: DEFINITIONS:

- A. "Landscaping" is defined as any combination of living plants, such as trees, shrubs, vines, ground covers, flowers or grass; natural features such as rock, stone, bark chips or shavings; and structural features, including but not limited to, fountains, reflecting pools, outdoor art work, screen walls, fences, or benches.
- B. "Landscape Setback" is defined as a minimum required landscaping space on a private property which is adjacent to a property line common to a street right of way or another property. Driveways and sidewalks to afford limited access may be allowed to interrupt this required space.
- C. Other definitions are provided in the "Definitions" Section of the Zoning Chapter. (Article 1, Section 14-1-109) (Ord. 86-39)

14-10-104: LANDSCAPE PLAN REQUIREMENTS:

- A. Preliminary Landscape Plan: A preliminary landscape plan may be submitted instead of a final landscape plan as part of the development plan under administrative review (per Article 5 of the Zoning Chapter). As a condition of approval of the development plan with a preliminary landscape plan, a final landscape plan shall be submitted for review and approval prior to the issuance of building permits. A preliminary landscape plan shall not be submitted as part of the application for a conditional use, a use variance, or a zone change which requires a development plan at the time of the zone change.

The Planning Department planner reviewing a development plan shall have the authority to require part or all of the final landscape plan information when the preliminary landscape plan information is not sufficient to assure that the development plan will avoid (or acceptably mitigate) an adverse impact on a surrounding property.

A) The following information shall be included in a preliminary landscaping plan:

1. North arrow.
2. Indication of scale (for example, 1" = 20' or a bar scale).
3. Existing and proposed contours adequate to identify and properly specify landscaping for areas needing slope protection, as well as adequate to depict any screening of parking areas. Such information may be on a sheet separate from the planting plan.
4. Project data information including the total square footage of the property; the square footage of the building areas, parking and other vehicular use areas, and landscape areas (including required sub-areas such as internal landscaping areas); the total number of open vehicular parking stalls; and the total number of proposed dwelling units in a residential development project.
5. The existing/proposed zoning of the subject property and the existing zoning/approved master plan designations on surrounding properties.
6. The location of all structures, light standards, retaining walls, fences, exterior parking and loading areas, pedestrian walks or paths, pedestrian-oriented areas, vehicular drives, storm water detention areas, and other man-made elements. A description of all required structures for screening purposes.
7. Delineation of the corner visibility triangle areas required under Section 14-15-111 of this Chapter.
8. The general location, type and size of major existing plant materials with information as to which such materials shall be removed and which shall be retained or relocated.
9. The general location, type, and quantity of proposed plant and other landscape materials. This information shall be sufficient to ensure that the various landscape requirements can be met on the final landscape plan.

B. Final Landscape Plan: A final landscape plan shall be submitted for City review and approval as part of any required development plan review (Article 5) or as part of any building permit application package for any new development project, redevelopment project, or proposed change of use, except for those in single-family or two-family zone districts.

The following information shall be included in a final landscape plan:

1. North arrow.
2. Indication of scale (for example, 1" = 20') or a bar scale.
3. Existing and proposed contours (for example, 2' interval) adequate to identify and properly specify landscaping for areas needing slope protection, as well as adequate to depict any screening of parking areas. Such information may be on a sheet separate from the planting plan.
4. Project data information including the total square footage of the property, the square footage of the building areas, parking and other vehicular use areas, and landscape areas (including required sub-areas such as internal landscaping areas); the total number of open vehicular parking stalls; and the total number of proposed dwelling units in a residential development project.
5. The existing/proposed zoning of the subject property and the existing zoning on surrounding properties.
6. The location of all structures, light standards, retaining walls, fences, exterior parking and loading areas, pedestrian walks or paths, pedestrian-oriented areas, vehicular drives, storm water detention areas, and other man-made elements. Detail drawings of all required structures for screening purposes.
7. Delineation of the corner visibility triangle areas required under Section 14-15-111 of this Chapter.
8. The location, type and size of major existing

B,8) plant materials, including all trees, with information as to which such materials shall be removed and which shall be retained or relocated.

B) 9. The location, type, size, quantity and planting spacing (where applicable) of proposed plant and other landscape materials. Such information shall be summarized in a legend, in a similar manner as the example shown below:

LEGEND

NOTE: The botanical name and common name of plants may be replaced by the specification that the tree is one on an acceptable list in the "Landscape Policy Manual" (for example, "parking lot tree from list of acceptable trees in Landscape Policy Manual").

