Tradition, Innovation and Conflict: Perspectives on Colorado Water Law

MacDonnell, Lawrence J., ed. Tradition, Innovation and Conflict: Perspectives on Colorado Water Law.
Boulder: Natural Resources Law Center, 1986.

A rich history of conflict and innovation pervades all matters of water use and policy in Colorado. This legacy was reviewed in a two-day conference in October of 1985 conducted jointly by the Colorado Water Resources Research Institute and the Natural Resources Law Center. This book is based on presentations from that event.

The materials in this book are divided into six parts. Part One frames the discussion with an analysis of the supply of, and demand for, Colorado's water resources. It identifies several areas where changes must occur to assure that Colorado's water needs are met. In Part Two, the authors take a critical look at aspects of the present Colorado system for allocating water resources, calling for a thorough analysis comparing the Colorado system with those in other states. Following in Part Three, they examine issues of water use efficiency and the current and potential role of the market in achieving potential efficiency gains, a discussion that continues in Part Four with an examination of several aspects related to water transfers and water management. Part Five examines a traditionally overlooked component of water issues in Colorado: ground water. And, finally, Part Six looks at interstate issues, and the controversial issue of interstate water transfers.

Tradition, Innovation, and Conflict: Perspectives on Colorado Water Law

Introduction

Lawrence J. MacDonnell

Part One - The Background

- Chapter 1. Meeting Colorado's Water Requirements: An Overview of the Issues.....1
David H. Getches
- Chapter 2. The Historical Development of Colorado Water Law.25
Raphael J. Moses

Part Two - Water Rights Adjudication and Administration

- Chapter 3. Administering Colorado's Water: A Critique of the Present Approach.....41
Clyde O. Martz and Bennett W. Raley
- Chapter 4. Water Administration Workshop.....63

Part Three - Water Use Efficiency

- Chapter 5. Wasted Water: The Problems and Promise of Improving Efficiency Under Colorado Water Law.....73
Steven J. Shupe
- Chapter 6. A Market-Based Approach to Water Rights: Evaluating Colorado's Water System.....107
Stephen F. Williams
- Chapter 7. Water Efficiency Workshop.....127

Part Four - Water Transfers and Management

- Chapter 8. Plans for Augmentation: A Summary.....137
Lawrence J. MacDonnell
- Chapter 9. Engineering and Hydrologic Issues in Changing Water Uses.....163
Leonard Rice
- Chapter 10. Plans for Augmentation Workshop.....175
- Chapter 11. Innovative Transfer and Exchange Plans.....185
Glenn E. Porzak
- Chapter 12. Voluntary Approaches to Basinwide Water Management.....207
Neil S. Grigg
- Chapter 13. Innovative Water Management Workshop.....221

Part Five - Ground Water

- Chapter 14. Nontributary Ground Water: A Continuing Dilemma....233
William A. Paddock
- Chapter 15. Nontributary Ground Water Workshop.....259

Part Six - Interstate Transfers of Water

- Chapter 16. Obstacles to Interstate Transfers of Water: Many a Slip Twixt the Cup and the Lip.....267
Howard K. Holme
- Chapter 17. Interstate Transfers Workshop.....287

Appendix - Biographical Sketches of Contributors