(See following page for Section 14-10-104 continued)

- B) 10. The planting size of all deciduous trees shown on the plan shall be indicated in minimum inches of caliper, measured six inches (6") above ground. The planting size of all evergreen trees shall be indicated in minimum feet of height above ground. The planting size for shrubs shall be indicated in the minimum container size in inches or gallons, as appropriate.

11. All plant materials shall be shown on the plan at approximately the mature size of the materials.

12. All proposed lawn areas and ground cover areas shall be identified, including the types and amounts of living plant materials to be used and the size and depth of nonliving materials. The manner in which any lawn areas are to be established (for example, by sodding or seeding) shall be indicated. The landscape treatment of all adjacent right-of-way areas, as well as the owner/developer's property, shall be identified.

13. Statement of the type of equipment and methods to be used to irrigate the required landscape areas. (Ord. 86-39)

14-10-105: LANDSCAPE MATERIAL SPECIFICATIONS: The minimum planting/installation size and characteristics of plant materials which are required by this Article shall be as follows:

- A. Deciduous shade trees: One and one-half inch (1½") caliper measured six inches (6") above ground, balled and burlapped.
- B. Deciduous ornamental trees: One inch (1") caliper measured six inches (6") above ground, balled and burlapped.
- C. Evergreen trees: Six feet (6') in height above ground, balled and burlapped.
- D. Evergreen and deciduous shrubs: One or five (5) gallon size, depending on the spacing of the plants. (See the "Landscape Policy Manual" prepared by the Planning Department.)
- E. Ground covers and vines: Two and one-quarter inches (2¼") flat-type container, one gallon, or five (5) gallon size, depending on the spacing of the plants. (See the "Landscape Policy Manual".) (Ord. 86-39)

14-10-106: GENERAL LANDSCAPE REQUIREMENTS:

- A. Required Minimum Landscape Setbacks. All Zone Districts (One-Family and Two-Family Residential Projects in any Zone District are excluded)

1. Minimum depth of landscaped setback:

- Adjacent to a major arterial, expressway or freeway on the City's major thoroughfare plan, twenty five feet (25')
- Adjacent to a minor arterial on the City's major thoroughfare plan, twenty feet (20')
- Adjacent to any nonarterial street, ten feet (10')
- Adjacent to a nonstreet boundary of the zone district, no minimum depth requirement (however, must provide for required "nonstreet boundary" trees discussed below or may need to provide "buffer" requirements discussed later in Section 14-10-106B, if applicable).

2. Minimum number of trees in landscaped setbacks and nonstreet boundaries:

- Adjacent to a major arterial, expressway, or freeway on the City's major thoroughfare plan, a minimum of one tree for every twenty feet (20') of frontage of the property within the zone district.
- Adjacent to a minor arterial on the City's major thoroughfare plan, a minimum of one tree for every twenty five feet (25') of frontage of the property within the zone district.
- Adjacent to any nonarterial street, a minimum of one tree for every thirty feet (30') of frontage of the property within the zone district.
- Adjacent to any nonstreet (interior) boundary, a minimum of one tree for every thirty feet (30') of nonstreet (interior) boundary of the zone district. These trees do not need to be located in a landscaped setback of a minimum size but shall be in planters of sufficient size and design to accommodate the growth of the trees and to prevent damage to the trees by vehicles. The planter specifications shall be consistent with a "Landscape Policy Manual" prepared by the Planning Department.
- These required landscaped setback and boundary trees may be clustered along a particular frontage or boundary. The trees shall be selected from the list of tree types that are commonly known to grow in the Colorado

A,2) Springs area, listed in the "Landscape Policy Manual" prepared by the Planning Department.

— The required landscaped setback trees may be located in a landscaped setback with a depth greater than the minimum required depth; however, in any case the required trees shall be located within fifty feet (50') of the street side property line. The required boundary trees shall be located within fifty feet (50') of the nonstreet (interior) boundary of the zone districts.

— The required landscaped setback trees may be permitted to be located in part or in total in the adjacent public right-of-way area, if: (1) the City Forester's standards for street trees are met in the case of a City street; (2) the District Engineer approves the trees in the case of a State Highway; and (3) no conflicts exist with utility easements.

— The required landscaped setback trees shall be located in the adjacent public right-of-way area if these trees cannot be placed in the landscaped setback area due to the existing development of the site. However, such trees are required only to the extent that: (1) the City Forester's standards for street trees are met in the case of a City street; (2) The District Engineer approves the trees in the case of a State Highway; and (3) no conflicts exist within utility easements.

— Walls and fences which are twenty five percent (25%) or more opaque in design shall be no higher than three feet (3') above finish grade in a required landscaped setback. Opaque walls and fences higher than three feet (3') (such as noise barriers) must be located outside of the landscaped setback to maintain a landscaped appearance along the street.

— The landscape setback requirements in this Section are superseded, where applicable, by the front yard parking prohibitions in Section 14-8-102, General Provisions, Restrictions and Prohibitions. The parking section prohibits parking in the required front yard (building setback area) in any residential zone, the OR zone, and in residential development in any other zone. The parking section may cause a greater landscaped setback than required by this Section.

A,2) Administrative relief of the requirements of the Section, "Required Minimum Landscaped Setbacks", may be requested under Article 19.

B. Required Buffers:

1. Buffer Between Nonresidential and Residential Districts Separated by a Nonarterial Street:

— Where Required: Such a buffer is required along the streetside property line in any nonresidential project in any zone district where such a project is separated from a residential district by a nonarterial street. Nonarterial streets are those not designated as arterial streets on the City's major thoroughfare plan. Public alleys are also considered nonarterial streets for the purposes of this subsection.

— Design Standards: Such a buffer shall be a minimum of fifteen feet (15') in depth. The minimum number of trees in such a buffer shall be one tree for every fifteen feet (15') of the frontage length of the buffer. A minimum of one-third ($\frac{1}{3}$) of the trees shall be evergreen trees. These requirements may effectively increase the depth and number of trees of the "minimum required landscaped setback" (in Section 14-10-106A1 and A2).

An opaque structure with a minimum height of six feet (6') is required along the inside edge (private property side) of the buffer.

This buffer area shall require a ground covering with a minimum of seventy five percent (75%) in living plant materials.

Administrative relief of the requirements of this subsection may be requested under Article 19.

2. Buffer Between: (1) Adjacent nonresidential and residential projects and (2) Adjacent multi-family residential and single-family/two-family residential projects:

Where Required: Such a buffer is required in the following situations:

a. Along the common property line in any nonresidential project in any zone district where such a project is adjacent to any residential zone district.

- B,2) b. Along the property line in any multi-family project (a project with three [3] or more dwelling units in one building) in any zone where such a project is adjacent to a one-family or two-family zone district.

Design Standards: Such a buffer shall be a minimum of fifteen feet (15') in depth. The minimum number of trees in such a buffer shall be one tree for every fifteen feet (15') of the length of the buffer. A minimum of one-third ($\frac{1}{3}$) of the trees shall be evergreen trees. An opaque structure with a minimum height of six feet (6') is required along the common property line.

This type of buffer is not required to consist of a minimum percentage in ground covering by living materials. However, that portion of the buffer area in a ground covering by nonliving materials shall be covered with bark, wood chips, rock, stone, or other materials.

Administrative relief of the requirements of this subsection may be requested under Article 19.

C. Required Internal Landscaping:

1. Purpose: "Internal" landscaping requirements are intended to augment the "boundary" landscaping requirements (such as landscaped setbacks and buffers) and parking lot landscaping requirements. The purpose of "internal" landscaping is to visually soften the mass of buildings and to visually separate building areas from parking areas. The City recognizes that flexibility in the design of spaces and tree selection is needed. This flexibility is needed because of: 1) the diversity of building designs; 2) the possible limitations on plant selections due to building foundation problems posed by the root growth of some trees; and 3) building foundation problems posed by the irrigation of expansive soils.

These requirements do not apply to one-family and two-family residential projects in any zone district.

2. Requirements for multi-family projects (a project with three (3) or more dwelling units in one building) in any zone district:

— Minimum internal landscaping area: A minimum of fifteen percent (15%) of the site's net area (site's area excluding adjacent public streets).

- C,2) — Minimum number of trees in the internal landscaping area: A minimum of one tree for every five hundred (500) square feet of the required minimum internal landscaping area.

3. Requirements for Nonresidential projects in any zone district:

— Minimum internal landscaping area: A minimum of five percent (5%) of the site's net area (site's area excluding adjacent public streets).

— Minimum number of trees in the internal landscaping area: A minimum of one tree for every five hundred (500) square feet of the required minimum internal landscaping area.

Up to one-half ($\frac{1}{2}$) of the required trees may be substituted by shrubs adjacent to retail store fronts where the view of wall signs may be obstructed. Ten (10) shrubs with a minimum container size of five (5) gallons shall be provided for each tree that is replaced.

4. Standards for the minimum internal landscaping area and minimum number of trees:

— Location of the minimum area: To be credited toward the minimum internal landscaping area requirement, a landscaping area shall be located as follows:

a. Adjacent to those building elevations which form the major public views of the project from adjacent streets and properties and to the users of the project, or

b. Within a plaza or courtyard between buildings or portions of buildings, or

c. In a space provided to separate building areas from parking areas, or

d. In a similar location which substantially conforms to the stated purpose of the required internal landscaping area (see above), if approved by the Planning Department.

The location of spaces credited toward the minimum internal landscaping area requirement shall be consistent with the policies in the "Landscape Policy Manual" prepared by the Planning Department.

- C,4) The minimum internal landscaping area and its minimum number of trees may not consist of spaces or trees which are proposed to meet the minimum requirements of other sections of this Chapter, such as landscaped setbacks, buffers, or parking lot trees.

Design Standards: The minimum required internal landscaping area shall consist of a minimum of fifty percent (50%) on ground covering by living grass or other plant materials. This percentage provides flexibility where plants and their irrigation should be limited next to building foundations.

The intent of the internal landscaping area is to provide relief from structures and hard surfaces in a project through the use of plantings. Therefore, sidewalks which provide basic pedestrian circulation only shall not be credited toward the minimum internal landscaping area requirement. Paved plazas may be credited to a maximum of fifty percent (50%) of required internal landscaping area if such plazas have trees which provide visual relief to those building elevations which form the major public views of the project.

To provide for flexibility of design in the minimum internal landscaping area, the developer may select the types of and the planting spaces between the required trees. However, the trees shall be selected from the tree types that are commonly known to grow in the Colorado Springs area, listed in the "Landscape Policy Manual" prepared by the Planning Department. The planting spacing should allow for the growth characteristics of the trees without adversely affecting the maintenance of structures, walks, or drives.

The minimum planting sizes of trees shall comply with the specifications provided in Section 14-10-105 above.

Administrative relief of the requirements of this Section, "Required Internal Landscaping", may be requested under Article 19.

- D. **Percentage in Living Materials:** Unless otherwise specified, any required landscape area, such as a "minimum landscaped setback", shall consist of a minimum of seventy five percent (75%) in ground covering by living grass or other plant materials. The minimum planting sizes and

- D) spacings of shrubs and ground covers to meet a ground covering requirement shall be consistent with a "Landscape Policy Manual" prepared by the Planning Department. The foliage crown of trees shall not be used in the seventy five percent (75%) or other required percentage calculation. The remaining twenty five percent (25%) of the required landscape area may be covered with bark, wood chips, rock, stone, or similar materials.

E. **Other Landscape Regulations:**

1. Landscaping shall not conflict with the traffic visibility requirements in Section 14-15-111 of this Chapter.

2. The use of artificial trees, shrubs, vines, turf, or other plants as an outside landscape material is prohibited.

3. The planting of any trees of the *Ulmus* genus (that is, elm) is prohibited.

4. Box Elder (*Acer negundo*) and all trees of the *Salix* and *Populus* genus, except Aspen (*Populus Tremuloides*) and Cottonless Cottonwood (*Populus deltoides* 'Siouxland'), shall not be planted within twenty five feet (25') of a street right of way.

5. Clumps of trees (such as Aspen, *Populus Tremuloides*), where used, are encouraged instead of single-trunk trees. However, such a clump shall be credited as only one of the required trees.

6. Landscaping shall not interfere with the general function, safety or acceptability of any gas, electric, water, sewer, telephone, or other utility easement. Landscaping shall be limited to an eight inch (8") mature height within three feet (3') of a fire hydrant.

7. Refuse collection areas, including trash bins, shall be screened from view from adjacent properties and streets by the use of wall or fence of an opaque design or other architectural elements, or dense evergreen plantings with a minimum planting height of four feet (4').

8. Loading docks, vehicle repair bays, and vehicle fueling areas shall be screened from view from adjacent properties and streets by the use of plantings, berms, walls, fences, or other architectural elements.

- E) 9. The existing indigenous vegetation on a site is encouraged to be retained in a development project and may be credited toward required landscaping in this Chapter.

10. Where a calculation of a requirement results in a fractional number (such as 14.2 required trees), the requirement shall be considered the next greatest whole number (such as 15 required trees).

11. Where two (2) different landscape requirements apply (for example, a buffer and a landscaped setback), the greater requirement shall be met (for example, the buffer).

12. Landscaping in the right of way of a State highway shall be approved by the District Engineer, where applicable.

13. Parking lot landscaping requirements are provided in Section 14-8-104 of this Chapter. Street tree requirements are provided in Section 18-4-101 through 18-4-112 of the Parks and Recreation Chapter of the Code of the City of Colorado Springs. Requirements for the maintenance of "street parkings" (area between a property line and curb) are provided in Section 18-4-109 of the Parks and Recreation Chapter. (Ord. 86-39; Ord. 86-177; Ord. 86-229)

14-10-107: **ENFORCEMENT/ASSURANCES FOR INSTALLATION AND COMPLETION:**

Prior to the issuance of a certificate of occupancy for any structure where landscaping is required, except when a certificate of occupancy is obtained by providing acceptable assurance to the City guaranteeing the completion of such landscaping, all work as indicated on the landscaping plan shall be inspected and approved by the Planning Division, Zoning Enforcement Section. At the time of inspection, the landowner shall possess a copy of the approved landscaping plan for use by the Zoning Enforcement Section Inspector. At the time of inspection, the Zoning Enforcement Section Inspector shall check the quantities and locations of landscape materials. At the time of such inspection, the landowner shall warrant that the completed landscaping complies with the approved landscape plan. Such warranty shall include the quantities, locations, species and sizes of plants and other landscape materials on the approved landscape plan. In the event that an inspection is not conducted by

the zoning enforcement section inspector prior to the issuance of a certificate of occupancy because acceptable assurance has been provided to the City guaranteeing the completion of such landscaping, such inspection shall be done by the zoning enforcement section inspector subsequent to the installation of such landscaping but prior to the release or expiration of the acceptable assurance.

A landowner may obtain a certificate of occupancy for a structure prior to the completion of required landscaping work if the completion is not possible due to seasonal or weather conditions and if the landowner submits the necessary assurances to the zoning enforcement section for the completion of the landscaping. The acceptable assurance guaranteeing the completion of the landscaping, such as an irrevocable letter of credit, certified check, or subdivision bond or other acceptable assurance, shall be equal to the cost of the landscaping work and shall be accompanied by a written assurance that such landscaping will be completed to the satisfaction of the City Planning Department within a specified period of time not to exceed nine (9) months from the date of occupancy. (See Section 15-3-108 of this Code for the definition of "Acceptable Assurance".)

14-10-108: **MAINTENANCE:**

A. Maintenance on Private Property:

1. The landowner is responsible for the maintenance of the landscaping plan as originally approved.

2. The landowner is responsible for all regular and normal maintenance of landscaping including weeding, irrigation, fertilizing, pruning and mowing.

3. Plant materials which exhibit evidence of insects, pests, diseases and/or damage shall be appropriately treated and all dead plant material shall be removed and replaced with living plant materials.

- B. Maintenance of Adjacent Right-of-Way Areas or "Street Parkings": Section 18-4-109 of the Parks and Recreation Chapter of the City Code requires the owners of property to maintain the "street parking" (area between a property line and curb) adjoining their property. The City shall provide maintenance of trees only by means of spraying, trimming and removal.

- C. Performance Standard for Seeded Areas: Seeded landscape areas shall have no bare areas larger than six (6) square inches after germination.

14-10-109: SPECIAL LANDSCAPE DISTRICTS:

The City recognizes that the "General Landscape Requirements" (Section 14-10-106A through C, landscape setback, buffer and internal landscaping requirements) above are applicable to the general City of Colorado Springs which is generally characterized as suburban in nature, relatively lower in intensity of zoning and land use, and relatively more automobile-oriented in its transportation facilities. The City recognizes that these landscaping requirements are not applicable to two (2) special districts of the City, the "Central Business District" and the "Old Colorado City District", which are generally characterized as urban in nature, relatively higher in intensity of zoning and land use, and relatively more pedestrian-oriented in their transportation facilities.

As a result of their different characteristics from the rest of the City, the "Central Business District" and the "Old Colorado City District" are exempted from the landscaping requirements in Section 14-10-106A through C. These two (2) special landscaping districts are regulated by a special plan and set of regulations.

- A. Central Business District: The boundaries of this special landscaping district are described by a map in this Article entitled "Special Landscaping Requirements - Central Business District".

As of the date of this amendment to the Zoning Chapter, special landscaping requirements have not been adopted by City Council for this district.

- B. Old Colorado City District: The boundaries of this special landscaping district are described by a map in this Article entitled "Special Landscaping Requirements - Old Colorado City District".

The special landscaping requirements in this district consist of the "Redevelopment Guidelines for Old Colorado City". This document was adopted by reference in the "Westside Plan", adopted by City Council on January 22, 1980. Both of these documents are on file at the Planning Department. These redevelopment guidelines emphasize improvements in the public right of way and financing methods. (Ord. 86-39)

14-10-110: LANDSCAPE POLICY MANUAL: The Director of the Planning Division is hereby authorized to adopt a Landscape Policy Manual containing policies, procedures, and other provisions necessary to implement the provisions of Section 14-8-104 (Parking Lot Landscape Requirements) of this Code, Article 10 (Landscape Requirements) of Chapter 14 of this Code, Article 19 (Administrative Relief) of Chapter 14 of this Code, Section 14-13-104 (Nonconformity in Terms of Landscaping and Parking) of this Code, and Sections 18-4-301 through 304 (Street Tree Fee, Fund, Planting Requirements) of this Code. (Ord. 86-39; Ord. 86-177)

CHAPTER 14 ZONING

ARTICLE 11 ADULT USES

SECTION:

- 14-11-101: Purpose and Description
- 14-11-102: Definitions
- 14-11-103: Regulations
- 14-11-104: Variance

14-11-101: **PURPOSE AND DESCRIPTION:** In the opinion of certain planners and real estate experts the location of several adult uses in the same neighborhood tends to attract an undesirable quantity and quality of transients who adversely affect property values, cause an increase in crime, especially prostitution and encourage residents and businesses to move elsewhere, and

It has been demonstrated that the establishment of more than two (2) adult uses within one thousand feet (1,000') of each other has a deleterious effect on the surrounding residential and business areas and that the fostering of such businesses within close proximity tends to create a "Skid Row" atmosphere.

It has been demonstrated that the establishment of adult uses in business districts which are immediately adjacent to and which serve residential neighborhoods has a deleterious effect on both the business and the residential segments of the neighborhood, causing blight and down-grading of property value.

Concern for, and pride in, the orderly planning and development of a neighborhood should be encouraged and fostered in those persons comprising residential and business segments of that neighborhood.

Article 15 (Police Regulations) of title 31 of the Colorado Revised Statutes as amended prescribes certain conduct and specifically provides that any municipality may:

"...regulate the promotion or wholesale promotion of obscene material and obscene performances as defined in part 1, article 7 of title 18, C.R.S."

and further:

"...adopt reasonable regulations for the operation of establishments open to the public in which persons appear in a state of nudity for the purpose of entertaining the patrons of such establishment; except that such regulations shall not be tantamount to a complete prohibition of such operation. Such regulations may include the following:

- A. Minimum age requirements for admittance to such establishments;
- B. Limitations on the hours during which such establishments may be open for business; and
- C. Restrictions on the location of such establishments with regard to schools, churches, and residential areas." (Ord. 77-10; Ord. 80-131; Ord. 86-158)

14-11-102: DEFINITIONS:

ADULT AMUSEMENT OR ENTERTAINMENT is an amusement or entertainment which is distinguished or characterized by an emphasis on acts or material depicting, describing or relating to "Specified Sexual Activities" or "Specified Anatomical Areas", as defined herein, including but not limited to topless or bottomless dancers, exotic dancers, strippers, male or female impersonators or similar entertainment.

- 14-13-104: Description and Limitations;
Nonconformity in Terms of Land-
scaping and Parking
- 14-13-105: Reclassification

14-13-101: **DESCRIPTION AND LIMITATIONS; NONCONFORMING USE:**

- A. Continuation. The nonconforming use of a building or structure lawfully existing at the time this Chapter became effective may be continued, except as otherwise provided in this Article.
- B. Repairs and Alterations. A building or structure nonconforming as to use may be repaired or altered, and any building, structure or portion thereof, declared unsafe by the Building Official² may be strengthened or restored to a safe condition.
- C. Change of Use. A nonconforming use of a building or structure may be changed to a less objectionable use of higher classification, but not to a use of lower classification, nor shall a nonconforming use be changed to another use of the same classification, unless the new use shall be deemed by the Hearing Officer, after public notice and hearing, to be no more harmful to the surrounding neighborhood from the standpoint of the purposes of this Chapter than the existing nonconforming use. When the use of a nonconforming building or structure is here-

- C) after changed to a use of a higher classification, such use thereafter shall not be changed to a use of a lower classification.
- D. Extension. A nonconforming use of a building or structure may not be extended except as otherwise provided in this Chapter; however, the extension of a use to any portion of a building or structure, which portion is at the time of the adoption of this Chapter primarily arranged or designed for such nonconforming use shall be permitted; provided the extension of the nonconforming use in floor area does not exceed fifty percent (50%) of the floor area which was used by the nonconforming use at the time this Chapter became effective.
- E. Discontinuance. If a nonconforming use of any building or structure is discontinued, or its normal operation stopped for a period of one year, the use of the building or structure shall thereafter conform to a use permitted in the zone in which it is located.
- F. Destruction by Calamity. No building which has been damaged by fire or other causes to the extent of more than fifty percent (50%) of its replacement value shall be repaired or rebuilt, except in conformity with the regulations of this Chapter. (Ord. 80-131; Ord. 84-28; Ord. 85-11)

14-13-102: **DESCRIPTION AND LIMITATIONS; NONCONFORMING BUILDINGS OR STRUCTURES:**

- A. Continuation. A nonconforming building or structure lawfully existing at the time this Chapter became effective may be continued, except as provided in this Article.
- B. Repairs and Alterations. A nonconforming building or structure may be repaired or altered,

1. Throughout this Article are references to "the time this Chapter became effective". The ordinance from which this Article derived became effective August 24, 1926. Ed. Note: The date just given is the date of passage of the first Zoning Ordinance adopted by the City. Since that date there have been over 400 annexations to the City. Therefore, the effective date of each annexing ordinance would determine the date upon which the Zoning Code of the City became applicable to the annexed property. Further, numerous instances of rezoning of property within the City have occurred over the years. If such rezoning rendered an existing use or structure nonconforming, then the effective date of the rezoning ordinance would determine the effective date of this Article as to those uses or structures. In summary, then, there is no single effective date of general application to all nonconforming uses and structures.

2. See Section 16-1-301 for designation of the Building Official.

- B) and any building, structure, or portion thereof, declared unsafe by the Building Official may be strengthened or restored to a safe condition.

C. Addition or Enlargement.

1. Nonconforming as to Height or Yard: A building or structure nonconforming as to height or yard regulations shall not be added to or enlarged in any manner unless such addition or enlargement conforms to all regulations of the zone in which it is located.

2. Nonconforming as to Area Per Family or Lot Coverage. A building or structure nonconforming as to area per family or percentage of the lot be used shall not be added to or enlarged in any manner, unless such addition or enlargement conforms to all regulations, including area per family or percentage of lot to be used, of the zone in which it is located.

D. Repealed (Ord.84-28)

- E. Small Buildings. Any buildings or small structures occupying a ground area of not more than one hundred (100) square feet which, though conforming to the use regulations of the zone in which they are located, are nearer a property line or a front lot line than permitted by this Chapter shall, within a period of one year from the effective date of this Chapter, be moved so as to conform with the yard regulations for such zone.

**14-13-103: DESCRIPTION AND LIMITATIONS;
NONCONFORMING LAND:**

- A. Continuation. A nonconforming use of land, where no building is involved and where such use is the principal use, lawfully existing on the effective date of this Chapter may be continued except as otherwise provided in this Article.
- B. Extension. A nonconforming use of land shall not be expanded, enlarged or extended in any way either on the same or adjoining properties.

- C. Termination or Change of Use. Where a nonconforming use of land, or any portion thereof, is discontinued or changed, any future use of such land shall be in conformity with the regulations of this Chapter. (Ord. 80-131)

**14-13-104: DESCRIPTION AND LIMITATIONS;
NONCONFORMITY IN TERMS OF
LANDSCAPING AND PARKING:**

- A. Purpose and Intent: Within the districts created by the adoption of this Chapter, or by the adoption of amendments subsequent to this Chapter, there may exist developments of land (including parking areas and landscaping) which were legal prior to the adoption or amendment of this Chapter, but which under the terms of this Chapter or its amendments, are now prohibited, restricted or regulated. It is the intent of this Chapter to permit these nonconformities to continue until they are voluntarily removed or brought into compliance in conjunction with a proposed change in the development. It is intended that these nonconformities will not be enlarged, expanded, extended, or increased, except as provided in this Article.

It is recognized that conformance with landscaping requirements may have special problems related to the existing improvements and the scale of a proposed change to a project.

- B. Continuation: Landscaping or parking spaces not in conformity with the requirements of this Chapter, where such landscaping or parking spaces lawfully existed at the time such requirements became effective, may be continued except as otherwise provided in this Article.
- C. Extension: Nonconforming landscaping or parking spaces shall not be enlarged, expanded, extended or increased, except as provided in this Article.
- D. Proposals Which Require Conformance:

1. Nonconforming in Terms of Off-Street Park-

- D,1. ing: Adequate off-street parking is necessary for the general safety and convenience of City residents and to avoid congestion on public streets.

Required parking spaces shall be provided in conjunction with any addition of building floor area or a change of use which requires additional parking spaces.

2. Nonconforming in Terms of Landscaping: Landscaping is important in improving the overall appearance of the City and increasing the compatibility of different land uses. It is recognized that landscaping is difficult to install in conjunction with relatively small increments of change in a development project (such as relatively small building additions or changes of use) for the following reasons: (1) the landscaping elements of a development project should be planned in a comprehensive and coordinated manner which is not feasible to implement with relatively small increments of change; (2) nonconformities related to landscaping are difficult to resolve where the existing improvements limit the potential for a comprehensive landscaping plan to be implemented; and (3) fragmented ownership in a development project can further reduce the potential for a comprehensive landscaping plan to be implemented with relatively small increments of change.

The existing nonconforming landscaping of a development project is permitted to continue until one of the following changes occurs:

a. Any new construction or addition of building floor area consisting of fifty percent (50%) or more of the existing gross building floor area of the development project on the subject lot, or

b. Any change from a residential use to a nonresidential use (or vice versa) consisting of fifty percent (50%) or more of the existing gross building floor of the development project on the subject lot.

All required landscaping shall be provided in conjunction with either of the two (2) changes described above.

- D) All required landscaping shall be provided in conjunction with any new development of a vacant lot or with the total redevelopment (demolition and new construction) of a lot.

Administrative relief of the requirements of this Section 14-13-104 may be requested under Article 19. (Ord. 86-39)

14-13-105: **RECLASSIFICATION:** The foregoing provisions of this Article shall also apply to buildings, structures, use of land or uses which hereafter become nonconforming due to any reclassification of zones under this Chapter or any subsequent change in the regulations of this Article. (Ord. 80-131; Ord. 83-253)

CHAPTER 14 ZONING
ARTICLE 14 ANNEXED AREAS

SECTION:

14-14-101: Zoning of Annexed Areas

14-14-101: ZONING OF ANNEXED AREAS: The petitioner or petitioners of an annexation may request that the initial zoning of the land to be annexed occur contemporaneously with the annexation ordinance in accord with the Municipal Annexation Act of 1965 (Article 12 of Title 31 of the Colorado Revised Statutes 1973, as amended). If there is no request for initial zoning by petitioners for annexation or if the annexation is in accord with C.R.S. § 31-12-106, 1973 as amended, the initial zoning of the annexed land shall be accomplished within ninety (90) days of the effective date of the annexation ordinance. Such initial zoning shall be accomplished after at least one public hearing by the City Planning Commission and City Council jointly or singly to consider the initial zoning of the annexed land. The public hearing shall be advertised once at least ten (10) days prior to the hearing date in a newspaper of general circulation of the City. Other procedures contained in this Chapter pertaining to notice and hearing as the same apply to rezoning are not applicable to the initial zoning of annexed lands. (Ord. 80-161; 1968 Code 14-7)

14-16-101: **PURPOSE:** In establishing a comprehensive zoning enforcement program, the City Council recognizes that zoning enforcement is a means of effectuating compliance with the land development process within the City of Colorado Springs. The legislative intent of comprehensive, long-range and current planning controls can be implemented only by land use development activities in conformance with these controls. Improper or illegal conditions or development which are allowed to exist undermine the intent and efforts of these land use processes. The City Council hereby determines that a comprehensive zoning enforcement process is necessary and desirable to protect the public health, safety and welfare. The objectives of this comprehensive zoning enforcement process include reduction of the number of zoning violations; abatement of violations in a timely and efficient manner; protection for all citizens from zoning violations; and establishment of a fair process to abate violations. To achieve these objectives, the City Council recognizes and adopts the following general techniques or guidelines: provide consistency in the administration, interpretation and enforcement of the zoning and subdivision ordinances; recognize inherent differences in many types of zoning violations; develop a set of standard procedures for abating each type

of violation based upon their risk of harm to the public health, safety and welfare; prioritize the activities of the zoning enforcement staff; and establish a greater communication and understanding of zoning and zoning enforcement within the community. (Ord. 86-66)

14-16-102: **COMPREHENSIVE ZONING ENFORCEMENT PROCESS:** In order to effectuate the above goals and objectives with respect to zoning enforcement, the City Council hereby determines that a comprehensive zoning enforcement process is necessary and desirable. A comprehensive system of zoning enforcement will provide identification and reporting capabilities which capitalize on the advantages of each individual method which may be utilized to abate zoning violations. This comprehensive zoning enforcement process offers the best opportunity to achieve the City's goals and objectives for zoning enforcement. The zoning enforcement techniques which the Zoning Administrator is hereby authorized to utilize to meet the goals and objectives of this Article 16 shall include, but not be limited to, the complaint system of reporting zoning violations by citizens; initiation of complaints by zoning inspectors or other City officials; or through systematic or programmatic code enforcement programs. No systematic or programmatic code enforcement program shall be initiated for a neighborhood or area within the City of Colorado Springs without the prior approval of the City Manager. (Ord. 86-66)

The Zoning Administrator shall also have such other duties and responsibilities as established by the Planning Director. (Ord. 86-66)
